The ABCs of Microsoft Office 97 Professional Edition

Introduction to Real Analysis

What can you make with foam and a glue stick? Anything you want! Everything is included: a 20-page book full of great foam art ideas, and a zip-up bag (16 x 10cm) chock full of pre-cut foam pieces of all different sizes, shapes and colours. Because of the small parts included, this product is not suitable for children under three years old.

Europe Since the Cold War

Digital Marketing book with easy language, easy to understand. Complete Digital Marketing course which covers Blog,

Wordpress, Youtube, Analytics, Google My business. Perfect book to earn money, no garbage of knowledge. Digital Marketing book for any age, senior citizens, house makers. Easy way to earn money through Digital Marketing. The Digital Marketing book covers following topics. G mail Account Blogger YouTube Facebook (Social Media Management) Quora Twitter Linked In Pinterest Google plus Word Press Google AdSense Google MyBusiness Google Search Console / Webmaster) Google Analytics AdSense How to use AdSense Blogger How to convert a blog into website look How to add Clock to blog? WordPress Youtube Search Engine Optimization (SEO)&Website planning Social Media Marketing Facebook Marketing Linked-in Marketing Twitter Marketing Quora Marketing Instagram Marketing Pinterest Marketing. Affiliate Marketing with Amazon Our book is perfect way to understand each topic one by one. This book is very practical way to make you earn money. We avoid garbage of knowledge. This book is divided into two parts, first part is fast way to understand the subject and start to earn money. Second part is too technical. Readers may think that everything is available in Google then why to purchase this book. The reason is, it's like hunting for pearls in the ocean an expert can guide how to dive, where to dive to get pearls. The cost of training is always less than the losses, with self experiments to get the knowledge. Digital Marketing Handbook is all time guru available anywhere anytime to teach you particular topic again and again. This book is a result of vast research, with practical approach to earn serious money. There are many books in the market with garbage knowledge, please do not go for it. We give perfect knowledge to earn money.

A Textbook of Electrical Technology

Special Effect Pigments

This food-lover's delight presents exciting, innovative recipes from a well-known figure in the culinary world. Enjoy uniquely presented traditional African cuisine with international flair, all tied together by the common element of ingredients that are organic, natural and sustainable. Elegantly produced with full colour photographs throughout.

A Textbook of Applied Mechanics

This long awaited Second Edition of the highly successful textbook for undergraduate and postgraduate students covers topics such as: Groups, Rings, Modules and fields Exhibits interplay of both Group and Field Theory by means of Galois theory Insolvability of a quintic, in general, by radicals is shown New to this edition: Replaced and modified many proofs Additional examples and exercises to make the exposition of the subject clearer and meaningful

Electrical Engineering

My Immortal and Fallen showed Erin McCarthy at her provocative best Now she takes paranormal romance one step further with The Taking Heiress Regan Henry knows that passion can be an illusion, and she keeps her emotions in check-until she falls under the spell of the beguiling Felix LeBlanc. He knows that the rumors that her mansion is haunted are true, and that he's the only one who can save her from the spirits residing there. But the only way he can do it is to sacrifice his last chance at redemption or risk a love that could consign them both to an eternity of evil.

A Text Book of Automobile Engineering

Key Result Areas - Pocket Book

Maths and Reasoning Book by Kishan Patel

Postmodern Anarchism

The Mission: To learn about the dynamic, technical advances occurring in special effect pigments and to know how to exploit them in specific coatings, plastics, printing inks and cosmetics applications while satisfying the demands of the market. The Audience: Colour designers, product developers and applications technologists in the coatings, plastics, printing inks and cosmetics industries, as well as all marketing and sales employees of these divisions who are seeking to instill coatings and pigment knowledge into their customers. The Value: Readers acquire a profound knowledge of the properties, manufacturing processes and specific application areas of special effect pigments. The latest advances in colorimetry ensure that products containing special effect pigments are subjected to state-of-the-art quality assurance methods.

Algebra

SSC Combined Higher Secondary Level (10+2) Exam.

Suresh Joshi

This text forms a bridge between courses in calculus and real analysis. Suitable for advanced undergraduates and graduate students, it focuses on the construction of mathematical proofs. 1996 edition.

Introduction to Topology

This edition has been thoroughly revised and enlarged. It is still considered to be a must for all those sitting Civil Engineering examinations.

Stenographer-Typist

Civil Engineering

This book highlights the electronic governance in a smart city through case studies of cities located in many countries. “E-Government” refers to the use by government agencies of information technologies (such as Wide Area Networks, the Internet, and mobile computing) that have the ability to transform relations with citizens, businesses, and other arms of government. These technologies can serve a variety of different ends: better delivery of government services to citizens, improved interactions with business and industry, citizen empowerment through access to information, or more efficient government management. The resulting benefits are less corruption, increased transparency, greater convenience, revenue growth, and/or cost reductions. The book is divided into three parts.

- E-Governance State of the Art Studies of many cities
- E-Governance Domains Studies
- E-Governance Tools and Issues

Linear Algebra

In the grip of lust, Raja Karan Vaghela abducts the beautiful Roopsundari, his prime minister Madhav’s wife. Fuelled by a desire for revenge, Madhav escapes to Delhi and persuades Sultan Alauddin Khilji to invade Gujarat and destroy Patan fort. This unleashes a dramatic chain of events that forever ends Rajput rule in Gujarat, heralding the dawn of a new age. Rich in psychological insight and imbued with a poetic vision, Karan Ghelo tells the spellbinding tale of a man who tragically failed his land and its people.

Karan Ghelo

Key Result Areas - Pocket Book. Organisations are complex entities and have to simultaneously focus on multiple areas and obtain positive results in each of them to achieve success and growth. KRA/ KFA/ KPI are taken up by teams and individuals to reach set goals and add maximum value to organisations. They can be budgetary targets to be met, major plans to be achieved, problems to be resolved or simply aids to achieve functional excellence in one KRAs area of work. Often KRAs are allocated and results demand without using a scientific planning. The method of how to achieve KRAs or even how to choose the best KRA is not widely known or practiced. This book highlights how to choose KRAs and how to achieve best results out of them. The steps are developed by the author and the consultants of KS Madhavan & Associates, as well as the faculty of Shingo Institute. They have given excellent results for companies where they were used in a systematic manner. The TWELVE STEP APPROACH explained herein gives quick and sustainable results that can be carried forward. We strongly recommend that organisations that assign KRAs to their managers use the steps and approaches highlighted in the book to get certain and lasting results.

Basic Electronics (Mdu)

In the present edition, authors have made sincere efforts to make the book up-to-date. A notable feature is the inclusion of two chapters on Power System. It is hoped that this edition will serve the readers in a more useful way.

Thermal Engineering

Written in the context of recent legislation in England and guidance to schools, this is a practical handbook for learning support assistants and teachers working with them.

Urban Outcasts

Heat and Mass Transfer : A Textbook for the Students Preparing for B.E., B.Tech., B.Sc. Engg., AMIE, UPSC (Engg. Services) and GATE Examinations

Delving into the anarchist writings of Nietzsche, Foucault, and Baudrillard, and exploring the cyberpunk fiction of William Gibson and Bruce Sterling, theorist Lewis Call examines the new philosophical current where anarchism meets postmodernism. This theoretical stream moves beyond anarchism's conventional attacks on capital and the state to criticize those forms of rationality, consciousness, and language that implicitly underwrite all economic and political power. Call

argues that postmodernism's timely influence updates anarchism, making it relevant to the political culture of the new millennium.

Internal Combustion Engines

As voters articulate their judgments of the parties and leaders in their fifth democratic election, Election 2014 South Africa: The Campaigns, Results & Future Prospects provides a platform for in-depth discussion and analysis of party campaigns, voting patterns, and election results of the 2014 general elections. Following the tradition of previous volumes that cover South Africa's national and provincial elections since 1994, this book draws on the expertise of renowned authors to cover important aspects of the election, including the major political party campaigns, the media's coverage of the campaigns, the latest trends in political participation and party fortunes, gender dynamics, the black middle class, as well as insights into the voter and public opinion on the eve of the election. Readers are presented with more than a mere study of a single election; they are also presented with a contemporary understanding of electoral politics and democracy in South Africa over two democratic decades and reflections on how elections strengthen the quality and prospects for democracy.

5S COMPREHENSIVE BOOK

Breaking with the exoticizing cast of public discourse and conventional research, Urban Outcasts takes the reader inside the black ghetto of Chicago and the deindustrializing banlieue of Paris to discover that urban marginality is not everywhere the same. Drawing on a wealth of original field, survey and historical data, Loïc Wacquant shows that the involution of America's urban core after the 1960s is due not to the emergence of an 'underclass', but to the joint withdrawal of market and state fostered by public policies of racial separation and urban abandonment. In European cities, by contrast, the spread of districts of 'exclusion' does not herald the formation of ghettos. It stems from the decomposition of working-class territories under the press of mass unemployment, the casualization of work and the ethnic mixing of populations hitherto segregated, spawning urban formations akin to 'anti-ghettos'. Comparing the US 'Black Belt' with the French 'Red Belt' demonstrates that state structures and policies play a decisive role in the articulation of class, race and place on both sides of the Atlantic. It also reveals the crystallization of a new regime of marginality fuelled by the fragmentation of wage labour, the retrenchment of the social state and the concentration of dispossessed categories in stigmatized areas bereft of a collective idiom of identity and claims-making. These defamed districts are not just the residual 'sinkholes' of a bygone economic era, but also the incubators of the precarious proletariat emerging under neoliberal capitalism. Urban Outcasts sheds new light on the explosive mix of mounting misery, stupendous affluence and festering street violence resurging in the big cities of the First World. By specifying the different causal paths and experiential forms assumed by relegation in the American and the French metropolis, this book offers indispensable tools for rethinking urban marginality and for

reinvigorating the public debate over social inequality and citizenship at century's dawn.

Linear Algebra Problem Book

The Foam Book

Takes the student step by step from basic axioms to advanced concepts. 164 problems, each with hints and full solutions.

Objective Electrical Technology

The aim of the book is to give a broad introduction of topology to undergraduate students. It covers the most important and useful parts of the point-set as well as the combinatorial topology. The development of the material is from simple to complex, concrete to abstract, and appeals to the intuition of readers. Attention is also paid to how topology is actually used in the other fields of mathematics. Over 150 illustrations, 160 examples and 600 exercises will help readers to practice and fully understand the subject. Contents: Set and Map Metric Space Graph Topology Topological Concepts Complex Topological Properties Surface Topics in Point Set Topology Index

A Handbook for Learning Support Assistants

This treatise on Engineering Materials and Metallurgy contains comprehensive treatment of the matter in simple, lucid and direct language and envelopes a large number of figures which reinforce the text in the most efficient and effective way. The book comprise five chapters (excluding basic concepts) in all and fully and exhaustively covers the syllabus in the above mentioned subject of 4th Semester Mechanical, Production, Automobile Engineering and 2nd semester Mechanical disciplines of Anna University.

Safety and Health Inspector

1)based Short and sweet tricks2)basic information3)theory explanation 4)quick and fast revision5)100 page to complete maths and reasoning

Digital Marketing handbook

This cutting edge, "how to" manual details proven methods for turning around chronically late, overbudget, and underperforming projects. Project Management in the Fast Lane explains how Theory of Constraints tools can be applied to achieve effective, breakthrough solutions in virtually any environment. It includes a complete discussion of the Criti

Through the Eyes of an African Chef

The Stenographer-Typist Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study.

Elections 2014

The Safety and Health Inspector Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study. It provides hundreds of questions and answers in the areas that will likely be covered on your upcoming exam, including but not limited to: fire prevention, inspections and hazards; understanding and interpreting written material; inspection and interviewing; occupational health and safety, including accident prevention and control; reading and interpreting technical data and plans; preparing written material; and more.

Engineering Materials & Metallurgy

On the life and works of Suresh Joshi, 1921-1986, Gujarati author.

Project Management in the Fast Lane

A guide for beginning to intermediate users explores the business software's new features and offers advice on coordinating Microsoft Office's applications efficiently

A Textbook of Manufacturing Technology

E-Governance for Smart Cities

The entire book has been thoroughly revised and a large number of solved examples under heading Additional/Typical Worked Examples (Questions selected from various Universities and Competitive Examinations) have been added at the end of the book.

An Integrated Course In Electrical Engineering (3rd Edition)

Beginning with the basic concepts of vector spaces such as linear independence, basis and dimension, quotient space, linear transformation and duality with an exposition of the theory of linear operators on a finite dimensional vector space, this book includes the concepts of eigenvalues and eigenvectors, diagonalization, triangulation and Jordan and rational canonical forms. Inner product spaces which cover finite dimensional spectral theory, and an elementary theory of bilinear forms are also discussed.
