have a place on my boat on the Amalfi coast' Salvatore Calabrese, legendary bartender A boozy book for boaters, The Boat Drinks Book serves up an expert look at the drinking culture in key sailing spots around the world. The book is split into five regions: Atlantic, Med, Baltic, Pacific, and Caribbean, and author Fiona Sims encourages us to explore each region and discover what locals like to drink, how it's made, where to go to drink it, and what is best to eat with it. In doing so she uncovers distilleries, breweries and wineries all within a short taxi ride of the harbour and shows us how to make the most of traditional markets. As well as giving us the insider knowledge on fabulous locations worldwide, The Boat Drinks Book gets in on the making too. Cocktail and drink recipes inspire us to whip up something delicious - using local liqueurs, wines, spirits and produce - to sip on deck at the end of a long day's cruising or exploring. There's even a scattering of recipes for ultimate boat nibbles, inspired by each region, from tapenade to salsa to stuffed piquillo peppers. So whether you're a seasoned sailor or an armchair aperitif enthusiast, grab a copy of The Boat Drinks Book and let expert food and wine writer Fiona Sims quench your thirst. Your mission: to discover and enjoy.

London Goes to Sea

Everyone dreams of tropical escape. But what happens when you escape for too long? Imagine spending 24 hours a day with your spouse in 31 not-so-square feet . . . for years; crossing the Pacific

Ocean on two gallons of fuel; and tossing spaghetti marinara around your living room, then cleaning it up while bouncing like ice in a martini shaker. Tightwads on the Loose tells the story of Wendy and Garth, lured to sea by the promise of adventure. They buy a 31-foot boat that fits their budget better than it fits Garth's large frame and set sail for an open-ended voyage, never imagining they'd be gone seven years, or cover 34,000 miles at the pace of a fast walk. They live without most "necessities" and learn that teamwork and a sense of humor matter most as they face endless "character-building opportunities." They make a long-anticipated visit to the island where Garth had been shipwrecked as a teenager, only to find it had become a penal colony. An electronic catastrophe in the Solomon Islands leaves them without navigation equipment, which forces them to trade their free-wheeling lifestyle for one that seems straight out of a '60s sitcom: jobs at a U.S. Army base in the Marshall Islands. In Asia, they dodge typhoons and ships that threaten to turn their home into kindling. Finally they endure a grueling 49-day nonstop ocean crossing. None of this prepares them for their arrival "home" to a post-9/11 America which leaves them wondering what had changed more, them or the world. Tightwads on the Loose offers a fun read to the armchair adventurer -- or anyone afflicted with wanderlust.

It's Hard to Hug a Cow is about a Registered Red Angus cow that is not just seen through the eyes of a human as a milk producing, profit making animal but as a friend. The book starts out with realistic pencil drawings going to cartoon drawings with comedic intent during the anticipated act of hugging this adorable critter. This is a fun book for those who love farm animals not to mention the Registered Red Angus raisers. P.S. My friends call me the Dr. Seuss of cows!

The Boat Drinks Book

The aim of this book, with its superb step by step photographs and detailed diagrams is to enable every owner to understand the workings of an outboard motor (2 or 4 stroke) and be able to fix it with relative ease. It includes: an explanation of the different parts that make up the engine and how they interact; how fuel is transformed into propulsion; regular maintenance and repair worksheets to help even the most mechanically ignorant to work on their outboard engine with confidence; the most common causes of breakdown; troubleshooting tables to allow you to diagnose and fix the most common engine problems and advice on how to winterize your outboard in one short afternoon. After reading this book, your outboard will no longer be a potential bother to you but an ally for better boating.

A Voyage For Madmen

This book looks at the link between voters and

political party systems in Asian democracies, focusing on India, Indonesia, Korea and the Philippines. It discusses this link in terms of three distinct elements: the formation of voters preferences, the translation of preferences into votes, and the translation of votes into seats. The book goes on to discuss how far the general rules of political party systems and their underlying causal mechanisms such as strategic voting are apparent in these Asian democracies. In particular, it explores the extent to which electoral rules and social structural variables affect the process of transforming preferences into a political party system within the context of Asian politics. The extensive areas covered by the book overcome the traditional sub-regional division of Asia, namely, East, Southeast and South Asia.

As a young boy, rounding a bend in a remote Maine cove, Dave Roper stumbled upon two mermaids. No one believed him then. No one believes him now. But he kept watching and wondering: what is imagined and what is real? And while he watched and wondered during 50 years of waterborne life - as a boy, a teen, an adult, a father - what he pulled from the sea was not another mermaid, but the mystery, possibility, romance, joy, fear, and uncertainty that mermaids represent. Based on real experiences, these 30 stories take you on that journey. Once aboard you will: Share the fantasy world of a teenage solo cruising sailor as he meets his biggest challenge: a 22 year old woman. Enter the frenzied mind of a young

Push down a few beers with Big Red, a legendary Mississippi River pilot, and experience the hard-scrabble world of river life. Climb aboard a 135 foot Mississippi River sternwheeler headed straight into a tornado, with 300 oblivious wedding guests on board. Join a young delivery skipper as he takes two very uncertain aspiring voyagers on world's shortest circumnavigation attempt aboard a floating Winnebago. Probe deep up a saltwater creek to meet the reclusive King of Yurtdom and his technology-free world of Mongolian tribal huts. Experience a 50th wedding anniversary at sea and a coincidence right out of the Twilight Zone. Cheer for an octogenarian as his grandson kidnaps him from the clutches of a nursing home for one long last sail on his old wooden sloop. Weather Bomb 1913

Everybody has the dream: Build a boat in the backyard and sail off to join the happy campers off Pogo Pogo, right? But how? Assuming you aren't independently wealthy, if you want a boat that's really you, you gotta build it yourself. Backyard boatbuilding has its problems. Building in fiberglass is itchy, smelly, and yields a product that yachting maven L. Francis Herreshoff once called "frozen snot." Ferrocement, once all the rage, has pretty much sunk from favor, if you catch the drift. But there's still

wood, right? Ah, wood. Nature's perfect material. You can build in the time-honored traditions of the Golden Age of Yachting, loving crafting intricate joints in rare tropical hardwoods, steaming swamp oak butts to sinuous shapes, holding the whole thing together with nonferrous fastenings that cost a buck or better each. Does that sound like boatbuilding for everyone? What about the currently fashionable wood/epoxy boatbuilding? You butter regular old wood with Miracle Whip, stick it together in the shape of a boat, and off you go, right? Epoxy works, but They don't exactly give it away; nor is it exactly a benign substance. Suiting up like Homer Simpson heading for a fun-filled day at the nuclear power plant isn't exactly the aesthetic boatbuilding experience many of us are looking for. Where does that leave us? In the capable hands of George Buehler, who honors the timeless traditions of the sea all right, but those from the other side of the boatyard tracks. Buehler draws his inspiration from centuries of workboat construction, where semiskilled fishermen built rugged, economical boats from everyday materials in their own backyards, and went to sea in them in all kinds of weather, not just when it was pleasant. Buehler's boats sail on every ocean and perform every task, from long-term liveaboards in Norwegian fjords to a traveling doctor's office in Alaska. This book contains complete plans for seven cruising boats--from a 28-foot sailboat to a 55-foot power cruiser. All the information you need is here, including step-by-step instructions honed by nearly 20 years of supplying boat plans to backyard builders--and helping them out when they get into trouble. Buehler is anarchic, heretical, and occasionally profane; his

book is West Coast counterculture meets traditional hardchine workboat construction, leavened with hardnosed common sense and penny-pinching economy. This book is for those who look around them and see that much of what is done in the world today--whether in yachting or politics or economics or interpersonal relationships--is based not on logic but on conforming and meeting other people's expectations. This book is most definitely NOT about either. It is about the realization of dreams. If you believe that everyone who wants a cruising boat can have one . . . If you see beauty beneath the fish scales and work scars of a commercial fishing boat . . . If you want to build a simple, rugged, economical, good-looking cruising boat--power or sail--using everyday lumberyard materials and few skills other than perseverance, this is the book for you. Buehler's Backyard Boatbuilding tells you how to build extraordinary boats using the most ordinary skills and materials, with complete plans, instructions, and specifications for seven real cruising boats ranging from a 28-foot sailboat to a 55-foot power cruiser. Kennedy family, one must understand their passion for sailing and the sea. Many families sail together, but the Kennedys' relationship with Victura, the 25-foot sloop purchased in 1932, stands apart. Throughout their brief lives, Joe Jr., Jack, and Bobby spent many hours racing Victura. Lack of effort in a race by one of his sons could infuriate Joseph P. Kennedy, and Joe Jr. and Jack ranked among the best collegiate sailors in New England. Likewise, Eunice emerged as a gifted sailor and fierce competitor, the equal of any of her brothers. The Kennedys believed that Jack's experience sailing Victura helped him survive the sinking of his PT boat during World War II. In the 1950s, glossy Life magazine photos of Jack and Jackie on Victura's bow helped define the winning Kennedy brand. Jack doodled sketches of Victura during Oval Office meetings, and it's probable that his love of seafaring played a role in his 1961 decision to put a man on the moon, an enterprise he referred to as "spacefaring." Ted loved Victura as much as any of his siblings did and, with his own children and the children of his lost brothers as crew, he sailed into his old age: past the shoals of an ebbing career, and into his eventual role as the "Lion of the Senate." In Victura, James W. Graham charts the progress of America's signature twentieth-century family dynasty in a narrative both stunningly original and deeply gripping. This true tale of one small sailboat is an invaluable contribution to our understanding of the great story of the Kennedys.

London Goes To Sea is Peter J. Baumgartner's candid and captivating account of restoring an ageing fibreglass sailing boat over the course of four years and then introducing it to his native New England waters. His precise records illustrate every trial and triumph of the restoration process, and his careful attention to errors made along the way provides crucial insight for anyone considering a similar project. His writing combines the best elements of a brisk, entertaining narrative and a thoroughly practical handbook, making for a truly unique story that embraces every experience of the coastal sailor. His unflagging joy and enthusiasm for his old Cape Dory shine through on every page.

The Boat Rocker is a poetry of life that both presents a philosophy of life and describes an art of living that has been learned the hard way-by actually living a life; by having tasted all the joys life offers and having suffered many of the tragedies and pains life inevitably brings as well. While The Boat Rocker will not help a person to avoid all tragedy and pain-those are a part of every life-it will help everyone who takes it's message to heart to avoid some needless suffering and to get through whatever vale of tears is encountered through a simple act of faith, for fidelity is everything in life-fidelity to self, fidelity to our loved ones, fidelity to our purpose in life, and fidelity to God. These are essential for a well-lived, rewarding life. But love is the heart and soul of faith, and faith is but love made real.

Outboard Engines: Maintenance, Troubleshooting, and Repair, Second Edition

In 1968, nine sailors set off on the most daring race ever held: to single-handedly circumnavigate the globe nonstop. It was a feat that had never been accomplished and one that would forever change the face of sailing. Ten months later, only one of the nine men would cross the finish line and earn fame, wealth, and glory. For the others, the reward was madness, failure, and death. In this extraordinary book, Peter Nichols chronicles a contest of the individual against the sea, waged at a time before cell phones, satellite dishes, and electronic positioning systems. *A Voyage for Madmen* is a tale of sailors driven by their own dreams and demons, of horrific storms in the Southern Ocean, and of those riveting moments when a split-second decision means the difference between life and death.

Even the most well designed boats will suffer from wear and tear due to normal use on the water. Whilst accidents are less common, they too can result in damage which needs to be repaired on the spot. Highly illustrated, with step by step instructions, this book equips the reader with the vital 'first aid' skills he needs to make temporary repairs until he can get back to harbour. The Boat Repair Bible helps anyone who owns a boat to develop essential repair skills in the areas where problems most commonly arise. The section on hull and deck repairs covers fibreglass, wood, steel and ferro-cement hulls, and shows the reader how to deal with everything from leaks to impact damage, and much, much more. This section also covers domestic repairs, such as repairing upholstery, and troubleshooting problems with the heads. Amongst the many other techniques described, the section on general mechanics includes instructions on how to fix problems with a split fuel/water tank and leaking hydraulics, whilst the section on electrical repairs explains how to trace loose connections, replace damaged wiring and fix navigation instruments. The myriad of issues that can arise with the engine are covered in great detail, from how to deal with water in the fuel system to replacing the propeller and its shaft. From basic skills in safety, surveying and the use of tools, to advanced instructions on how to replace an engine, The Boat Repair Bible is as comprehensive as it is invaluable. With repairs specific to powerboats, sailboats, dinghies and outboards, it is a book no boat owner

Mind marks the arrival of a prescient and provocative new science writer. Psychologist Geoffrey Miller offers the most convincing—and radical—explanation for how and why the human mind evolved. Consciousness, morality, creativity, language, and art: these are the traits that make us human. Scientists have traditionally explained these qualities as merely a side effect of surplus brain size, but Miller argues that they were sexual attractors, not side effects. He bases his argument on Darwin's theory of sexual selection, which until now has played second fiddle to Darwin's theory of natural selection, and draws on ideas and research from a wide range of fields, including psychology, economics, history, and pop culture. Witty, powerfully argued, and continually thought-provoking, *The Mating Mind* is a landmark in our understanding of our own species.
