[Menage Amour: Erotic Paranormal Menage a Trois Romance, M/F/M, werewolves, sex toys, HEA] Nikki Sinclair doesn't take crap from anybody-especially men. Her own failed marriage proved that men would only use her. It doesn't matter that she longs for a man to love her, hold her, protect her, and want children with her. It just isn't meant to be. Alexander Gregg and Butler Roman, enforcers for Beckett's pack, are stoic, often brutally serious wolf shifters that no pack member or outside challenger ever crosses. Their lives hold no tenderness, no softness, and no mate to complete their triad. The Fates have gifted them with Nikki. She brings laughter and tenderness into their lives. And hell no! She is not afraid of them! They need her to be safe and understand that sometimes giving up control does not mean weakness. All they have to do is convince her to put aside her stubbornness and accept them as her mates and the fathers of her babies. Note: This book contains double vaginal penetration. Note: While Babies for Nikki is a stand-alone title, it is

suggested that Laurie's Loves, Beckett's Wolf Pack, Triad Mates 1, be read first for continuity. \*\* A Siren Erotic Romance

Sarah Avery's reckless behavior has cost her a job, her boyfriend, and the independence she desperately craves. Reluctantly home for the holidays in the Bay of Fires, a tiny seaside town on the Tasmanian coast, she hopes for a calm, quiet visit, with time to reflect on all that's gone wrong. Those hopes are crushed when, early one morning, she discovers the body of a young female backpacker washed up on the shore. A year earlier, another woman went missing and hasn't been seen since. Now everyone wonders: is there a killer in the brush? Or were these women victims of Tasmania itself? The island is place of savage beauty: pristine sand beneath orange-lichen covered granite boulders; heaving shadowy kelp fields; sweeping cold currents; crackling bush beyond the seashore. It's also a landscape as flawed, vulnerable and vengeful as any human. Once its fragile peace is shattered, the locals' anxiety fuels a string of speculations about happened to the women - and who might be the next victim. When journalist Hall Flynn arrives to investigate, haunted by recent failures and yearning for a fresh start, he's

determined to do whatever it takes to break the story, and Sarah is his best source of local information. But Sarah - like everyone else in this close-knit town - has secrets she's desperate to keep hidden. And one of those secrets leads straight to a killer's door. Haunting, evocative, as wildly atmospheric as the remote island where it takes place, *BAY OF FIRES* is a startling and wholly original debut.

High-Performance Computing using FPGA covers the area of high performance reconfigurable computing (HPRC). This book provides an overview of architectures, tools and applications for High-Performance Reconfigurable Computing (HPRC). FPGAs offer very high I/O bandwidth and fine-grained, custom and flexible parallelism and with the ever-increasing computational needs coupled with the frequency/power wall, the increasing maturity and capabilities of FPGAs, and the advent of multicore processors which has caused the acceptance of parallel computational models. The Part on architectures will introduce different FPGA-based HPC platforms: attached co-processor HPRC architectures such as the CHREC's Novo-G and EPCC's Maxwell systems; tightly coupled HPRC architectures, e.g. the Convey hybrid-core computer; reconfigurably networked HPRC architectures, e.g. the QPACE system, and standalone HPRC architectures such as EPFL's CONFETTI system. The Part on Tools will focus on high-level programming approaches for HPRC, with chapters on C-to-Gate tools (such as Impulse-C, AutoESL, Handel-C, MORA-C++); Graphical tools (MATLAB-Simulink, NI LabVIEW); Domain-specific languages, languages for heterogeneous computing (for example OpenCL, Microsoft's Kiwi and Alchemy projects).
