Being healthy is much more than being physically fit and free from disease. Health is the state of well-being in which all of the components of health -- physical, emotional, social, mental, spiritual, and environmental -- are in balance. To be truly healthy, you must take care of all six components. - p. 11.

This quintessential middle grade biography of Harriet Tubman now features a cover by NAACP Image Award winner and Caldecott Honor illustrator Kadir Nelson,

a foreword by National Book Award finalist Jason Reynolds, and additional new material. A selection of the Schomburg Center's Black Liberation Reading List. Harriet Tubman: Conductor on the Underground Railroad was praised by the New Yorker as “an evocative portrait,” and by the Chicago Tribune as “superb.” It is a gripping and accessible portrait of the heroic woman who guided more than 300 enslaved people to freedom. Harriet Tubman was born in slavery and dreamed of being free. She was willing to risk everything—including her own life—to see that dream come true. After her daring escape, Harriet became a conductor on the secret Underground Railroad, helping others make the dangerous journey to freedom. This award-winning introduction to the late abolitionist, which was named an ALA Notable Book and a New York Times Outstanding Book, includes additional educational back matter such as a timeline, discussion questions, and extension activities.

Discover why and how schools must become places where thinking is valued, visible, and actively promoted. As educators, parents, and citizens, we must settle for nothing less than environments that bring out the best in people, take learning to the next level, allow for great discoveries, and propel both the individual and the group forward into a lifetime of learning. This is something all teachers want and all students deserve. In *Creating Cultures of Thinking: The 8 Forces We Must Master to Truly Transform Our Schools*, Ron Ritchhart, author of *Making Thinking Visible*, explains how creating a culture of thinking is more important to learning than any particular curriculum and he outlines how any school or teacher can accomplish this by leveraging 8 cultural forces: expectations, language, time, modeling, opportunities, routines, interactions, and environment. With the techniques and rich classroom vignettes throughout this book, Ritchhart shows that creating a culture of thinking is not about just adhering to a particular set of practices or a general expectation that people should be involved in thinking. A culture of thinking produces the feelings, energy, and even joy that can propel learning forward and motivate us to do what at times can be hard and challenging mental work.

concepts through an evolutionary lens. Biology includes rich features that engage students in scientific inquiry, highlight careers in the biological sciences, and offer everyday applications. The book also includes various types of practice and homework questions that help students understand -- and apply -- key concepts. The 2nd edition has been revised to incorporate clearer, more current, and more dynamic explanations, while maintaining the same organization as the first edition. Art and illustrations have been substantially improved, and the textbook features additional assessments and related resources.
