## **A Preface to Marketing Management**

For market researchers, the question is not should they use the Internet, but rather how they should use the Internet. Internet Marketing Intelligence: Research Tools, Techniques & Resources, 1/e, shows researchers exactly how to do this. This specialized, practically focused, succinct, flexible, “how-to” text shows researchers how to document the resources, delineate the tools, and to demonstrate the techniques utilized when conducting marketing research on and through the Internet. Traditional marketing courses continue to introduce the “e” factor into their classrooms as the Internet integrates itself into these subject areas, and, unlike other texts in this area, Internet Marketing Intelligence provides in-depth coverage of online market research concepts and techniques that help marketing students obtain timely and accurate information necessary to orchestrate the marketing mix. Using a step-by-step approach, the text demonstrates how to utilize the Internet to target customers and create and implement marketing plans. The foundations (“whens, wheres & hows”) of how the Internet assists marketing practitioners in their essential tasks of gathering, evaluating and applying

marketing intelligence is also explored both in the text. Regular updates on the Internet Marketing Intelligence website-
