Leviathan or The Matter, Forme and Power of a Common-Wealth Ecclesiastical and Civil is a book written by an English materialist philosopher Thomas Hobbes about problems of the state existence and development. Leviathan is a name of a Bible monster, a symbol of nature powers that belittles a man. Hobbes uses this character to describe a powerful state (“God of the death”). He starts with a postulate about a natural human state (“the war of all against all”) and develops the idea “man is a wolf to a man”. When people stay for a long time in the position of an inevitable extermination they give a part of their natural rights, for the sake of their lives and general peace, according to an unspoken agreement to someone who is obliged to maintain a free usage of the rest of their rights – to the state. The state, a union of people, where the will of a single one (the state) is compulsory for everybody, has a task to regulate the relations between all the people. The book was banned several times in England and Russia.

originally published. This pamphlet by the German philosophers Karl Marx and Friedrich Engels, published in 1848 as revolutions were erupting across Europe, discusses class struggles and the problems of a capitalist society. After being exiled to London, Marx published the first part of *Das Kapital*, a theoretical text that argues that capitalism will create greater and greater division in wealth and welfare and ultimately be replaced by a system of common ownership of the means of production. After Marx's death, Engels completed and published the second and third parts from his colleague's notes. The Knickerbocker Classics bring together the essential works of classic authors from around the world in stunning editions to be collected and enjoyed.
