Cambridge IGCSE Biology 3rd Edition

The centenarians interviewed for this collection have some fascinating ideas to explain their longevity, and do so with warmth and wit. They are a diverse group, from various parts of Australia - some have lived all their lives in the country, others in the city; some are battlers and others have few money worries. Their charming stories are laced with humour and often great sadness as they recall living through such monumental life experiences as the Great Depression and two world wars. As advances in medicine and public health continue, experts predict more and more people will live beyond a hundred years. In this insightful book are the remarkable stories of twenty-four ordinary people and their extraordinarily long lives.

Essential SQA Exam Practice: Higher History Questions and Papers

A key resource for the IGCSE Geography specification, written by leading and experienced Geography teachers and authors. This book has been carefully prepared to cover the full curriculum for the University of Cambridge International Examinations IGCSE course in Geography. It is accompanied by a CD-ROM offering invaluable study and revision support.

Cambridge International AS & A Level Biology Practical Workbook

This new and expanded edition is intended to help candidates prepare for entrance examinations in mathematics and scientific subjects, including STEP (Sixth Term Examination Paper). STEP is an examination used by Cambridge Colleges for conditional offers in mathematics. They are also used by some other UK universities and many mathematics departments recommend that their applicants practice on the past papers even if they do not take the examination. Advanced Problems in Mathematics bridges the gap between school and university mathematics, and prepares students for an undergraduate mathematics course. The questions analysed in this book are all based on past STEP questions and each question is followed by a comment and a full solution. The comments direct the reader's attention to key points and put the question in its true mathematical context. The solutions point students to the methodology required to address advanced mathematical problems critically and independently. This book is a must read for any student wishing to apply to scientific subjects at university level and for anyone interested in advanced mathematics. This work was published by Saint Philip Street Press pursuant to a Creative Commons license permitting commercial use. All rights not granted by the work's license are retained by the author or authors.

Advanced Problems in Core Mathematics

First published in 1976, this play from one of Africa's foremost dramatists is in the classic cannon. It is an incisive examination of the problems of independence and freedom in post-colonial Africa states, where few believe they have a stake in the future. In the words of one of the characters: "It was better while we waited. Now we have nothing to look forward to. We have killed our past and are busy killing our future". Francis Imbuga is a playwright and actor. He is the recipient of the Kenya National Academy of Sciences Distinguished Professional Award in Play Writing.

Cambridge Checkpoint English Coursebook 8

New edition of our best-selling IGCSE Mathematics textbook

New GCSE Maths OCR Workbook: Higher - For the Grade 9-1 Course

This booklet is intended to help you to prepare for STEP examinations. It should also be useful as preparation for any undergraduate mathematics course, even if you do not plan to take STEP. The questions are all based on recent STEP questions. I chose the questions either because they are 'nice' - in the sense that you should get a lot of pleasure from tackling them - or because I felt I had something interesting to say about them. In this booklet, I have restricted myself (reluctantly) to the syllabus for Papers I and II, which is the A-level core (i.e. C1 to C4) with a few additions. This material should be familiar to you if you are taking the International Baccalaureate, Scottish Advanced Highers or other similar courses.

IGCSE Biology

Checkpoint Maths is the first 11-14 series to be written specifically for students who are preparing for the University of Cambridge International Examinations Checkpoint test and IGCSE exam. The series is fully endorsed by CIE and is included in their Checkpoint Mathematics Resources List. - Written for an international audience - Includes plenty of exercises for practice - Contains extension material to stretch more able students - Investigations at the end of each section illustration applications of the work covered - ICT is an integral part of the course, with ICT activities at the end of each section
