More Hypnotic Inductions

Stephen Gilligan and Robert Dilts truly take you on a voyage of self-discovery. The Hero's Journey examines the questions: How can you live a meaningful life? What is the deepest life you are called to, and how can you respond to that call? It is about how to discover your calling and how to embark on the path of learning and transformation that will reconnect you with your spirit, change negative beliefs and habits, heal emotional wounds and physical symptoms, deepen intimacy, and improve self-image and self-love. Along this path we inevitably meet challenges and confronting these challenges forces us to develop and think in new ways and push us outside our comfort zone. The book takes the form of a transcript of a four day workshop conducted by Stephen and Robert. It is a powerful way of learning as you are so absorbed by the experiences of the participants that you feel you are actually there. A wonderful voyage of discovery for everyone who thinks that, "there must be more to life than this".

Script Magic

George Gafner's Handbook of Hypnotic Inductions provided clinicians with inductions ready-made for practice. Here, in response to the overwhelming success of that book, he provides more brand-new inductions for the beginning and advanced hypnotherapist. After briefly summarizing the theoretical foundations of hypnosis, Gafner presents the inductions in five main categories: story inductions, inductions for sleep, inductions for children, directive inductions, and confusional inductions. Detailed scripts for inducing the hypnotic state are presented, as well as strategies for deepening, re-alerting, and debriefing—all followed by insightful clinical comments, making this book a comprehensive and invaluable hypnosis resource for clinicians.

The Ericksonian Approach

Richard Nongard's Big Book of Hypnosis Scripts

Designed as a practical desktop reference, this official publication of the American Society of Clinical Hypnosis is the largest collection of hypnotic suggestions and metaphors ever compiled. It provides a look at what experienced clinicians actually say to their patients during hypnotic work. A book to be savored and referred to time and again, this handbook will become a dog-eared resource for the clinician using hypnosis.

Creative Scripts For Hypnotherapy

This is NOT just another book of scripts. This set of hypnotic inductions and therapeutic scripts are Calvin Banyan's favorites. He also gives you insider techniques that no hypnotherapy practice should be without. Plus, you will get new original scripts that you will not get anywhere else. AND, you will get the "Must Have" Universal Script that works for almost any issue that your client brings into your office! Look oinside and see what you get. This book is designed for the working professional. In the first half of the book, every technique and script is explained in detail. Each script has embedded instructions that lets you know exactly how to use it properly. Then, in the second half of the book, you get the most important scripts in larger print and double spaced so that you can easily remove it and use it in your sessions. These "working" scripts do not have the added instructions so that you can be sure that you are reading just what needs to be read to each client for each issue. You will find that you use these patter scripts again and again. And, you will love the universal script that will work for most client's issues. You have to use it to believe it!

Practical Manual to Past Life Regression

Have you ever wondered how the best speakers in the world are able to pull audiences under their spell, and move them in a way that changes their beliefs and propels them into action?Whether they're aware of it or not, the most powerful communicators in the world all use hypnotic patterns when they speak. By using these same hypnotic patterns we are able to communicate ideas to people in a way that allows them to respond to our suggestions without feeling that we're the one's telling them what to do.We're able to do this by using what we call indirect suggestion. Indirect suggestion is what allows us to present ideas as options, instead of ultimatums.What makes indirect suggestion so interesting is that the majority of people respond to indirect suggestion as if it were a direct command to do the thing being suggested .It's a way of presenting people with what they feel are options, but which they respond to as if they were direct orders.With the fill-in-the-blank hypnotic language framework in this book you'll have all the tools you need to speak as compellingly and

powerfully as the most powerful communicators in the world.

Hypnotherapy Scripts

Quantum Hypnosis Scripts is a 222 page book of 26 full length, professional Hypnosis scripts, ideal for either professional use or for Self Hypnosis. As the title suggests, this book focuses exclusively on Hypnosis scripts and instructions for their best use. In addition to the 20 individual, push-button Hypnosis scripts, Quantum Hypnosis Scripts provides 2 Master Hypnosis Inductions, which are essential to the use of the provided Hypnosis scripts, if you don't already have a favorite Hypnosis induction. Also included are 2 Hypnosis Series Programs of 3 Hypnosis scripts each, for Weight Loss and Stress Reduction. Since these applications are ideally treated with a series of progressive, sequential sessions which are frequently hard to find, I think that readers will be pleased with these session scripts. Readers of Quantum Hypnosis Scripts also receive a Bonus FREE full-length audio Hypnosis session, valued at \$59, available at the book's website. Detailed information on how to access your free Hypnosis session is available in the last chapter of this book. Incidentally, if you are a user of the Instant Self Hypnosis method or a reader of Eyes Open Self Hypnosis, reading these complete and suggestion-rich scripts will work well for you. For readers of Quantum Self Hypnosis and students or graduates of NEIH, these are new scripts for you, although the now familiar script framework (the beach scene) is used in all the included scripts. There are also a few essential, duplicate Hypnosis applications featured in this book complete with new suggestions and thus different scripts from those offered in Quantum Self Hypnosis. The general approach for all of the included scripts is ego-strengthening and nurturing. These scripts are very helpful for professional use as well as for Self-Hypnotists. Also important, there are no scripts in this book that utilize negative programming or aversion therapy. These scripts are all positive, present tense, and affirmative in nature, thus very effective. This book was written as a stand alone text as well as a companion book to Quantum Self Hypnosis, so readers of that book will find many new and interesting scripts to use in this book. We decided at the 11th hour to include one of our well-known Stop Smoking Hypnosis scripts because it seemed wrong not to include a script for one of the most popular Hypnosis applications in this first volume of Quantum Hypnosis Scripts. Since this script is not brand new or unique, it is being included as a Bonus script and not being counted as one of the advertised 24 Hypnosis scripts included in this book. While the script isn't unique, it is very effective, so for readers looking for a good Stop Smoking script, enjoy your bonus script! This book is considered a cornerstone work by many practicing Hypnotherapy professionals. If you are looking for quality, time tested Hypnotherapy scripts, this is the book for you!

The Art of Hypnosis - Third Edition

The way I like to teach people is from the deepest level up, rather than the surface level down. My experience is that most hypnotherapy courses and books teach the surface level information first and many never touch on the deeper nature of things. They will often give you an explanation of what hypnosis is, perhaps some history of hypnosis, and then they will teach you some techniques for doing hypnosis. When you understand the deeper nature of trance and pattern-matching and the different ways hypnosis can be evoked you don't need to have structured inductions or techniques for doing hypnosis: you can create your own ways of eliciting hypnotic responses in people in a client-centred way that is unique to each person you work with. This first volume will teach you the history of hypnosis, various theories of hypnosis including what I think hypnosis is, it will teach you different ways hypnosis can be evoked and deepened and will teach you how you can use self-hypnosis for yourself and why it can be helpful to teach clients self-hypnosis. You will also learn a selection of

structured inductions, hypno-therapeutic techniques, how to carry changes from within therapy sessions into clients lives and how hypnosis fits into therapy because there is a misconception that hypnotherapy is somehow different from other psychological therapies when in-fact hypnotherapy is just some form of therapy done with hypnosis as an adjunct to that therapy, hypnosis itself isn't a therapy. This book on an introduction to hypnotherapy is the first in a planned series of ten volumes about hypnotherapy. You will also learn about the trance nature of reality, about the pattern matching brain and about responsivity.

Subliminal Therapy is a technique that utilizes hypnotic phenomena for therapeutic purpose without requiring a formal trance induction. The protocol is effective as a sole intervention or as an adjunct to other forms of treatment. In this volume, the reader is introduced to the concepts and applications of Subliminal Therapy and taught its protocol as well This includes establishing identifiable communication with the unconscious domain, uncovering influences that are causing current problems, and resolving those influences. The logically applied protocol of Subliminal Therapy engages unconscious process to uncover the causes of presenting problems, whether manifesting physically, emotionally, intellectually or behaviorally, and then to resolve that influence through re-framing and re-conditioning. The causes of psychogenic problems are usually not consciously recognized; only the resultant symptom - the disability - is apparent. Hypnotherapy Trance Scripts

Hypnotherapy Scripts, 2nd Edition is a straightforward, practical guide for doing Ericksonian hypnotherapy. This book not only explains the rationale for every step in the hypnotherapeutic process, it also contains sample scripts for each step. This edition of Hypnotherapy Scripts guides professionals through the construction of their own hypnotherapy induction and suggestion scripts. Verbatim sample transcripts of various induction and therapeutic suggestion procedures with detailed guidelines for creating one's own hypnotherapeutic inductions and metaphors are included. Recent research and writings on the role of unconscious processes, wellness, and positive psychology have been added to this edition. Also included is a detailed review of the diagnostic trance process, a therapeutic procedure unique to this text.

Hypnotherapy Training

This book describes an entirely new way of conducting hypnotherapeutic interventions - Stephen Gilligan's generative trance. The first generation of trance work, the traditional hypnosis that still holds sway in most places, considers that both the conscious mind and the unconscious mind of the client are, to put it bluntly, idiots. So trance work involves first 'knocking out' the conscious mind and then talking to the unconscious mind like a 2-year old that needs to be told how to behave. Milton Erickson created the second generation of trance work. He approached the unconscious as having creative wisdom and each person as extraordinarily unique. Thus, rather than trying to programme the unconscious with new instructions, Erickson saw trance as an experiential learning state where a person's own creative unconscious could generate healing and transformation. At the same time Erickson, for the most part, carried the same low opinion of the conscious mind. Thus, Ericksonian hypnosis looks to bypass the conscious mind with indirect suggestions and dissociation and depotentiate it with confusion techniques.

Ericksonian Approaches - Second Edition

When used in NLP and hypnotherapy, metaphors have long given insights into the difficulties of people and have shown the

ways in which we can escape or improve. If the stories strike a chord with you, then they also show a way out. These short stories, metaphors and interactive scripts will help you to eliminate negative thoughts and achieve your dreams by allowing you to relax while reading stories that can bring about positive change. Some of the stories will relax you, others will make you think. Some allow you to enter a light feeling of hypnosis. Hypnotherapy and hypnosis have been major users of metaphors to show different approaches to problems and their resolution. Milton Erickson, the grandfather of modern hypnotherapy used metaphors to great effect in resolving problems with his patients. Self hypnosis allows you to enter the areas of your mind where you can become imaginative and optimistic. You can create your dreams and the ways in which you will achieve them. Based on a huge amount of therapeutic work, these short stories, metaphors and interactive scripts can help you to bring about positive changes, eliminate negative thoughts and achieve your dreams.

The knowledge you will gain from this book can be mastered allowing you to be able to confidently hypnotise and therapeutically work with almost anyone using the approach that is right for them as an individual. You will be able to do what I think of as client-centred hypnotherapy. Learn the fundamental principles of the Ericksonian approach, hypnotic language patterns, paradoxical interventions and how to craft healing stories.

Creating Trance and Hypnosis Scripts

Training Trances is about how to therapeutically communicate with the unconscious mind. The authors present their own unique integration of Ericksonian techniques, traditional models of hypnotherapy, and recent research in related areas. Numerous new patterns modeled from the work of Milton H. Erickson, M.D. are clearly explained and demonstrated. The use of trance in training design, to unconsciously install the skills being taught to the participants, is also covered. The book developed from transcripts of a four day workshop, and the design of the book parallels the design chosen for the training itself. Individual exercises or those done in groups of two or three are offered so that the reader may practice the techniques and learn the skills. There are numerous "live" demonstrations, inductions, and double inductions which create for the reader a real "feel" of how hypnosis is done and which are also a rich source for linguistic analysis for the advanced reader. Written with insight and humor, this book's most unique twist is its use of multi-level communication and hypnotic language to create a "training trance" for the readers as they journey through the text. Some hypnotic references are obvious and explicit -- those which are not obvious will create enjoyable "ah-ha!" experiences for the reader as they are discovered.

Spiritual Hypnotherapy Scripts

Spiritual Hypnotherapy Scripts provides access to the quantum field of consciousness, the spiritual realm from which all healing flows. Learn how spiritual hypnotherapy and working directly with the client's higher Self can deepen and expand the healing process. Dr. Holmes-Meredith presents her approach to teaching and working with hypnotherapy with ten Taoist precepts taught through the ancient Taoist text the Tao Te Ching. Also included are interviews with six of her hypnotherapy graduates who share how working with a spiritual approach to hypnotherapy not only supports profound transformation in their clients, but also supports their own on-going healing and evolution of consciousness. These hypnotherapy scripts include empowering and open-ended language patterns and transformational approaches for presenting issues related to the body, mind and spirit. Unlike most published hypnosis scripts, these hypnotherapy scripts use therapeutic processes that allow the hypnotherapist and client to personalize the trance experience by following the client in an interactive way. The client will engage in a direct relationship with his higher Self as an inner resource and guide throughout the trance experience. The fifty-two hypnotherapy scripts and a script for teaching the Emotional Freedom Technique (EFT) are proven approaches Dr. Holmes-Meredith teaches hypnotherapists at HCH Institute and uses in her private practice.
