## **Travel Guide To Europe, 1492**

I jumped at the chance to shepherd this collection. This was personal for me. In the past, when I had prepared to teach courses on political leadership, I had come up with a dearth of recent scholarly attention to the topic. Perhaps my perspective on politics and leadership exacerbated the difficulty of my search. I had in mind a politics that touched all aspects of power and authority in our lives (not just government), encouraged the moral imagination, and affirmed human agency that could make the future better than the present. I searched with limited success for material that would explain how all of us shape and are shaped by politics. My perspective on leadership may have also hindered my search. I had in mind the simple notion of taking initiative on behalf of shared values. I found too little material about leadership that extended beyond the spectacle of authority and its assumption of hierarchy. I wanted to explain that each of us, regardless of our place in a hierarchy, has a calling to lead - to act on behalf of our moral imagination. Editing this volume permitted me the chance to develop the material I sought. I (as well as other teachers) no longer have a shortage of material relating politics and leadership with each other. From the Introduction

## **A Legal Guide to Doing Business in the Asia-Pacific**

On the eve of the five hundredth anniversary of the discovery of the Americas, it bears remembering that in 1492, as Columbus was making his historic voyage,

Europe was flourishing, at the very height of the Renaissance that transformed a continent. In art, politics, commerce, and society, the medieval world had given way to the modern era. But what was Europe really like then? What did London, Paris, Rome, and the other great centers of culture actually look like, and what was it like to travel from one to the other when the horse and the sailing ship were the most expeditious means available? How long would a typical journey take? Where would one stay and what could one eat along the way? And whom might one expect to meet? Both kings and pilgrims, to be sure. In *Travel Guide to Europe 1492*, the noted Italian historian Lorenzo Camusso offers modern-day readers and would-be adventurers ten itineraries for trips commonly taken in both the near and far reaches of fifteenth-century Europe. Whether Camusso's wayfarer is an ambitious young banker on the road from Florence to Bruges; the great painter Albrecht Dürer on his way from Nuremberg to Venice, a shipbuilder whose highly prized craft takes him from Seville to Antwerp via Barcelona, Beaune, and Paris; or a lonely pilgrim wandering from Vézelay to far-off Santiago de Compostela, he offers a vivid account of what such a journey would be like--the sights, sounds, perils, and pleasures--and in so doing he renders the very fabric of day-to-day life during this momentous era in Europe's history.

When we use language to interact with one another, we become involved in a continuous and dynamic process of exchange. This fact makes interpersonal communication a fascinating area for behavioral research. During the give-and-take of discourse, the communicators exchange facts, ideas, views, opinions, emotions, and intentions in such a way as to enhance or impede social relationships; create, maintain, and adapt identities; and create or resolve conflicts. In the APA Handbook of Interpersonal Communication, distinguished scholars apply the problem-solving perspectives of applied linguistics to answer fundamental questions. --
