William Woodward (1859-1939) was a force in New Orleans and the art world, and his legacy endures. In this first compilation of examples of Woodward's work spanning his career, essayists offer unique perspectives on the artist and his art. Woodward was a graduate of the Rhode Island School of Design and the Massachusetts Normal Art School. He started the School of Art and organized the Department of Architecture at Tulane University, and he taught evening art classes to citizens of New Orleans. His oil crayon paintings of the French Quarter were instrumental in preserving the French Quarter buildings from destruction, and he was a leader in the Arts and Crafts movement in New Orleans. He was a member of the American Institute of Architects. Woodward also organized the Art Association of New Orleans and the Decorative Art

League for Women, which founded the manufacture of art pottery in New Orleans. Woodward was a prolific artist and pioneered new techniques with his use of the Rafaelli oil crayon and the fiberloid dry etching process. Upon his retirement from Tulane in 1922, Woodward moved to Biloxi, Mississippi, where his paintings of the Mississippi Gulf Coast provide a historical record of an area now almost entirely changed by development and natural disasters. Woodward also traveled extensively and chronicled his travels in his art.

"The saga of John Kennedy Toole is one of the greatest stories of American literary history. After writing *A Confederacy of Dunces*, Toole corresponded with Robert Gottlieb of Simon & Schuster for two years. Exhausted from Gottlieb's suggested revisions, Toole declared the publication of the manuscript hopeless and stored it in a box. Years later he suffered a mental breakdown, took a two-month journey across the United States, and finally committed suicide on an inconspicuous road outside of Biloxi. Following the funeral, Toole's mother discovered the manuscript. After many rejections, she cornered Walker Percy, who found it a brilliant novel and spearheaded its publication. In 1981, twelve years after the author's death, *A Confederacy of Dunces* won the Pulitzer Prize. In *Butterfly in the Typewriter*, Cory MacLauchlin draws on scores of new interviews with friends, family, and colleagues as well as full access to the extensive Toole archive at Tulane University, capturing his upbringing in New Orleans, his years in New York City, his frenzy of writing in Puerto Rico, his return to his beloved city, and his descent into paranoia and depression"--

Employ cognitive theory in the classroom every day Research into how we learn has opened the door for utilizing cognitive theory to facilitate better student learning. But that's easier said than done. Many books about cognitive theory introduce radical but impractical theories, failing to make the connection to the classroom. In *Small Teaching*, James Lang presents a strategy for improving student learning with a series of modest but powerful changes that make a big difference—many of which can be put into practice in a single class period. These strategies are designed to bridge the chasm between primary research and the classroom environment in a way that can be implemented by any faculty in any discipline, and even integrated into pre-existing teaching techniques. Learn, for example: How does one become good at retrieving knowledge from memory? How does making predictions now help us learn in the future? How do instructors instill fixed or growth mindsets in their students? Each chapter introduces a basic concept in cognitive theory, explains when and how it should be employed, and provides firm examples of how the intervention has been or could be used in a variety of disciplines. Small teaching techniques include brief classroom or online learning activities, one-time interventions, and small modifications in course design or communication with students.
