Norman Hall's Corrections Officer Exam Preparation Book

"Essentials of Correctional Nursing is the first new and comprehensive text about this growing field to be published in the last decade. Fortunately, the editors have done a great job in all respects. This book should be required reading for all medical practitioners and administrators working in jails or prisons. It certainly belongs on the shelf of every nurse, physician, ancillary healthcare professional and corrections administrator."--Corhealth (The Newsletter of the American Correctional Health Services Association) "I highly recommend Essentials of Correctional Nursing, by Lorry Schoenly, PhD, RN, CCHP-RN and Catherine M. Knox, MN, RN, CCHP-RN, editors. This long-awaited book, dedicated to the specialty of correctional nursing, is not just a good read, it is one of those books that stays on your desk and may never make it to the bookshelf."--American Jails "Correctional nursing has minimal published texts to support, educate, and provide ongoing best practices in this specialty. Schoenly and Knox have successfully met those needs with Essentials of Correctional Nursing."--Journal of Correctional Health Care Nurses have been

described as the backbone of correctional health care. Yet the complex challenges of caring for this disenfranchised population are many. Ethical dilemmas around issues of patient privacy and self-determination abound, and the ability to adhere to the central tenet of nursing, the concept of caring, is often compromised. *Essentials of Correctional Nursing* supports correctional nurses by providing a comprehensive body of current, evidence-based knowledge about the best practices to deliver optimal nursing care to this population. It describes how nurses can apply their knowledge and skills to assess the full range of health conditions presented by incarcerated individuals and determine the urgency and priority of requisite care. The book describes the unique health needs and corresponding care for juveniles, women, and individuals at the end of life. Chapters are devoted to nursing care for patients with chronic disease, infectious disease, mental illness, or pain, or who are in withdrawal from drugs or alcohol. Chapters addressing health screening, medical emergencies, sick call, and dental care describe how nurses identify, respond to, and manage these health care concerns in the correctional setting. The *Essentials of Correctional Nursing* was written and reviewed by experienced correctional nurses with thousands of hours of experience. American Nurses Association standards are woven throughout the text, which provide the information needed by nurses studying for certification exams in correctional nursing. The text will also be of value to nurses working in such settings as emergency departments, specialty clinics, hospitals, psychiatric treatment units, community health clinics, substance abuse

After conducting a comprehensive literature search, the authors undertook a meta-analysis to examine the association between correctional education and reductions in recidivism, improvements in employment after release from prison, and other outcomes. The study finds that receiving correctional education while incarcerated reduces inmates' risk of recidivating and may improve their odds of obtaining employment after release from prison.

The Growth of Incarceration in the United States

The growing concern over the number of accidental firearm shootings, especially those involving children, prompted passage of the initial handgun safety law which went into effect in 1994. The stated intent of the California Legislature in enacting the current FSC law is for persons who obtain firearms to have a basic familiarity with those firearms, including, but not limited to, the safe handling and storage of those firearms. The statutory authority for this program is contained in Penal Code sections 26840 and 31610 through 31700. These statutes mandate DOJ to develop, implement and maintain the FSC Program. Pursuant to Penal Code section 26840, a firearms dealer cannot deliver a firearm unless the person receiving the firearm presents a valid FSC, which is obtained by passing a written test on firearm safety. Prior to taking delivery of a firearm from a licensed firearms dealer, the purchaser/recipient must also successfully perform a safe handling demonstration with that firearm..

Police Officer Exam Study Guide 2019-2020

After decades of stability from the 1920s to the early 1970s, the rate of imprisonment in the United States has increased fivefold during the last four decades. The U.S. penal population of 2.2 million adults is by far the largest in the world. Just under one-quarter of

the world's prisoners are held in American prisons. The U.S. rate of incarceration, with nearly 1 out of every 100 adults in prison or jail, is 5 to 10 times higher than the rates in Western Europe and other democracies. The U.S. prison population is largely drawn from the most disadvantaged part of the nation's population: mostly men under age 40, disproportionately minority, and poorly educated. Prisoners often carry additional deficits of drug and alcohol addictions, mental and physical illnesses, and lack of work preparation or experience. The growth of incarceration in the United States during four decades has prompted numerous critiques and a growing body of scientific knowledge about what prompted the rise and what its consequences have been for the people imprisoned, their families and communities, and for U.S. society. The Growth of Incarceration in the United States examines research and analysis of the dramatic rise of incarceration rates and its affects. This study makes the case that the United States has gone far past the point where the numbers of people in prison can be justified by social benefits and has reached a level where these high rates of incarceration themselves constitute a source of injustice and social harm. The Growth of Incarceration in the United States examines policy changes that created an increasingly punitive political climate and offers specific policy advice in sentencing policy, prison policy, and social policy. The report also identifies important research questions that must be answered to provide a firmer basis for policy. This report is a call for change in the way society views criminals, punishment, and prison. This landmark study assesses the evidence and its implications for

Food is a central component of life in correctional institutions and plays a critical role in the physical and mental health of incarcerated people and the construction of prisoners identities and relationships. An understanding of the role of food in correctional settings and effective management of food systems may improve outcomes for incarcerated people and help correctional administrators to maximize the health and safety of individuals in these institutions. This report summarizes existing research about food systems in correctional settings and provides examples of food programmes in prison and remand facilities including a case study of food-related innovation in the Danish correctional system. Specific conclusions are offered for policy-makers administrators of correctional institutions and prison food services professionals and ideas for future research are proposed.
