Advance praise for *Special Intentions* “*Special Intentions* reminds us of the importance of not simply praying for what we need, but for what others need. Jesus taught us to ask God for our daily bread, but he also asked us to love one another. Commending our friends and families (and co-workers, neighbors, acquaintances and even those who bother us) to the care of God is a key aspect of that love, and an important element of the Christian tradition. “Claire Coleman's sensitive new work will help readers to more fully enter into this rich stream of the spiritual life.” —James Martin S.J, author of *My Life with the Saints* “If you've ever offered up a simple ‘God help him’ at the sight of someone less fortunate, then this book will resonate with your innate sense that prayers have power. Claire Coleman offers a graceful, easy way to benefit others with her beautifully written portraits of those in need. Take her advice, say a prayer for a stranger and make the world a better place.” —Patricia Sheridan, Assistant Editor/Features, *Pittsburgh Post-Gazette* “While *Special Intentions* is a

beautiful meditative book for the person alone in prayer before God, it likely also will be will be an inspiration for those in prayer groups, and friends who come together to talk about their life's journeys.”

—Dianne M. Traflet, J.D., S.T.D., Associate Dean, Immaculate Conception Seminary School of Theology, Seton Hall University “Prayer is a personal experience, but sometimes we need a little reminder. Claire Coleman's Special Intentions is the perfect book to keep close at hand and close to the heart to reference, to inspire, and to share with others.”

—Amelia Grey, author of twenty-three books “[The] listings of special intentions are so global and yet personal, so ordinary and yet profound.” —Sr. Joan Noreen, OLME, co-founder and director of Our Lady's Missionaries of the Eucharist Host, Eucharistic Journey, Eternal World Television, (EWT) Network “Ms. Coleman reminds us that every one of us is, for very different reasons, in need of prayers.... Her ability to lead us to pray for someone we suddenly notice, think about, and then care about—someone who we don't even know — is truly a gift. —Dr. Sharon Latchaw Hirsh, president, Rosemont College, Rosemont, Pennsylvania

## **Teacher's Manual for the Pathway to Reading**

Written by a manufacturing professional with extensive worldwide experience, this unique and complete guidebook places emphasis on teaching beginners and advanced planners how to process gears, and will enable manufacturing engineers

familiar with machine shop practice to be specialists in the gear manufacturing field. The first few chapters are devoted to common gear nomenclature and analysis of processing of six typical gears, including explanations of the logic and reasoning for every sequence of operation. Subsequent chapters thoroughly describe production, selection of materials, heat treatment, plating, methods of cutting, hobbing, shaping, and grinding. Gear designers and entry-level manufacturing and processing engineers in the machine shop field will find this reference extremely helpful and valuable.

Seven decades after World War II, we now know that the margin between Allied victory and defeat was often narrower than many realized. The decisive actions of leaders, generals and war heroes have been well documented, but less well known are the

technological developments that made victory possible and laid the groundwork for postwar progress. Based on more than ten years of research, this book describes how American airmen became the best-outfitted aviators of the war, tracing the development of virtually every piece of personal equipment used by United States air forces. Drawing on original sources including formerly classified documents, the author details the myriad types of respirator equipment, parachutes, body armor, pressure suits and other flying and survival gear that were instrumental in making U.S. pilots and air crews effective. Personal anecdotes bring to life the design and testing of combat flight equipment. More than 160 photographs are included, most published here for the first time.
