The Official Railway Guide

The Verizon leadership team stands apart from most leadership teams today in their willingness repeatedly to put the enterprise before the individual. At first blush, this might look like a hopelessly old-fashioned notion in the age of the selfie. Yet, I would argue this is a trait that future leaders and boards of directors across industries would do well to understand and embrace. Seidenberg not once but twice in the service of company shareholders and employees subordinated himself and put off taking sole

leadership of the company to advance the enterprise's odds of success. And many others in this story exhibited the same trait to help build this industry-leading enterprise. They understood that the risk of not acting and thereby destroying value during a period of accelerating technological change and industry consolidation—a situation faced by leadership teams around the world today—was much greater than the risk of stepping in as No. 2 or co-CEO. In my 50 years of experience, it is a rare leadership team that will subordinate itself for the benefit of the industry, customers and the company. That principle, that the company comes first, the individual second, is what will define successful leadership teams of the future. Multiple leadership principles, some new, some timeless, emerge from this narrative and will be of great use to the next generation of leaders across industries and around the world. By taking a look at a company that successfully executed exponential transformation, we can take the strategies of Verizon leaders and apply them to our own experiences.—Ram Charan

The Book of Broken Promises

A Reference Guide to the Literature of Travel

Hot Line Farm Equipment Guide Quick Reference Guide

A Guide for Instruction in Latin

Broken Promises is the third book in a trilogy spanning 18 years. Bruce Kushnick, author, senior telecom analyst and industry insider, lays out, in all of the gory details, how America paid over \$400 billion to be the first fully fiber optic-based nation yet ended up 27th in the world for high-speed Internet (40th in upload speeds). But this is only a part of this story. With over four million people filing with the FCC to 'Free the Net', one thing is abundantly clear -- customers know something is terribly wrong. Every time you pay your bills you notice that the price of

your services keeps going up, you don't have a serious choice for Internet (ISP), broadband or cable service, much less competitors fighting for your business, or maybe you can't even get very fast broadband service. Worse, over the last few years, America's ISPs and cable companies have been rated "the most hated companies in America". While Net Neutrality concerns (detailed in Broken Promises) are important, the actions are only a first step and will most likely be tied up in court for the next few years. More importantly, it does not resolve most of the customer issues and there is nothing else on the horizon that will fix what's broken. Broken Promises documents the massive overcharging and failure to properly upgrade the networks, the deceptive billing practices, the harms caused from a lack of competition, the gaming and manipulating of the regulatory system, from the states to the FCC, and exposes the companies' primary strategy: How much can we get away with? There has been little, if any, regard for the customers they serve.--From <http://newnetworks.com/bookbrokenpromises/> --(viewed on June 12, 2015).

Cyclopadia Bibliographica: A Library Manual Of Theological And General Literature, and guide to books for Autors, preachers, students, and literary men.

An intimate and revealing portrait of civil rights icon and longtime U.S. congressman John Lewis, linking his life to the painful quest for justice in America from the 1950s to the present—from the Pulitzer Prize-winning author of *The Soul of America* John Lewis, who at age twenty-five marched in Selma, Alabama, and was beaten on the Edmund Pettus Bridge, was a visionary and a man of faith. Drawing on decades of wide-

ranging interviews with Lewis, Jon Meacham writes of how this great-grandson of a slave and son of an Alabama tenant farmer was inspired by the Bible and his teachers in nonviolence, Reverend James Lawson and Martin Luther King, Jr., to put his life on the line in the service of what Abraham Lincoln called “the better angels of our nature.” From an early age, Lewis learned that nonviolence was not only a tactic but a philosophy, a biblical imperative, and a transforming reality. At the age of four, Lewis, ambitious to become a minister, practiced by preaching to his family’s chickens. When his mother cooked one of the chickens, the boy refused to eat it—his first act, he wryly recalled, of nonviolent protest. Integral to Lewis’s commitment to bettering the nation was his faith in humanity and in God—and an unshakable belief in the power of hope. Meacham calls Lewis “as important to the founding of a modern and multiethnic twentieth- and twenty-first-century America as Thomas Jefferson and James Madison and Samuel Adams were to the initial creation of the Republic itself in the eighteenth century.” A believer in the injunction that one should love one’s neighbor as oneself, Lewis was arguably a saint in our time, risking limb and life to bear witness for the powerless in the face of the powerful. In many ways he brought a still-evolving nation closer to realizing its ideals, and his story offers inspiration and illumination for Americans today who are working for social and political change.
