A Personal Odyssey

Thomas Sowell's classic analysis of the opposing visions behind today's ethical and ideological disputes. Controversies in politics arise from many sources, but the conflicts that endure for generations or centuries show a remarkably consistent pattern. This revised edition of a classic analyzes the centuries-long debates about the nature of reason, justice, equality, and power. It distinguishes between those with the "constrained" vision, which sees human nature as enduring and self-centered, and the "unconstrained" vision, in which human nature is malleable and perfectible. *A Conflict of Visions* offers a compelling case that these opposing visions are behind the ethical and ideological disputes of yesterday and today.

Basic Economics

In *Wealth, Poverty, and Politics*, Thomas Sowell, one of the foremost conservative public intellectuals in this country, argues that political and ideological struggles have led to dangerous confusion about income inequality in America. Pundits and politically motivated economists trumpet ambiguous statistics and sensational theories while ignoring the true determinant of income inequality: the production of wealth. We cannot properly understand inequality if we focus exclusively on the distribution of wealth and ignore wealth production factors such as geography, demography, and culture. Sowell contends that liberals have a particular interest in misreading the data and chastises them for using income inequality as an

argument for the welfare state. Refuting Thomas Piketty, Paul Krugman, and others on the left, Sowell draws on accurate empirical data to show that the inequality is not nearly as extreme or sensational as we have been led to believe. Transcending partisanship through a careful examination of data, *Wealth, Poverty, and Politics* reveals the truth about the most explosive political issue of our time.

23 Things They Don't Tell You about Capitalism

Sowell leads the reader through the Marxian scheme of ideas, shattering some existing interpretations of Marx which have developed through repetition rather than through scholarship.

Economics 101

DIVSowell presents a devastating critique of the mind-set behind the failed social policies of the past thirty years. Sowell sees what has happened during that time not as a series of isolated mistakes but as a logical consequence of a tainted vision whose defects have led to crises in education, crime, and family dynamics, and to other social pathologies. In this book, he describes how elites—the anointed—have replaced facts and rational thinking with rhetorical assertions, thereby altering the course of our social policy./Div

Understanding and Managing Diversity

Shows how everyone has the capacity to succeed and how most use only a small portion of their talents.

Brainwashed

A Crash Course in the Study of Production and Consumption! Too often, textbooks turn the noteworthy details of economics into tedious discourse that would put even Joseph Stiglitz to sleep. Economics 101 cuts out the boring explanations, and instead provides a hands-on lesson that keeps you engaged as you explore how societies allocate their resources for maximum benefit. From quantitative easing to marginal utility, this primer is packed with hundreds of entertaining tidbits and concepts that you won't be able to get anywhere else. So whether you're looking to master the major principles of finance, or just want to learn more about why money matters, Economics 101 has all the answers--even the ones you didn't know you were looking for.

Multiple-choice Questions for Introduction to Business Management

A diverse approach to understanding and managing diversity. Understanding and Managing Diversity uses applications to clarify the complexity of a diverse workforce, and explains how it can be used as an organizational asset. This text also provides readers with a wide range of expertise—from the perspective of experienced interdisciplinary instructors (business, psychology, economics, theology, law, politics, history, etc.) to practitioners (diversity trainers, corporate managers, etc.). This edition has been substantially updated to reflect the changing diversity issues in today's workplace—including 18 new and 15 revised articles/cases/exercises.

Choosing Diversity: How Charter Schools Promote Diverse Learning Models and Meet the Diverse Needs of Parents and Children

Economic Facts and Fallacies exposes some of the most popular fallacies about economic issues—and does so in a lively manner and without requiring any prior knowledge of economics by the reader. These include many beliefs widely disseminated in the media and by politicians, such as mistaken ideas about urban problems, income differences, male-female economic differences, as well as economics fallacies about academia, about race, and about Third World countries. One of the themes of Economic Facts and Fallacies is that fallacies are not simply

crazy ideas but in fact have a certain plausibility that gives them their staying power-and makes careful examination of their flaws both necessary and important, as well as sometimes humorous. Written in the easy-to-follow style of the author's Basic Economics, this latest book is able to go into greater depth, with real world examples, on specific issues.

30-Second Economics

Looks at a large number of human migrations over a long period of time, and considers the effects of immigration in economic terms

Economic Facts and Fallacies

The greatest barrier to racial equality today is not overt racism, Shelby Steele argues in [Title TK], but white liberals. Under the guise of benevolence, liberals today maintain their position of power over blacks by continuing to cast them as victims in need of saving. This ideology underlies liberal social policies from affirmative action to welfare, which actually exacerbate racial inequality rather than mitigating it. Drawing on empirical data as well as his own personal experience, Steele demonstrates that these policies have not only failed, but have made it impossible to address the problems that plague the modern black

community, and have ensured that black Americans will never be truly equal to their white countrymen, in their own minds or in practice. Forthright and persuasive, [Title TK] offers an unflinching look at the failures of liberalism and a compelling case that a return to conservative principles is the only way forward for African Americans—and for the nation.

Shame

An enlarged edition of Thomas Sowell's brilliant examination of the origins of economic disparities Economic and other outcomes differ vastly among individuals, groups, and nations. Many explanations have been offered for the differences. Some believe that those with less fortunate outcomes are victims of genetics. Others believe that those who are less fortunate are victims of the more fortunate. Discrimination and Disparities gathers a wide array of empirical evidence to challenge the idea that different economic outcomes can be explained by any one factor, be it discrimination, exploitation, or genetics. This revised and enlarged edition also analyzes the human consequences of the prevailing social vision of these disparities and the policies based on that vision--from educational disasters to widespread crime and violence.

The Behavioral Investor

A one-volume introduction to over three decades of the wide-ranging writings of one of America's most respected and cited authors. These selections from the many writings of Thomas Sowell over a period of a half century cover social, economic, cultural, legal, educational, and political issues. The sources range from Dr. Sowell's letters, books, newspaper columns, and articles in both scholarly journals and popular magazines. The topics range from late-talking children to "tax cuts for the rich," baseball, race, war, the role of judges, medical care, and the rhetoric of politicians. These topics are dealt with by sometimes drawing on history, sometimes drawing on economics, and sometimes drawing on a sense of humor. The Thomas Sowell Reader includes essays on: * Social Issues * Economics * Political Issues * Legal Issues * Race and Ethnicity * Educational Issues * Biographical Sketches * Random Thoughts "My hope is that this large selection of my writings will reduce the likelihood that readers will misunderstand what I have said on many controversial issues over the years. Whether the reader will agree with all my conclusions is another question entirely. But disagreements can be productive, while misunderstandings seldom are."--Thomas Sowell

Rise of Tourism on Martha's Vineyard, The

Economics: European Edition is the ideal text for introductory economics, bringing together an international scope of real world examples and economic theory. The text is supported by a number of features to enhance student understanding as

well as supplements to consolidate the learning process.

Power Up Your Mind

"Clear, concise, informative, witty and, believe it or not, entertaining." —Chicago Tribune Finally! A book about economics that won't put you to sleep. In fact, you won't be able to put this bestseller down. In our challenging economic climate, this perennial favorite of students and general readers is more than a good read, it's a necessary investment—with a blessedly sure rate of return. Demystifying buzzwords, laying bare the truths behind oft-quoted numbers, and answering the questions you were always too embarrassed to ask, the breezy *Naked Economics* gives readers the tools they need to engage with pleasure and confidence in the deeply relevant, not so dismal science. This revised and updated edition adds commentary on hot topics, including the current economic crisis, globalization, the economics of information, the intersection of economics and politics, and the history—and future—of the Federal Reserve.

The Vision of the Anointed

A compilation of hundreds of quotations by the controversial conservative spokesperson offers observations on Democrats, dating, environmentalism,

religion, evolution, Reagan, terrorism, television, and hundreds of other topics.

Discrimination and Disparities

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well.

Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for

care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Marxism

A Conflict of Visions

This explosive new book challenges many of the long-prevailing assumptions about blacks, about Jews, about Germans, about slavery, and about education. Plainly written, powerfully reasoned, and backed with a startling array of documented facts, *Black Rednecks and White Liberals* takes on not only the trendy intellectuals

of our times but also such historic interpreters of American life as Alexis de Tocqueville and Frederick Law Olmsted. In a series of long essays, this book presents an in-depth look at key beliefs behind many mistaken and dangerous actions, policies, and trends. It presents eye-opening insights into the historical development of the ghetto culture that is today wrongly seen as a unique black identity - a culture cheered on toward self-destruction by white liberals who consider themselves "friends" of blacks. An essay titled "the Real History of Slavery" presents a jolting re-examination of that tragic institution and the narrow and distorted way it is too often seen today. The reasons for the venomous hatred of Jews, and of other groups like them in countries around the world, are explored in an essay that asks, "Are Jews Generic?" Misconceptions of German history in general, and of the Nazi era in particular, are also re-examined. So too are the inspiring achievements and painful tragedies of black education in the United States. *Black Rednecks and White Liberals* is the capstone of decades of outstanding research and writing on racial and cultural issues by Thomas Sowell.

Migrations And Cultures

An indictment of the American educational system criticizes the fact that the system has discarded the traditional goals of transmitting knowledge and fostering cognitive skills in favor of building self-esteem and promoting social harmony.

Inside American Education

Keynesian Economics, Free Market Capitalism, Monetarism, Game Theory and the Invisible Hand. Sure, you know what they mean. That is, you've certainly heard of them. But do you know enough about these economic theories to join a dinner party debate or dazzle the bar with your financial knowledge? 30 Second Economics takes the top 50 economic theories, and explains them to the general reader in half a minute, using nothing more than two pages, 300 words and one picture. Economics will suddenly seem a lot more fun than the economy, and make a lot more sense, and along the way you'll meet founding fathers of modern economics such as Adam Smith, David Ricardo and Alfred Marshall. From Marxism to Mercantilism, plus everything in between, this is the ultimate 'crash' course in economic theory.

The Thomas Sowell Reader

An updated look at global trade and why it remains as controversial as ever Free trade is always under attack, more than ever in recent years. The imposition of numerous U.S. tariffs in 2018, and the retaliation those tariffs have drawn, has thrust trade issues to the top of the policy agenda. Critics contend that free trade brings economic pain, including plant closings and worker layoffs, and that trade

agreements serve corporate interests, undercut domestic environmental regulations, and erode national sovereignty. Why are global trade and agreements such as the Trans-Pacific Partnership so controversial? Does free trade deserve its bad reputation? In *Free Trade under Fire*, Douglas Irwin sweeps aside the misconceptions that run rampant in the debate over trade and gives readers a clear understanding of the issues involved. In its fifth edition, the book has been updated to address the sweeping new policy developments under the Trump administration and the latest research on the impact of trade.

Applied Economics

This is the gritty story of one man's lifelong education in the school of hard knocks, as his journey took him from Harlem to the Marines, the Ivy League, and a career as a controversial writer, teacher, and economist in government and private industry. It is also the story of the dramatically changing times in which this personal odyssey took place. The vignettes of the people and places that made an impression on Thomas Sowell at various stages of his life range from the poor and the powerless to the mighty and the wealthy, from a home for homeless boys to the White House, as well as ranging across the United States and around the world. It also includes Sowell's startling discovery of his own origins during his teenage years. If the child is father to the man, this memoir shows the characteristics that have become familiar in the public figure known as Thomas Sowell already present

in an obscure little boy born in poverty in the Jim Crow South during the Great Depression and growing up in Harlem. His marching to his own drummer, his disregard of what others say or think, even his battles with editors who attempt to change what he has written, are all there in childhood. More than a story of the life of Sowell himself, this is also a story of the people who gave him their help, their support, and their loyalty, as well as those who demonized him and knifed him in the back. It is a story not just of one life, but of life in general, with all its exhilaration and pain.

Free Trade Under Fire

Eighteen countries. Five shock absorbers. Two bikers. One amazing adventure After their fantastic trip round the world in 2004, fellow actors and bike fanatics Ewan McGregor and Charley Boorman couldn't shake the travel bug. Inspired by their UNICEF visits to Africa, they knew they had to go back and experience this extraordinary continent in more depth. And so they set off on their 15,000-mile journey with two new BMWs loaded up for the trip. Their route took them from John O'Groats at the northernmost tip of Scotland to Cape Agulhas on the southernmost tip of South Africa. Along the way they rode some of the toughest terrain in the world -- and met some of the friendliest people. They rode their bikes right up to the pyramids in Egypt and visited Luke Skywalker's house in Tunisia. They met people who had triumphed over terrifying experiences -- former childhood soldiers

in Uganda and children living amidst the minefields of Ethiopia. They had a close encounter with a family of gorillas in Rwanda and were nearly trampled by a herd of elephants in Botswana. Riding through spectacular scenery, often in extreme temperatures, Ewan and Charley faced their hardest challenges yet. With their trademark humor and honesty they tell their story -- the drama, the dangers and sheer exhilaration of riding together again, through a continent filled with magic and wonder.

Wealth, Poverty and Politics

Brainwashed is the explosive exposé of the leftist agenda at work in today's colleges, revealed by firebrand Ben Shapiro, a recent UCLA graduate, syndicated columnist, and one of today's most exciting new conservative voices, who's been on the front lines of the battle for America's young minds. This book proves once and for all that so-called higher education continues to sink lower and lower into the depths of liberal madness as close-minded professors turn their students into socialists, atheists, race-baiters, and sex-crazed narcissists. "Ben Shapiro's writing is smart, informative, and incisive. He is wise beyond his years without losing the refreshing fearlessness of youth." —Ann Coulter, best-selling author of *High Crimes and Misdemeanors*, *Slander*, and *Treason* "In *Brainwashed*, Shapiro tells the truth that universities are forums of left-liberal indoctrination, where dissent is discouraged and penalized, with more restrictions on free speech rather any other

part of American society. Parents who are paying for tuition might want to take note, and see what their hard-earned money is paying for." ?Michael Barone, U.S. News & World report and co-author of The Almanac of American Politics "Welcome to P.C. 101. In this trenchant insider's expose, Ben Shapiro bears witness to the modern American campus freak show. You'll get up close and personal with the Marxist loons, moral relativists, multicultural zealots, and American-haters who are corrupting young minds. Brainwashed reveals the ignominious lows to which higher education has sunk. Get deprogrammed. Buy this book!" ?Michelle Malkin, nationally syndicated columnist and author of Invasion "Sharp thinking, tight writing, crazy-but-true stories: Ben Shapiro sees campus brainwashing and raises a national protest. This is a good book to give both freshmen who need warning and voters/alumni who need to take action." ?Dr. Marvin Olasky, University of Texas professor and editor-in-chief of World magazine "A worthy successor to God and Man at Yale and Harvard Hates America in exploring the bely of the academic beast." ?David Horowitz, founder of Students for Academic Freedom and author of Radical Son and Left Illusions "What Animal House did for the toga party, Brainwashed should do for American resistance to campus radicalism." ?Rusty Humphries, nationally syndicated radio talk show host

Quest for Love

In Choosing Diversity, Lance Izumi profiles 13 different charter schools that are as

different as one could imagine. Whether the school has a tech or performing arts focus, is located in a rural or urban area, or serves students from difficult environments or who have special needs, each unique school is meeting the needs of its students.

Economics for the Many

The bestselling citizen's guide to economics Basic Economics is a citizen's guide to economics, written for those who want to understand how the economy works but have no interest in jargon or equations. Bestselling economist Thomas Sowell explains the general principles underlying different economic systems: capitalist, socialist, feudal, and so on. In readable language, he shows how to critique economic policies in terms of the incentives they create, rather than the goals they proclaim. With clear explanations of the entire field, from rent control and the rise and fall of businesses to the international balance of payments, this is the first book for anyone who wishes to understand how the economy functions. This fifth edition includes a new chapter explaining the reasons for large differences of wealth and income between nations. Drawing on lively examples from around the world and from centuries of history, Sowell explains basic economic principles for the general public in plain English.

Transforming the Workforce for Children Birth Through Age 8

Inspiring stories of couples who discovered love in God's timing through the lost art of courtship.

On Classical Economics

Our economy is rigged in favour of a wealthy elite. We need a new approach: an economics for the many. Big challenges lie ahead for our society: the rise of automation and the threat of catastrophic climate change. But so, too, do the huge possibilities presented by new technology and better ways of organising our economy in the wake of neoliberalism's failure. With the election of Jeremy Corbyn as Labour leader, and the extraordinary turnaround in Labour's fortunes in the 2017 election, we have a real opportunity to build an economy in Britain that is radically fairer, radically more democratic, and radically more sustainable. But we need the right ideas and strategies if we're going to get there. Economics for the Many, edited and with an introduction by Shadow Chancellor of the Exchequer John McDonnell, features contributions from the participants in his New Economics conferences, including Barry Gardiner, Ann Pettifor, Prem Sikka, and Guy Standing. It covers topics from housing, public ownership, and fairer international trading systems to industrial policy for the twenty-first century and how to tackle tax

avoidance and regional imbalances. Together, the essays in this volume lay out a vision for a new economics, one that works for the many, not the few.

Black Rednecks and White Liberals

Intellectuals and Race is a radical book in the original sense of one that goes to the root of the problem. The role of intellectuals in racial strife is explored in an international context that puts the American experience in a wholly new light. The views of individual intellectuals have spanned the spectrum, but the views of intellectuals as a whole have tended to cluster. Indeed, these views have clustered at one end of the spectrum in the early twentieth century and then clustered at the opposite end of the spectrum in the late twentieth century. Moreover, these radically different views of race in these two eras were held by intellectuals whose views on other issues were very similar in both eras. Intellectuals and Race is not, however, a book about history, even though it has much historical evidence, as well as demographic, geographic, economic and statistical evidence-- all of it directed toward testing the underlying assumptions about race that have prevailed at times among intellectuals in general, and especially intellectuals at the highest levels. Nor is this simply a theoretical exercise. The impact of intellectuals' ideas and crusades on the larger society, both past and present, is the ultimate concern. These ideas and crusades have ranged widely from racial theories of intelligence to eugenics to "social justice" and multiculturalism. In addition to in-depth

examinations of these and other issues, *Intellectuals and Race* explores the incentives, the visions and the rationales that drive intellectuals at the highest levels to conclusions that have often turned out to be counterproductive and even disastrous, not only for particular racial or ethnic groups, but for societies as a whole.

Naked Economics: Undressing the Dismal Science (Fully Revised and Updated)

A work in the Anglo-American and natural law tradition in the tradition which provided the foundations for the U. S. Constitution, which provide the premises for full fledged private property, free enterprise, free trade and individual responsibility. To put it even more briefly, in that great tradition of limited government and free men.

Common Sense Economics

This revised edition of *Applied Economics* is about fifty percent larger than the first edition. It now includes a chapter on the economics of immigration and new sections of other chapters on such topics as the “creative” financing of home-buying that led to the current “subprime” mortgage crisis, the economics of organ

transplants, and the political and economic incentives that lead to money earmarked for highways being diverted to mass transit and to a general neglect of infrastructure. On these and other topics, its examples are drawn from around the world. Much material in the first edition has been updated and supplemented. The revised and enlarged edition of Applied Economics retains the easy readability of the first edition, even for people with no prior knowledge of economics.

If Democrats Had Any Brains, They'd Be Republicans

This book is about the great moral issues underlying many of the headline-making political controversies of our times. It is not a comforting book but a book about disturbing and dangerous trends. The Quest for Cosmic Justice shows how confused conceptions of justice end up promoting injustice, how confused conceptions of equality end up promoting inequality, and how the tyranny of social visions prevents many people from confronting the actual consequences of their own beliefs and policies. Those consequences include the steady and dangerous erosion of fundamental principles of freedom -- amounting to a quiet repeal of the American revolution. The Quest for Cosmic Justice is the summation of a lifetime of study and thought about where we as a society are headed -- and why we need to change course before we do irretrievable damage.

The Quest for Cosmic Justice

The fully revised and updated third edition of the classic Common Sense Economics.

Intellectuals and Race

With over a million copies sold, *Economics in One Lesson* is an essential guide to the basics of economic theory. A fundamental influence on modern libertarianism, Hazlitt defends capitalism and the free market from economic myths that persist to this day. Considered among the leading economic thinkers of the “Austrian School,” which includes Carl Menger, Ludwig von Mises, Friedrich (F.A.) Hayek, and others, Henry Hazlitt (1894-1993), was a libertarian philosopher, an economist, and a journalist. He was the founding vice-president of the Foundation for Economic Education and an early editor of *The Freeman* magazine, an influential libertarian publication. Hazlitt wrote *Economics in One Lesson*, his seminal work, in 1946. Concise and instructive, it is also deceptively prescient and far-reaching in its efforts to dissemble economic fallacies that are so prevalent they have almost become a new orthodoxy. Economic commentators across the political spectrum have credited Hazlitt with foreseeing the collapse of the global economy which occurred more than 50 years after the initial publication of *Economics in One*

Lesson. Hazlitt's focus on non-governmental solutions, strong — and strongly reasoned — anti-deficit position, and general emphasis on free markets, economic liberty of individuals, and the dangers of government intervention make Economics in One Lesson every bit as relevant and valuable today as it has been since publication.

Economics in One Lesson

A reexamination of classical economic theory and methods, by a senior economist of international stature Thomas Sowell's many writings on the history of economic thought have appeared in a number of scholarly journals and books, and these writings have been praised, reprinted, and translated in various countries around the world. The classical era in the history of economics is an important part of the history of ideas in general, and its implications reach beyond the bounds of the economics profession. On Classical Economics is a book from which students can learn both history and economics. It is not simply a Cook's tour of colorful personalities of the past but a study of how certain economic concepts and tools of analysis arose, and how their implications were revealed during the controversies that followed. In addition to a general understanding of classical macroeconomics and microeconomics, this book offers special insight into the neglected pioneering work of Sismondi--and why it was neglected--and a detailed look at John Stuart Mill's enigmatic role in the development of economics and the mysteries of

Marxian economics. Clear, engaging, and very readable, without being either cute or condescending, On Classical Economics can enable a course on the history of economic thought to make a contribution to students' understanding of economics in general--whether in price theory, monetary theory, or international trade. In short, it is a book about analysis as well as history.

"Trickle Down Theory" and "Tax Cuts for the Rich"

INTERNATIONAL BESTSELLER "For anyone who wants to understand capitalism not as economists or politicians have pictured it but as it actually operates, this book will be invaluable."-Observer (UK) If you've wondered how we did not see the economic collapse coming, Ha-Joon Chang knows the answer: We didn't ask what they didn't tell us about capitalism. This is a lighthearted book with a serious purpose: to question the assumptions behind the dogma and sheer hype that the dominant school of neoliberal economists-the apostles of the freemarket-have spun since the Age of Reagan. Chang, the author of the international bestseller Bad Samaritans, is one of the world's most respected economists, a voice of sanity-and wit-in the tradition of John Kenneth Galbraith and Joseph Stiglitz. 23 Things They Don't Tell You About Capitalism equips readers with an understanding of how global capitalism works-and doesn't. In his final chapter, "How to Rebuild the World," Chang offers a vision of how we can shape capitalism to humane ends, instead of becoming slaves of the market.

Long Way Down

Now known as a resort community and vacation destination, Martha's Vineyard was once a simple fishing and whaling community. From the popularity of the Methodist Campground, founded in 1835, the Vineyard soon blossomed into a summer vacation mecca, welcoming visitors to its quaint villages and scenic seashores. As whaling lost its economic dominance, tourism became the catalyst for a revived prosperity on the Vineyard. President Grant's visit to the Vineyard in 1874 drew national attention and marked the beginning of several presidential visits to the island. By 1900, Oak Bluffs had developed an amusement park atmosphere with the iconic Flying Horses, toboggan slide and grand seaside hotels. Join local historian Tom Dresser as he reveals the island's transformation into a premier tourist destination.

Basic Economics

This classic work by the distinguished economist traces the history of nine American ethnic groups -- the Irish, Germans, Jews, Italians, Chinese, African-Americans, Puerto Ricans, and Mexicans.

Ethnic America

This essay unscrambles gross misconceptions that have made rational debates about tax policies virtually impossible for decades.
