#### **Financial Reporting and Analysis**

The much anticipated fourth edition of Craig Deegan's Financial Accounting Theory delivers authoritative and completely up to date material with the discussion of both existing theories and newer theories that have surfaced as financial reporting has become more international. This edition includes a new selection of modern 'Accounting Headlines' which provide current examples of organisations and individuals putting accounting theory into practice in both local and global settings. Financial Accounting Theory covers additional topics such as critical perspectives, public sector accounting and fair value. Workflows and processes are presented using enhanced visual charts to help demonstrate how accounting works in practice. Deegan presents the concepts in a clear and straightforward style, while challenging students to think critically about the range of accounting theories. Financial Accounting Theory provides a sound basis for readers contemplating further research and develops habits of analytical reasoning and critical thinking.

The Demo Docs System of instruction replicates the classroom experience by providing more "I get it" moments outside of class. We've talked to tons of POA instructors and our editors have even taken the accounting course (numerous times!) to figure out the following issue in this course that is consistent: & Students understand (or "get it") right after you do a problem in class, but as soon as they leave class, with each passing hour, their ability to do the problems again and complete their homework diminishes to the point of them either having to come to office hours to get help, or they just quit and get behind in the course. & On top of this, you can end up getting behind in the course as well, in order to keep everyone on track. & The Demo Docs system helps to recreate the "I get it" moments outside of class-keeping both you and the students on track.
