that can be used to study in places where Internet access may not be available. CCNA Security Lab Portfolio is that resource. Drawn directly from the online curriculum, it covers every lab presented in this course, addressing all these areas of network security: " Modern network security threats " Securing network devices " Authentication, authorization and accounting " Implementing firewall technologies " Implementing intrusion prevention " Securing LANs " Cryptography " Implementing VPNs " Putting it all together CCNA Security Lab Portfolio gives students new flexibility to study these hands-on labs offline, highlight key points, and take handwritten notes. All topics are correlated directly to online web pages, helping you easily switch between offline and online content. Additional notes pages will be included between each lab for use as a notebook in class. A separate Answer Key is available in the Cisco Academy Connection area of Cisco's web site.

Critical Thinking and American Government contains 41 critical thinking exercises that use a wide variety sources to actively engage students in understanding and thinking critically about American government and politics. These sources include court decisions, the Federalist Papers, legislation, public opinion polls, elections results, apportionment and population tables, data on topics such as African-American representation in Congress, among many others. The critical thinking exercises require students to interpret and analyze data, discover basic relationships among variables, read critically, summarize information accurately, and formulate generalizations and hypotheses. The exercises are based on the scholarship of teaching and learning. Each exercises contains clear and discrete student learning objectives which facilitate the measurement and assessment of student outcomes and learning.
