Building a Neighborly Community

Lieutenant Colonel Charles Bevan was the key figure in an extraordinary, controversial and ultimately tragic episode during the Peninsula War. He was the commanding officer held responsible for the dramatic night escape of the French garrison from Almeida over a vital bridge. For this disaster he incurred the extreme wrath of the Duke of Wellington but whether this was fair remains highly debatable.

This is the dramatic story of the ups and downs of a born entrepreneur. Malcolm Walker was born in the West Riding of Yorkshire in 1946. With fellow Woolworth's trainee manager Peter Hinchcliffe, Walker opened a small frozen food shop called Iceland in the Shropshire town of Oswestry in 1970. Iceland became a public company 14 years later, through one of Britain's most successful stock exchange flotations of all time, and by 1999 it had grown into a £2 billion turnover business with 760 stores. In August 2000, Iceland merged with the Booker cash and carry business and Walker announced that he would step down as CEO in March 2001. In preparation for his retirement, he sold half his shares in the company and left for the holiday of a lifetime in the Maldives. However, while he was away the new management of the company slashed profit expectations, plunging Iceland into a £26m loss rather than the £130m profit the City had been expecting. Walker was fired and spent three years under investigation by the authorities before being cleared of any wrongdoing. In Walker's absence, Iceland's sales collapsed as customers deserted the company – and, almost exactly four years after he had left the business, he returned as its boss. His amazing revival of Iceland has seen like-for-like sales grow by more than 50% and the business winning the accolade of Best Big Company To Work For In the UK. In March 2012 Walker led a £1.5bn management buyout of the company and is now personally worth over £200m. The incredible story of Walker's life – which he tells here for the first time – is as dramatic as any you will find in business, and it serves as a model for how,

Science touches all of our lives, every day, and should be a constant source of wonder and fascination — not something confined to the classroom. This book is for anybody who feels curious about ideas in science but lacks a strong background in the subject. Getting to Grips with Science draws on the author's twelve years of experience in leading experimental discussion groups, where people from all walks of life come together to pose questions in the presence of a science teacher. Bursting with testimonials from real people about their everyday experiences of science, the book acts as a gentle introduction for anyone wishing to find out more about the natural world. Drawing on practical examples and discussions that range from hormones to tectonic plates, it helps the reader understand any difficulties they may have encountered with science learning in the past and points to fresh ways of approaching the subject in the future. Concentrating on the themes that non-scientists are genuinely curious about, the book illustrates how we can begin to explore scientific ideas, first through our initial understanding of the world around us and then with the help of a trained tutor who explains the underlying scientific concepts. For those wishing to make a start on exploring science afresh, the book offers practical information

about the books, museums, websites, podcasts, courses and events available to support them. Wider reflection on the experience of adults engaging with science through these discussion groups offers food for thought on the nature of science education in general. Andrew Morris has been running science discussion groups in informal settings in central London since 2002. Originally a science teacher in sixth-form, further and adult education, he has also worked as a senior manager in colleges and national bodies concerned with educational research.

With hardly any previous veg-growing experience and even less time, when Gardener's World design guru Joe Swift decided to take on a 250 sq metre allotment in north London, some people thought he was mad. But with hard work and dedication, in less than a year Joe created his very own urban oasis and a source of delicious, fresh, organic produce for himself and his family. In this book Joe takes us through every stage of his education as an allotment gardener, from putting his name on the council waiting list to harvesting his first crops. He reveals everything he's learned about acquiring a plot, clearing the site, planning the beds, and planting, nurturing and protecting his fruit and vegetables. All the techniques he has mastered are described and illustrated, step by step. Joe also introduces us to his Veg Heroes like Monty Don and Geoff Hamilton - fellow plot-holders with years of experience and the crops to show for it - who inspired Joe to take up veg growing in the first place. And he shares with us his enjoyment of allotment gardening, the combination of hard work, fresh air and a sense of community that makes his

The final mystery starring Sammy Keyes: “the most winning junior detective ever in teen lit. (Take that, Nancy Drew!)” —Midwest Children’s Book Review

Sammy doesn’t go looking for trouble, but she seems to find it everywhere. She’s forever sniffing out clues and chasing down bad guys—and driving her friends a little nuts. She’s gone up against thieves and counterfeiters and gangsters and blackmailers and murderers, and always stayed one step ahead. Until now. Last night, one of the bad guys caught up. Last night, someone followed Sammy up the fire escape and pushed her from the third story. Now she’s in the hospital, out cold. And her friends are left with the questions Sammy’s always been so good at answering: Why? How? But most of all . . . WHO? In this emotional conclusion to her beloved long-running series, Wendelin Van Draanen shows just how many lives one nosy girl can touch and pays tribute to a life well sleuthed. Praise for Sammy Keyes: “If Kinsey Millhone ever hires a junior partner, Sammy Keyes will be the first candidate on the list. She’s feisty, fearless, and funny. A top-notch investigator!” —Sue Grafton

A Cold War

The School of Charity

A collection of Lady Ashcombe's writing which looks at aspects of castle life and Cotswold life with warmth and humour.

ATV Projects: Get the Most Out of Your All Terrain Vehicle

This book offers an introduction to Scotland's Cold War experience and represents an interesting sample of the numerous issues faced by communities north of the Border from the close of the Second World War until the late 1990s. The Cold War was an event that touched every aspect of life in Scotland, and this collection does not claim to provide a definitive statement on such a vast subject area. However, with contributions based either on personal experience or scholarship, the intent is to bring segments of Scotland's Cold War experience to light and to inspire new lines of research.

Eighteen years later, political pressure sees the murder investigation reopened. Detective Ella Marconi tracks down Georgie Riley, the student who found the body, and who is now a paramedic. Georgie seems to be telling the truth, so then why does Ella receive an anonymous phone call insisting that Georgie knows more? And is it mere coincidence that her ambulance partner, Freya, also went to the same high school? Ella's confusion increases when Tim's mother, once so willing to get the police involved, suddenly turns her back on the investigation. Meanwhile, Tim's cousin, the MP whose influence reopened the case, can't seem to do enough to help. The more Ella digs into the past, the more the buried secrets and lies are brought to light. Can she track down the killer before more people are hurt?

As the third volume in the series including *The Hidden Ground of Love* (1985) and *The Road to Joy* (1989), this collection features Thomas Merton's letters to members of religious communities around the world. Merton's questions about the monastic life, sometimes radical and disturbing, either arose from what was happening in his own experience or reflected the extraordinary changes that followed Vatican Council II.

The Telegraph has long enjoyed the closest association with gardeners. Indeed, as the newspaper of choice for the counties and the shires, it revels in the glory and variety of Britain's horticultural heritage, whether celebrating the most renowned gardens, like Great Dixter, or extolling the tart virtues of rhubarb. For gardening spans a vast spectrum. Various hobby, art form, industry and, on occasion, cause of social unrest, it encompasses the annual spectacle of the Chelsea Flower Show, Vita Sackville-West's legendary White Garden at Sissinghurst, and the pursuit of prize-winning pumpkins. And while the Telegraph's weekend supplements might publish advice on growing asparagus or figs, the letters pages bristle with feuds and controversies at the RHS. Whatever form it takes, few things could be more central to the world of the Telegraph reader than the garden. Which is why the paper has always attracted the best writers on the subject: from the experts of

Devils Chair Island is a fictional island off the Kerry Coast of Ireland, and it is reached by the equally fictional Gorney Peninsula. Apparently, the huge head of the devil can be seen reclining on his throne from halfway along the Gorney Bladeso called because it is an extremely narrow sandstone spit, 2500 feet high. The local police, represented by Andy Buggy, have for various reasons, incurred the wrath of the villagers of Oughtnamadra. Every Tuesday morning, Andy Buggy, the local guard, must drive across Knuckle Strand to collect the social security papers known as dole chits from the villagers of Oughtnamadra. Sayvile Crummy, who lives there and is almost an idiot savant, discovers that he has the power to move things with the power of his mind and that he can make use of the idle power that exists in his neighbours. Now, because of a stupid and unfeeling remark made by a Dole cop, he has decided to send any cop who comes to the village for any reason to the moon. This is called lashing the cop up to the moon, and after a year of trying it works. The cop goes there but comes back almost instantly: this is called Lashback. The villagers are using a power of which they have no understanding. For instance, the length of time that the person stays on the moon and the time of the month when he goes all have an effect on when and where he will return to on earth. There is another strange effect in that, due his being under the psychic power of the teleportation, the teleportelee does not suffer any physical damage to his person. Gravity affects him, and he might lose whatever clothes he

Scotland and the Cold War

Born in the 1930s, the Soviet Air Force's long-range bomber arm (known initially as the ADD and later as the DA) proved itself during World War II and continued to develop in the immediate post-war years, when the former allies turned Cold War opponents. When the strategic bomber Tu-4 was found to be too 'short-legged' to deliver strikes against the main potential adversary - the USA, both Tupolev and Myasishchev OKBs began the task by creating turbine-engined strategic bombers. By the Khrushchev era in the mid/late 1950's the Soviet defense industry and aircraft design bureau set about adapting the bombers to take air-launched missiles for use against land and sea targets. In 1962 the DA fielded its first supersonic aircraft - the Tu-22 Blinder twinjet, which came in pure bomber and missile strike versions. The Brezhnev years saw a resurgence of strategic aviation with the Tu-22M Backfire 'swing-wing' supersonic medium bomber entering service in the mid-1970s followed in 1984 by the Tu-95MS Bear-H and Tu-160 Blackjack which were capable of carrying six and 12 air-launched cruise missiles respectively. Soviet Strategic Aviation in the Cold War shows how the DA's order of battle changed in the period from 1945 to 1991. Major operations including the air arm's involvement in the Afghan War, the Cold

In 1908, an enormous explosion occurs over Siberia, leveling thousands of hectares of forest land. Seventeen years later, Dr. Miroslav Oborski, a politically unpopular Russian physicist, has collected evidence that suggests there is far more to the explosion than commonly believed. He unwittingly enlists the help of a criminal organization headed by the Barkov brothers to find a powerful and technically advanced object that survived the explosion. Unknown to Dr. Oborski, the Barkovs have another agenda. Financed by a group of paranoid and corrupt government officials, they have been ordered to dispose of the troublesome Dr. Oborski and secure the valuable object. But the Barkovs, no strangers to greed and corruption, themselves have a different plan in mind. It's up to the National Science and Development Foundation and its chairman, Viktor Treschev, to save Dr. Oborski and find the object before the Barkovs get to it. The situation rapidly becomes complicated when a Russian farm family, a reclusive hunter, and Norman MacLeod, a Canadian Merchant Marine seaman, are reluctantly drawn into the deadly, high-stakes game that crisscrosses Russia and find its way into eastern Canada in a race to find a device that could change history forever.

'Blue-Eyed Son is a personal history, but its themes - family, self-identity and filial love - are universal' Daily Mail Raised in a comfortable middle-class home, Nicky Campbell's Scottish Protestant family cared for and nurtured him as their own, while remaining open about the fact that he'd been adopted. His father - an ex-army man - and his mother helped him to a good school and a good university. Nicky rarely thought of his birth parents, until a combination of an imploding marriage and a chance meeting with a private detective led him to track down his birth mother. Nicky Campbell brilliantly recalls their reunion and tentative steps towards a relationship, evoking all the complex and deep-seated emotions that being reunited elicited in each of them. But it soon became clear that there was more to Nicky's background than he expected. In this emotionally gripping and refreshingly honest memoir, Nicky Campbell describes the many sides of a family's dark history, and how it feels to find out where you come from.

reader through his early career in diesel submarines, prior to his transition to the complex and very demanding three-dimensional world of operating nuclear submarines; he describes the Royal Navy's shortcomings in ship and weapons procurement and delivers many insights into the procurement failures which led to the effective bankrupting of the Defence budget in the first decade of the 21st century. In command of the hunter killer submarines Courageous and Valient in the 1980s, he achieved exceptional success against Soviet submarines at the height of the Cold War. He was also involved in the initial deployment of the Trident nuclear weapon system, and divulges hitherto un-revealed facets of nuclear weapons strategy and policy during this period. Statistical analysis allows us to attach meaning to data which we have collected; it helps us to understand what results really mean, and to assess whether we can trust what experiments seem to be telling us. Yet, despite being a collection of the most valuable and important tools available to bioscientists, statistics is the aspect of study which most students fear more than any other. Biomeasurement offers a refreshing, student-focused introduction to the use of statistics in the study of the biosciences. With an emphasis on why statistical techniques are essential tools for bioscientists, the book removes the stigma attached to statistics by giving students the confidence to use and further explore the key techniques for themselves. The book starts by placing the role of data analysis in the context of wider scientific method, and introduces the student to the key terms and concepts which are common to all statistical tools. It then guides the student through descriptive statistics, and on to inferential statistics, explaining how and why each type of technique is used, and what each can tell us in order to better understand our data. The book goes on to present nine key statistical tests, walking the student step-wise through the use of each, with carefully

integrated examples, and plentiful opportunities for hands-on practice. Finally, an overview of choosing the right test to suit your data, and tools for presenting data and their statistical analyses, is given. Nervous as a kitten whenever he comes near... Toni George needs a job to clear the gambling debts her late husband secretly accrued. With tiny twin girls to feed, she has no choice but to accept a position with notorious heartbreaker Steel Landry. Steel is intrigued by and more than a little attracted to the beautiful Toni, though he knows that she is offlimits. But she's as nervous as a kitten whenever he is near—so maybe she isn't as immune to his potent brand of masculinity as she'd like to be...?
