This revolutionary method for connecting with customers provides readers with the ultimate competitive advantage, revealing the secret for helping their customers understand the compelling benefits of using their products, ideas, or services. Whether you are the marketing director of a multibillion dollar company, the owner of a small business, a politician running for office, or the lead singer of a rock band, Building a StoryBrand will forever transform the way you talk about who you are, what you do, and the unique value you bring to your customers.

The Mackay MBA of Selling in the Real World

2020 Book Excellence Award Winner How any leader can deliver business-changing innovation now. Any leader in any size company, no matter the size or sector, feels the pressure to innovate, find new ideas and business models, and create enduring customer value. There is no one formula or set process to find and execute the ideas that achieve these goals; customers set moving targets, shareholders are unforgiving and demanding, and society expects companies to care about much more than the bottom line. The fast and furious forces of change stimulated by technology, demographics, lifestyles, and economic, environmental, political and regulatory impacts -- or any number of these in combination - are easy to see. They are easy to talk about. They are easy to intellectualize. The problem? The answers are hard to execute and require nuanced combinations of leadership, skills, strategy and tactics. On top of that, innovation has moved from an abstraction that will matter at some distant date to a front-and-center deliverable that must show evidence of impact in the space of the calendar quarter. In the stories, tools, techniques and advice inside The Change Maker's Playbook, leaders will find tangible steps to find and safeguard the plans that will deliver the sustainable business-changing impacts - new customers, new relationships, new sources of value and growth— their businesses need. Separated from the pack of academic and consultant innovation theories, Radin's approach stems from her own experience sitting in the innovation hot seat at some of the world's most demanding companies and is bolstered by interviews with 50 corporate executives, founders and startup investors representing media, e-commerce, payments, healthcare, government, professional services, and not-for-profit sectors. The book walks readers through Radin's adaptive, 9-part framework, engaging them in ready-to-apply techniques. Her work shows leaders how to find the big ideas that will meaningfully address customer needs, take the insight from idea through

implementation in a way that delivers in the short and long-term for the organization, and lead effectively through the obstacles that tend to derail or diminish innovation. Three phases – Seeking, Seeding and Scaling – organize the framework within an intuitive, logical and useable format, with concrete actions outlined every step of the way. The answer to the dilemma every business faces today is that innovation is exhilarating, rewarding and even fun when it is approached as a unique challenge, but it can also be polarizing, unpredictable, and scary. Success requires that leaders rethink how they lead innovation. Leaders know they must set aside preconceived notions of what works, and look to those who have already walked in their shoes. This is why The Change Maker's Playbook was written, and why it will become an ongoing resource for any innovation leader.

Small Investor Playbook

This book offers the small investor unique assistance that is not found in other publications offering investment advice. The small investor is, in effect, "competing" with professional money managers, who are often on the opposite side of a trade. If a stock is becoming cheaper because institutions (the mutual funds, hedge funds, etc.) are net sellers, should you, the individual, buy? The professionals have access to corporate managements, employ or have access to paid staffs of analysts, are trained to read a company's financial statements, and actively participate in company conference calls. In short, this is still an uneven playing field, even though SEC Regulation FD (for fair disclosure) has mandated the dissemination of material information in a more equitable fashion. This book is comprised of three sections. Part One describes the major institutional investor groups and the deep resources at their disposal. Part Two illustrates the tools available to small investors that can create a more level playing field. Access to company-sponsored conference calls and web casts are examples that are open to individual, as well as professional investors, but many either are unaware of these tools or fail to avail themselves of these opportunities. The main section of the book is an outline of 24 key industry groups that comprise the S and P 500; the

salient metrics and terms; the valuation methods that investors use; most common questions asked on conference calls; and what motivates pros to buy or sell the stocks. Why are some technology stocks often valued as a multiple of sales when most industries are measured by their price/earnings (P/E) multiple? What is the appropriate price/cash flow multiple for industries that are measured by that metric? Why do analysts scrutinize a retailer's same-store sales and the semiconductor industry's book-to-bill ratio? These are among the many issues that are crucial to successfully investing in individual stocks. Understanding how pros judge companies and value their stocks will enable people to make better investment decisions and, hopefully, realize greater returns on their stock portfolios. A good introduction to stock market investing, coming at the perfect time. 2014 will be a challenging year and readers of Mark Mandel's new book will be ready. --John Rubino, author of Clean Money: Picking Winners in the Green Tech Boom

Start closing sales like top producers! Have you ever found yourself at a loss for what to say when the gatekeeper asks you what your call is about? Have your palms ever sweated when the decision maker shuts you down with: "I wouldn't be interested"? Has your heart taken a fast dive into your stomach when, at the start of your presentation, your prospect tells you that they've thought about it and are just going to pass? If you're in sales, then the question isn't "Have you ever felt this way?", but rather, "How often do you feel this way? Are you finally ready to learn how to confidently and effectively overcome these objections, stalls, and blow-offs? If so, Power Phone Scripts was written for you! Unlike other books on sales that tell you what you should do (like build value - hard to do when the prospect is hanging up on you!), Power Phone Scripts provides word-for-word scripts, phrases, questions, and comebacks that you can use on your very next call. Learn to overcome resistance, get through to the decision maker, and then, once you have him or her on the phone, make an instant connection and earn the right to have a meaningful conversation. You'll be equipped with proven questions, conversation starters, and techniques to learn whether or not they are even right for your product or service, and, if they aren't, who else in their company or another department might be. Power Phone Scripts is the sales manual you've been looking for: over 500 proven, current, and non-salesy phrases, rebuttals, questions, and conversation openers that will instantly make you sound more confident - just like the top producing sales pros do right now. Gone will be your call reluctance; gone will be your fear of calling prospects back for presentations and demos; gone will be the fear of asking for the sale at the end of your pitch! This practical guide is filled with effective scripts for prospecting, emailing, voice mails, closes, and tons of rebuttals to recurring objections you get like: "It costs too much" "We already have a vendor for that" "I'm going to need to think about it" "I need to talk to the boss or committee" and so many others... More than just phone scripts, this book provides practical, comprehensive guidance that every inside sales rep needs. Conquer concerns, provide answers, motivate action, and be the conduit between your prospect's problems and your solution. Actionable, fun, and designed to work within the current sales environment, this invaluable guide is your ticket to the top of the leader board. With Power Phone Scripts, you will never be at a loss of what to say to a prospect or client. Communication is everything in

sales, and being on top of your game is no longer enough when top producers are playing a different game altogether. You cannot achieve winning stats if you're not even on the field. If you're ready to join the big league, Power Phone Scripts is the playbook you need to win at inside sales.

Passion Capital

An enchanting first novel about love, madness, and Kenny G. A New York Times bestseller, *The Silver Linings Playbook* was adapted into the Oscar-winning movie starring Bradley Cooper and Jennifer Lawrence. It tells the riotous and poignant story of how one man regains his memory and comes to terms with the magnitude of his wife's betrayal. During the years he spends in a neural health facility, Pat Peoples formulates a theory about silver linings: he believes his life is a movie produced by God, his mission is to become physically fit and emotionally supportive, and his happy ending will be the return of his estranged wife, Nikki. When Pat goes to live with his parents, everything seems changed: no one will talk to him about Nikki; his old friends are saddled with families; the Philadelphia Eagles keep losing, making his father moody; and his new therapist seems to be recommending adultery as a form of therapy. When Pat meets the tragically widowed and clinically depressed Tiffany, she offers to act as a liaison between him and his wife, if only he will give up watching football, agree to perform in this year's Dance Away Depression competition, and promise not to tell anyone about their "contract." All the while, Pat keeps searching for his silver lining. In this brilliantly written debut novel, Matthew Quick takes us inside Pat's mind, deftly showing us the world from his distorted yet endearing perspective. The result is a touching and funny story that helps us look at both depression and love in a wonderfully refreshing way.

EntreLeadership

Silicon Valley visionary John Chambers shares the lessons that transformed a dyslexic kid from West Virginia into one of the world's best business leaders and turned a simple router company into a global tech titan. When Chambers joined Cisco in 1991, it was a company with 400 employees, a single product, and about \$70 million in revenue. When he stepped down as CEO in 2015, he left a \$47 billion tech giant that was the backbone of the internet and a leader in areas from cybersecurity to data center convergence. Along the way, he had acquired 180 companies and turned more than 10,000 employees into millionaires. Widely recognized as an innovator, an industry leader, and one of the world's best CEOs,

Chambers has outlasted and outmaneuvered practically every rival that ever tried to take Cisco on--Nortel, Lucent, Alcatel, IBM, Dell, and Hewlett-Packard, to name a few. Now Chambers is sharing his unique strategies for winning in a digital world. From his early lessons and struggles with dyslexia in West Virginia to his bold bets and battles with some of the biggest names in tech, Chambers gives readers a playbook on how to act before the market shifts, tap customers for strategy, partner for growth, build teams, and disrupt themselves. He also adapted those lessons to transform government, helping global leaders like French President Emmanuel Macron and Indian Prime Minister Narendra Modi to create new models for growth. As CEO of JC2 Ventures, he's now investing in a new generation of game-changing startups by helping founders become great leaders and scale their companies. *Connecting the Dots* is destined to become a business classic, providing hard-won insights and critical tools to thrive during the accelerating disruption of the digital age.

The Silver Linings Playbook

What's the secret to sales success? If you're like most business leaders, you'd say it's fundamentally about relationships--and you'd be wrong. The best salespeople don't just build relationships with customers. They challenge them. The need to understand what top-performing reps are doing that their average performing colleagues are not drove Matthew Dixon, Brent Adamson, and their colleagues at Corporate Executive Board to investigate the skills, behaviors, knowledge, and attitudes that matter most for high performance. And what they discovered may be the biggest shock to conventional sales wisdom in decades. Based on an exhaustive study of thousands of sales reps across multiple industries and geographies, *The Challenger Sale* argues that classic relationship building is a losing approach, especially when it comes to selling complex, large-scale business-to-business solutions. The authors' study found that every sales rep in the world falls into one of five distinct profiles, and while all of these types of reps can deliver average sales performance, only one--the Challenger--delivers consistently high performance. Instead of bludgeoning customers with endless facts and features about their company and products, Challengers approach customers with unique insights about how they can save or make money. They tailor their sales message to the customer's specific needs and objectives. Rather than acquiescing to the customer's every demand or objection, they are assertive, pushing back when necessary and taking control of the sale. The things that make Challengers unique are replicable and teachable to the average sales rep. Once you understand how to identify the Challengers in your organization, you can model their approach and embed it throughout your sales force. The authors explain how almost any average-performing rep, once equipped with the right tools, can successfully reframe customers' expectations and deliver a distinctive purchase experience that drives higher levels of customer loyalty and, ultimately, greater growth.

Harness "Code Halos" to gain competitive advantage in the digital era Amazon beating Borders, Netflix beating Blockbuster, Apple beating Kodak, and the rise of companies like Google, LinkedIn, and Pandora are not isolated or random events. Today's outliers in revenue growth and value creation are winning with a new set of rules. They are dominating by managing the information that surrounds people, organizations, processes, and products—what authors Malcolm Frank, Paul Roehrig, and Ben Pring call Code Halos. This is far beyond "Big Data" and analytics. Code Halos spark new commercial models that can dramatically flip market dominance from industry stalwarts to challengers. In this new book, the authors show leaders how digital innovators and traditional companies can build Code Halo solutions to drive success. The book: Examines the explosion of digital information that now surrounds us and describes the profound impact this is having on individuals, corporations, and societies; Shows how the Crossroads Model can help anticipate and navigate this market shift; Provides examples of traditional firms already harnessing the power of Code Halos including GE's "Brilliant Machines," Disney's theme park "Magic Band," and Allstate's mobile devices and analytics that transform auto insurance. With reasoned insight, new data, real-world cases, and practical guidance, Code Halos shows seasoned executives, entrepreneurs, students, line-of-business owners, and technology leaders how to master the new rules of the Code Halo economy.

Nuclear Verdicts

This is the first book ever written for the defense on how to avoid runaway jury verdicts. I wrote this book because I care about fairness. I believe everyone has the right to a fair trial, not just plaintiff lawyers and their clients. Defendants are entitled to have a jury decide their case without being stirred with passion and bias by creative plaintiff lawyers. This is the defense "playbook" for justice. You will learn trial techniques to even the playing field for defendants seeking a fair trial. Every aspect of a civil jury trial will be covered, from voir dire to opening statements to witnesses and finally closing arguments. There is a formula for defeating plaintiff attorneys' deceptive tactics and psychological gamesmanship, and you will learn it. While full of 30 years of trial victories and personal experiences, this is a "how to" book. How to defend at trial. How to beat plaintiff attorneys at their own game. How to win. It is time to bring an end to the epidemic of nuclear verdicts across our country. It is time for you to take back justice for all! **NUCLEAR VERDICTS MUST BE STOPPED! YOU CAN STOP THEM. RESPONSIBILITY.** In every jury trial, accepting responsibility is not only the right thing to do, it is the most important thing you will do, no exceptions. Own what you did in every single jury trial, no excuses. **REASONABLENESS.** Be the most reasonable person in the courtroom. Do not take the typical defense approach of fighting every little thing. Show the jury you care, and they will return a verdict that is fair and just for all. **COMMON SENSE.** The ultimate equalizer in any case is common sense. It allows the jury to come to a conclusion that is fair and reasonable. You must go beyond the evidence and the law, and help the jury apply their common sense for a righteous verdict.

Game Plan

The book that sparked a marketing revolution. "This is a subversive book. It says that the marketer is not--and ought not to be--at the center of successful marketing. The customer should be. Are you ready for that?" --From the Foreword by Malcolm Gladwell, author of *The Tipping Point*. Counter to traditional marketing wisdom, which tries to count, measure, and manipulate the spread of information, Seth Godin argues that the information can spread most effectively from customer to customer, rather than from business to customer. Godin calls this powerful customer-to-customer dialogue the ideavirus, and cheerfully eggs marketers on to create an environment where their ideas can replicate and spread. In lively detail, Godin looks at the ways companies such as PayPal, Hotmail, GeoCities, even Volkswagen have successfully launched ideaviruses. He offers a "recipe" for creating your own ideavirus, identifies the key factors in the successful spread of an ideavirus (powerful sneezers, hives, a clear vector, a smooth, friction-free transmission), and shows how any business, large or small, can use ideavirus marketing to succeed in a world that just doesn't want to hear it anymore from the traditional marketers.

Social Selling Mastery provides a bridge across the skills gap, with essential guidance on selling to the modern buyer.

Connecting the Dots

Change is coming to insurance. The tradition-bound P&C industry is on the cusp of the most radical change since the invention of the automobile. And leaders are unprepared for the size, scale, and speed of what's to come from the wave of millennials, new technology, and venture capital funding coming our way. Insurance has been largely immune to upheavals for reasons that startups do not comprehend. Brand recognition, reams of customer data, legal contracts and regulation all make insurance much harder to conquer for insurtech startups. But this time is truly different. Forces have been unleashed that will upend the industry sooner than you think. Collaborate or compete? Start small or go big? Pure tech play or MGA? The End of Insurance As We Know It bridges the divide between the traditional players, startups, and investors to show the areas where opportunities for disruption are ripe and what technologies you need to know about to stay

Code Halos

When gruff and intimidating security consultant Max Stillman appears without warning in the San Francisco office of McClaren Life and Casualty and begins asking questions and scrutinizing files, the employees can't help wondering just

which of them he's been hired to investigate. The first to find out is young data analyst John Walker when Stillman's mysterious investigation leads out of town, he announces he's taking Walker with him. Walker has been picked because a colleague with whom he once had a love affair has disappeared after paying a very large death benefit to an impostor. Since Walker knew her intimately, Stillman believes he's likely to be useful in finding and convicting her. But because he knows her so well, Walker is convinced that she is innocent, and that he must join the pursuit so that he can defend her. These conflicting purposes unite Walker and Stillman in an urgent search that propels them across the country and into unexpected dangers. The trail ends in a deceptively peaceful corner of the New Hampshire countryside, where they find themselves trapped by a deadly conspiracy that's much bigger, older, and more evil than they could ever have imagined. Martin Cruz Smith declared a previous Perry novel as beautifully crafted as a good automatic weapon. In *Death Benefits*, Perry gives us another stunning suspense story with writing that is, as the *Los Angeles Times* said, as sharp as a sushi knife.
