John Dunn, resembling a hero of fiction rather than a normal man, was one of the most extraordinary characters of 19th century South Africa. In 1852, at the age of 16 he turned his back on the fledgling colonial settlement of Port Natal and, crossing the Tugela River, headed into Zululand.. King Cetshwayo recorded his first meeting with Dunn, mentioning that the night had been bitterly cold: I ordered the servants to bring him in and a tall, splendidly made man appear He was dressed in rags I loved this white man as my brother and made him one of my induna.[chiefs] Such was Cetshwayo's generosity despite Dunn having earlier fought on the side of the king's brother during the Zulu War of Succession in which twenty thousand died in a single battle. Undear Cetshwayo's patronage, Dunn became a Zulu chief in every respect except for the colour of his skin. Later, when still under 20, he was educated by a British officer and accepted into colonial society thus allowing him to lead the double life of an English gentleman and, when he crossed back over the Tugela to his 49 wives, that of a powerful Zulu induna. He also assisted King Cetshwayo in supplying the Zulu army with a vast

number of guns. When war was declared in 1879, Dunn wished to remain neutral but treacherously sided against his friend and benefactor the Zulu king. With the British victorious, Sir Garnet Wolseley, who thought Dunn to be a very fine fellow, divided Zululand into five Kinglets, and proclaimed Dunn overlord of the largest. This autobiography is not only a fascinating insight into one of the most influential men in Natal history but also states his candid perception of several British generals including Lord Chelmsford and Sir Garnet Wolseley.

Did you know that: - the thirteen colonies which became the USA were not the most valuable British possessions in America? - Georgia was not the thirteenth but the fourteenth British colony in North America? - despite the claims in the Declaration of Independence, George III was not a tyrant? Information on these facts, and many many more, can be found in this fascinating and helpful A-Z guide. Colonial America's key events and personalities - from the first expedition to Roanoke Island in 1584 to the conclusion of the War of Independence - are readily accessible in this invaluable dictionary. Mary K. Geiter and W. A. Speck set the thirteen colonies which became the United States in an Atlantic context, dealing not only with the thirteen but also with Britain's other colonies in North America and the West Indies. The imperial connection is stressed too with entries on British monarchs and politicians, admirals and generals, Acts of Parliament and European wars which impacted on the American colonies. Also featuring a Select Bibliography and full Chronology to aid learning, this wide-ranging, clear and authoritative text is an essential reference for students, scholars and anyone with an interest in British America.

Examining the interaction of the Dutch and the English in colonial New York and New Jersey, this study charts the decline of European culture in North America. Balmer argues that the combination of political intrigue, English cultural imperialism, and internal socio-economic tensions eventually drove the Dutch away from their hereditary customs, language, and culture. He shows how this process, which played itself out most visibly and poignantly in the Dutch Reformed Church between 1664 and the American Revolution, illustrates the difficulty of maintaining non-English cultures and institutions in an increasingly English world. A Perfect Babel of Confusion redresses some of the historiographical neglect of the Middle Colonies and, in the process, sheds new light on Dutch colonial culture.

In the traditional narrative of American colonial history, early European settlements, as well as native peoples and African slaves, were treated in passing as unfortunate aberrations in a fundamentally upbeat story of Englishmen becoming freer and more prosperous by colonizing an abundant continent of "free land." Over the last generation, historians have broadened our understanding of colonial America by adopting both a trans-Atlantic and a trans-continental perspective, examining the interplay of Europe, Africa, and the Americas through

the flow of goods, people, plants, animals, capital, and ideas. In this Very Short Introduction, Alan Taylor presents an engaging overview of the best of this new scholarship. He shows that American colonization derived from a global expansion of European exploration and commerce that began in the fifteenth century. The English had to share the stage with the French, Spanish, Dutch, and Russians, each of whom created alternative Americas. By comparing the diverse colonies of rival empires, Taylor recovers what was truly distinctive about the English enterprise in North America. He focuses especially on slavery as central to the economy, culture, and political thought of the colonists and restores the importance of native peoples to the colonial story. To adapt to the new land, the colonists needed the expertise, guidance, alliance, and trade of the Indians who dominated the interior. This historical approach emphasizes the ability of the diverse natives to adapt to the newcomers and to compel concessions from them. This Very Short Introduction describes an intermingling of cultures and of microbes, plants, and animals--from different continents that was unparalleled in global history. Oxford's Very Short Introductions series offers concise and original introductions to a wide range of subjects--from Islam to Sociology, Politics to Classics, Literary Theory to History, and Archaeology to the Bible. Not simply a textbook of definitions, each volume in this series provides trenchant and provocative--yet always balanced and complete--discussions of the central issues in a given discipline or field. Every Very Short Introduction gives a readable evolution of the subject in question, demonstrating how the subject has developed and how it has influenced society. Eventually, the series will encompass every major academic discipline, offering all students an accessible and abundant reference library. Whatever the area of study that one deems important or appealing, whatever the topic that fascinates the general reader, the Very Short Introductions series has a handy and affordable guide that will likely prove indispensable.

In this remarkable book, Graham Hodges presents a comprehensive history of African Americans in New York City and its rural environs from the arrival of the first African--a sailor marooned on Manhattan Island in 1613--to the bloody Draft Riots of 1863. Throughout, he explores the intertwined themes of freedom and servitude, city and countryside, and work, religion, and resistance that shaped black life in the region through two and a half centuries. Hodges chronicles the lives of the first free black settlers in the Dutch-ruled city, the gradual slide into enslavement after the British takeover, the fierce era of slavery, and the painfully slow process of emancipation. He pays particular attention to the black religious experience in all its complexity and to the vibrant slave culture that was shaped on the streets and in the taverns. Together, Hodges shows, these two potent forces helped fuel the long and arduous pilgrimage to liberty.

In 1700, some 250,000 white and black inhabitants populated the thirteen American colonies, with the vast majority of whites either born in England or descended from English immigrants. By 1776, the non-Native American population had increased tenfold, and non-English Europeans and Africans dominated new immigration. Of all the European immigrant groups, the Germans may have been

the largest. Aaron Spencer Fogleman has written the first comprehensive history of this eighteenth-century German settlement of North America. Utilizing a vast body of published and archival sources, many of them never before made accessible outside of Germany, Fogleman emphasizes the importance of German immigration to colonial America, the European context of the Germans' emigration, and the importance of networks to their success in America

### **The Momentum of Tradition**

Tells the diverse story of four congregations in New York City as they navigated the social and political changes of the late eighteenth and mid-nineteenth centuries. In the fifty years after the Constitution was signed in 1787, New York City grew from a port town of 30,000 to a metropolis of over half a million residents. This rapid development transformed a once tightknit community and its religious experience. Including four churches belonging in various forms to the Church of England, that in some form still thrive today. Rapid urban and social change connected these believers in unity in the late colonial era. As the city grew larger, more impersonal, and socially divided, churches reformed around race and class-based neighborhoods. In *Four Steeples over the City Streets*, Kyle T. Bulthuis examines the intertwining of these four famous institutions—Trinity Episcopal, John Street Methodist, Mother Zion African Methodist, and St. Philip's (African) Episcopal—to uncover the lived experience of these historical subjects, and just how religious experience and social change connected in the dynamic setting of early Republic New York. Drawing on a wide range of sources including congregational records and the unique histories of some of the churches leaders, *Four Steeples over the City Streets* reveals how these city churches responded to these transformations from colonial times to the mid-nineteenth century. Bulthuis also adds new dynamics to the stories of well-known New Yorkers such as John Jay, James Harper, and Sojourner Truth. More importantly, *Four Steeples over the City Streets* connects issues of race, class, and gender, urban studies, and religious experience, revealing how the city shaped these churches, and how their respective religious traditions shaped the way they reacted to the city. This book is a critical addition to the study and history of African American activism and life in the ever-changing metropolis of New York City.

This book addresses the problem of religion, ethics, and public policy in a global technological civilization. It attempts to do what narrative ethicists have said cannot be done—to construct a cross-cultural ethic of human dignity, human rights, and human liberation which respects the diversity of narrative traditions. It seeks to do this without succumbing to either ethical relativism or ethical absolutism. The

author confronts directly the dominant narrative of our technological civilization: the Janus-faced myths of "Apocalypse or Utopia." Through this myth, we view technology ambivalently, as both the object of our dread and the source of our hope. The myth thus renders us ethically impotent: the very strength of our literal utopian euphoria sends us careening toward some literal apocalyptic "final solution." The demonic narrative that dominated Auschwitz ("killing in order to heal") is part of this Janus-faced technological mythos that emerged out of Hiroshima. And it is this mythic narrative which underlies and structures much of public policy in our nuclear age. This book proposes a coalition of members of holy communities and secular groups, organized to prevent any future eruptions of the demonic. Its goal is to construct a bridge not only over the abyss between religions, East and West, but also between religious and secular ethics.

Race first emerged as an important ingredient of New York City's melting pot when it was known as New Amsterdam and was a fledgling colonial outpost on the North American frontier. Thelma Wills Foote details the arrival of the first immigrants, including African slaves, and traces encounters between the town's inhabitants of African, European, and Native American descent, showing how racial domination became key to the building of the settler colony at the tip of Manhattan Island. During the colonial era, the art of governing the city's diverse and factious population, Foote reveals, involved the subordination of confessional, linguistic, and social antagonisms to binary racial difference. Foote investigates everyday formations of race in slaveowning households, on the colonial city's streets, at its docks, taverns, and marketplaces, and in the adjacent farming districts. Even though the northern colonial port town afforded a space for black resistance, that setting did not, Foote argues, effectively undermine the city's institution of black slavery. This history of New York City demonstrates that the process of racial formation and the mechanisms of racial domination were central to the northern colonial experience and to the founding of the United States.

All historians would agree that America is a nation of nations. But what does that mean in terms of the issues that have moved and shaped us as a people? Contemporary concerns such as bilingualism, incorporation/assimilation, dual identity, ethnic politics, quotas and affirmative action, residential segregation, and the volume of immigration resonate with a past that has confronted variations of these modern issues. America, written and compiled by a highly respected team of American historians under the editorship of Ronald Bayor, illuminates the myriad ways in which immigration, racial, and ethnic histories have shaped the contours of contemporary American society. This invaluable resource documents all eras of the American past, including black-white interactions and the broad spectrum of American attitudes and reactions concerning Native Americans, Irish Catholics, Mexican Americans, Jewish Americans, and other groups. Each of the eight chronological chapters contains a survey essay, an annotated bibliography, and 20 to 30 related public and private primary source documents, including manifestos, speeches, court cases, letters, memoirs, and much more. From the 1655 petition of Jewish merchants regarding the admission of Jews to the New Netherlands colony to an interview with a Chinese American worker regarding a 1938 strike in San Francisco, documents are drawn from a variety of sources and allow students and others direct access to our past. Selections include Powhatan to John Smith, 1609 Thomas Jefferson—"Notes on the State of Virginia" Petition of the Trustees of Congregation Shearith Israel, 1811 Bessie Conway or, The Irish Girl in America German Society in Chicago, Annual Report, 1857-1858.
