### **Finders Keepers**

School integration means, among other things, that the divisions created by apartheid need to be addressed systematically and systemically. Integration is not merely about changing the racial demographics of learner and educator bodies. It means schools changing to meet the needs of all children, fostering meaningful interaction among learners in the classroom, on the playground and in extra-mural activities as well as instilling a human rights culture. It means constructing curricula, texts and pedagogies that are informed by a democratic ethos and it requires teachers, school managers and communities that are equipped to promote a democratic school environment. In short, it is about inclusivity and social cohesion. And the issue of integration is as pertinent internationally as it is in South Africa - questions of race, racism, citizenship and diversity are central to school systems throughout the world. This book contains the proceedings of a colloquium held in October 2003, attended by leading South African and international researchers, to take stock of the status quo in school integration and identify new directions research should be taking to support the process of change.

Sarah Lotz, internationally acclaimed author of *The Three*, and *Day Four*, describes *The Mark* as: "An entrancing, truly original novel packed with twists you won't see coming and a heroine that breaks the mould. Unputdownable." In the future, the world has flipped. Ravaged by the Conflagration, the State of Mangeria is a harsh place where the sun beats down, people's lives are run by a heartless elite and law is brutally enforced. Juliet Seven - "Ettie" - will soon turn 15 and her life as a drudge will begin, her fate-mate mate will be chosen. Like everyone else, her future is marked by the numbers on her spine. ### **Assessing Culturally and Linguistically Diverse Students**

Do you want your school or district to truly become a learning organization? How do you foster lasting and meaningful change? How do you avoid rejection of your new approach to teaching and learning? If you've been involved in a school change effort, you most likely have struggled with these questions. To ease this struggle, Douglas B. Reeves has proposed a new framework to promote effective change efforts through teacher leadership. In this book, you will explore not only cutting-edge research findings, but also practical applications that can help improve student achievement and educational equity. You can learn how to achieve lasting results as an educator and school leader. You can learn from other teacher researchers how to infuse your classroom, school, or district with enthusiasm, meaningful teaching, improved results, and greater satisfaction. Even as you strive for innovation, you naturally want to avoid having the next new thing become the latest old thing. To achieve lasting change, educators must embrace evidence-based decision making rather than the fact-free debate. Reeves has found that educators more readily accept decisions they disagree with if they believe the decision-making process was fair--not based on opinion or hierarchy. Reeves aims for you to help him build a network of teacher leaders based on this new evidence-based framework that will foster resilient learning organizations. Come along--explore, act, and share. Note: This product listing is for the Adobe Acrobat (PDF) version of the book.

This examination of the sociology of language in Canada focuses on the social or societal aspects of the relationship between languages and society rather than on linguistic aspects. The study is developed in seven sections: (1) an introductory discussion of language and communication systems, language acquisition, messages, and language communities in contact; (2) analysis of the spatial distribution of Canada's language communities; (3) a review of the processes affecting change, including fertility, mortality, migration, language shift, and linguistic intermarriage; (4) an examination of language use in public domains (work, education, mass media); (5) a discussion of age structure and educational attainment as correlates of language characteristics; (6) examination of the consequences of language characteristics in occupational distribution and mobility and in income; and (7) an analysis of language rights and the involvement of the state through language policy. Lack of an integrated body of data about the sociology of language in Canada is criticized. Nine pages of references conclude the report. (MSE)
