The Grants Register 2020 is the most authoritative and comprehensive guide available of postgraduate and professional funding worldwide. It contains international coverage of grants in both English and non-English speaking countries;

information on subject areas, level of study, eligibility and value of awards; and information on over 3,500 awards. Awarding bodies are arranged alphabetically with a full list of awards to allow for comprehensive reading. The Register contains full contact details including telephone, fax, email and websites as well as details of application procedures and closing dates. It is updated annually to ensure accurate information. This thoroughly revised edition contains almost 2,100 brand new awards

Combustion Fundamentals for Waste Incineration

An authoritative guide to key engineering management principles and practices, this book is divided into eight concise domains of engineering management knowledge, which are further broken down into 46 knowledge areas and 210 sub-knowledge areas. This guide covers a wide range of management topics and practices, including market research, product development, organizational leadership and the management of engineering projects and processes. A diverse panel of practicing engineers and subject matter experts from across industry, government and academia, formed a committee of professionals to develop a readable, comprehensive, user-friendly body of knowledge guide. Whether you're a practicing engineer, an engineering manager, or a trainer of engineers, you'll find this easy-to-use guide an indispensable resource.
