Have you ever felt obligated to make up a physical ailment (like your leg falling off) when calling in for a mental health day? Do you sometimes entertain the idea that there are moon people who use a lunar raygun to disrupt society when the moon is full? If so, you will be able to relate to the comic strips in this book. This book is a collection of comic strips drawn by Carl Elbing who has worked as an RN since 1992.

Ulrich's Update

The Nurse's Guide to Blogging

A New York Times bestseller. “A funny, intimate, and often jaw-dropping account of life behind the scenes.”—People Nurses is the compelling story of the year in the life of four nurses, and the drama, unsung heroism, and unique sisterhood of nursing—one of the

world's most important professions (nurses save lives every day), and one of the world's most dangerous, filled with violence, trauma, and PTSD. In following four nurses, Alexandra Robbins creates sympathetic characters while diving deep into their world of controlled chaos. It's a world of hazing—"nurses eat their young." Sex—not exactly like on TV, but surprising just the same. Drug abuse—disproportionately a problem among the best and the brightest, and a constant temptation. And bullying—by peers, by patients, by hospital bureaucrats, and especially by doctors, an epidemic described as lurking in the "shadowy, dark corners of our profession." The result is a page-turning, shocking look at our health-care system.

Offering comprehensive coverage of effective nursing leadership and management, this third edition challenges nursing students to learn the structure, concepts, and relationships of their future trade with a wide array of interactive tools. It presents the foundations and strategies for effective nursing management and leadership from role development, to the use of information and technology, to political influences within the industry. Focusing on building the complete nurse beyond actual healthcare, this new edition features a full-color design and the

addition and reorganization of key chapters. Each chapter opens with The Challenge - a contemporary nurse manager's real-world concerns related to the chapter content. The Solution closes each chapter by illustrating effective methods of handling the challenges of those situations set forth in the chapter. The full-color design attracts and maintains student interest. Exercises are scattered throughout every chapter to provide a quick lesson in thinking critically as well as an opportunity to apply the chapter content to current, real-world scenarios. Theory Boxes give a brief description of relevant theory and key concepts. Research and Literature Perspectives illustrate the relevance and applicability of current studies to practice. Objectives and Questions to Consider guide students toward considering their own viewpoints or experiences with topics and issues discussed in each chapter. The glossary defines all applicable chapter terminology. Key terms are bolded in the text. A built-in Workbook, with perforated pages, enables students and instructors to evaluate learning. A chapter on Developing the Role of Leader introduces key leadership theories and cites examples of how each can be used clinically and professionally. A chapter on Leading Through Professional Associations stresses the need to be involved in professional organizations, discusses their goals and various structural formats, and provides strategies for becoming involved with major national associations. A new chapter-ending section includes the Chapter Checklist, Tips, and Terms to Know to clearly set them apart from the chapter content.

This introduction to community based nursing roles and concepts focuses on nursing care of the individual in a community setting. The text is divided into four units that cover the knowledge base for concepts and the application of concepts. Basic concepts are presented in the first unit, with discussion of practice settings, levels of prevention, health promotion, the

family and cultural considerations. Three basic skills of the community based nursing - communicating, educating and managing - are examined in the second unit. The third unit explains the application of skills and concepts to continuity of care, discharge planning, community resources and referrals and home health practice. The fourth unit prepares the reader for what's ahead, with a look into future trends in community based nursing.

This lively, practical text presents a fresh and comprehensive approach to doing qualitative research. The book offers a unique balance of theory and clear-cut choices for customizing every phase of a qualitative study. A scholarly mix of classic and contemporary studies from multiple disciplines provides compelling, field-based examples of the full range of qualitative approaches. Readers learn about adaptive ways of designing studies, collecting data, analyzing data, and reporting findings. Key aspects of the researcher's craft are addressed, such as fieldwork options, the five phases of data analysis (with and without using computer-based software), and how to incorporate the researcher's "declarative" and "reflective" selves into a final report. Ideal for graduate-level courses, the text includes:*

Discussions of ethnography, grounded theory, phenomenology, feminist research, and other approaches.* Instructions for creating a study bank to get a new study started.* End-of-chapter exercises and a semester-long, field-based project.* Quick study boxes, research vignettes, sample studies, and a glossary.* Previews for sections within chapters, and chapter recaps.* Discussion of the place of qualitative research among other social science methods, including mixed methods research.
