Correctional Mental Health is a broad-based, balanced guide for students who are learning to treat criminal offenders in a correctional mental health practice. Featuring a wide selection of readings, this edited text offers a thorough grounding in theory, current research, professional practice, and clinical experience. It emphasizes a biopsychosocial approach to caring for the estimated 20% of all U.S. prisoners who have a serious mental disorder. Providing a balance between theoretical and practical perspectives throughout, the text also provides readers with a big-picture framework for assessing current correctional mental health and criminal justice issues, offering clear strategies for addressing these challenges.

### **American Journal of Correction**

After conducting a comprehensive literature search, the authors undertook a meta-analysis to examine the association between correctional education and reductions in recidivism, improvements in employment after release from prison, and other outcomes. The study finds that receiving correctional education while incarcerated reduces inmates' risk of recidivating and may improve their odds of obtaining employment after release from prison.

## **Public Hearing Before New Jersey Death Penalty Study Commission**

Traditionally, the study of financial decision making in law enforcement and criminal justice entities has been approached from the perspective of tax revenues and budgeting that focus only on the past and present. Capital investments of cash flow provide future benefits to all organizations, and among courses in business administration, these noti

### **The New Jersey Register**

Few empirical studies have focused on women in prison. In the last few years, though, a number of studies have demonstrated that there are fundamental differences between male and female prisoners in an ever-changing penal system. Consequently, there has been a need for more comprehensive studies of female offenders for three primary reasons: (1) imperative research gaps remain to be bridged; (2) the female prison experience is not constant; and (3) prison rates for female offenders, especially minority offenders, have increased considerably in the last few years. A central goal of this book, then, is to provide a balance to the existing literature and research on female prisoners in the United States and, to an extent, abroad, focusing primarily on female offenders and using data gathered from the Wisconsin Department of Corrections. The book utilizes a comprehensive investigative approach by equating the experience of female offenders by

the totality of circumstances within an historical, institutional, political, and ideological context. The critical objective is to offer an inclusive analysis of the things that are considered by female inmates to be the most significant before, during, and after their incarceration, as a way of better understanding the reasons that lead to their first incarceration as well as subsequent incarcerations. By reading this book, the reader will have a greater understanding of the many challenges facing female inmates, as well as the relationship between inmates, correctional officers and, by extension, society in general. Also provided is a series of policy recommendations throughout the book, particularly in the concluding chapter and epilogue.

### **Counseling Female Offenders: Oxford Bibliographies Online Research Guide**

Although this text covers the traditional topics of police, courts, and corrections, it is distinctive in its coverage of plea bargaining, legal and ethical values, and capital punishment. This text is unique in its critical thinking approach: student as decision maker, student as problem solver, student as working professional. Pat Anderson examines the system from the point of view of the men and women who run it; from the cop on the beat to the prison warden to the Supreme Court justice. The reader steps into their shoes to weigh the ethical ramifications and often contradictory issues that surround the choices they make.

### **Bowker's Law Books and Serials in Print**

Corrections: A Text/Reader, Second Edition is designed for undergraduate and/or graduate corrections courses. Organized like a traditional corrections text, it offers brief authored introductions in a mini-chapter format for each key Section, followed by carefully selected and edited original articles by leading scholars. This hybrid format – ensuring coverage of

important material while emphasizing the significance of contemporary research - offers an excellent alternative which recognizes the impact and importance of new directions and policy in this field, and how these advances are determined by research.

## **Subject Catalog of the Institute of Governmental Studies Library, University of California, Berkeley**

This ebook is a selective guide designed to help scholars and students of social work find reliable sources of information by directing them to the best available scholarly materials in whatever form or format they appear from books, chapters, and journal articles to online archives, electronic data sets, and blogs. Written by a leading international authority on the subject, the ebook provides bibliographic information supported by direct recommendations about which sources to consult and editorial commentary to make it clear how the cited sources are interrelated related. A reader will discover, for instance, the most reliable introductions and overviews to the topic, and the most important publications on various areas of scholarly interest within this topic. In social work, as in other disciplines, researchers at all levels are drowning in potentially useful scholarly information, and this guide has been created as a tool for cutting through that material to find the exact source you need. This ebook is a static version of an article from Oxford Bibliographies Online: Social Work, a dynamic, continuously updated, online resource designed to provide authoritative guidance through scholarship and other materials relevant to the study and practice of social work. Oxford Bibliographies Online covers most subject disciplines within the social science and humanities, for more information visit [www.aboutobo.com](http://www.aboutobo.com).

### **Introduction to Criminal Justice**

### **Monthly Checklist of State Publications**

Calls for criminal justice reform have been mounting in recent years, in large part due to the extraordinarily high levels of incarceration in the United States. Today, the incarcerated population is 4.5 times larger than in 1980, with approximately 2.2 million people in the United States behind bars, including individuals in Federal and State prisons as well as local jails. The push for reform comes from many angles, from the high financial cost of maintaining current levels of incarceration to the humanitarian consequences of detaining more individuals than any other country. Economic analysis is a useful lens for understanding the costs, benefits, and consequences of incarceration and other criminal justice policies. In this report, we first examine historical growth in criminal justice enforcement and incarceration along with its causes. We then develop a general framework for evaluating criminal justice policy, weighing its crime-reducing benefits against its direct government costs and indirect costs for individuals, families, and communities. Finally, we describe the Administration's holistic approach to criminal justice reform through policies that impact the community, the cell block, and the courtroom.

### **Corrections**

This text covers corrections explicitly. It presents a history of prisons, the history of corrections programs, and theories of punishment and corrections. It includes sections on prisoner rights, probation, juvenile corrections, and international corrections systems.
