Hello, My Name Is Oliver

What can parents do to help their youngest children in their task of self-formation? How does the Montessori method of hands-on learning and self-discovery relate to the youngest infants? This authoritative and accessible book answers these and many other questions. Based on Dr. Maria Montessori's instructions for raising infants, its comprehensive exploration of the first three years incorporates the furnishings and tools she created for the care and comfort of babies. From the design of the baby's bedroom to the child-sized kitchen table, from diet and food preparation to clothing and movement, the authors provide guidance for the establishment of a beautiful and serviceable environment for babies and very young children. They introduce concepts and tasks, taking into account childrens' "sensitive periods" for learning such skills as dressing themselves, food preparation, and toilet training. Brimming with anecdote and encouragement, and written in a clear, engaging style, Montessori from the Start is a practical and useful guide to raising calm, competent, and confident children.

The Montessori Method

"We know we need to improve our traditional school system, both public and private. But how? More homework? Better-qualified teachers? Longer school days or school years? More testing? More funding? No, no, no, no, and no. Montessori Madness! explains why the incremental steps politicians and administrators continue to propose are incremental steps politicians and administrators continue to propose are incremental steps in the wrong direction. The entire system must be turned on its head. This book ask parents to take a look--one thirty-minute observation--at a Montessori school. Your picture of what educations should look like will never be the same"--Back cover.

The Advanced Montessori Method

A learn to read workbook by the author of the Practical Guide to the Montessori Method at Home This Montessori practice book includes: Work with letters and a clear and straight-forward system to learn phonics: children will learn the shape and sound of each letter, just like they would with Montessori sandpaper letters. The book includes 26 alphabet worksheets meant for children to trace letters with their fingers and learn to recognize beginning sounds. Montessori pink series activities: children will learn phonetic reading with three-part cards and missing letter activities. We will introduce easy-to-read CVC words with flash cards and games. Montessori blue series activities: the book also includes three part cards and activities to learn digraphs present in CCVC and CVCC words, and a list of words for children to practice. Montessori sight words in flash cards; A paper movable alphabet designed for children to start building their own words. Sentence building: we have also included Montessori reading games and cut-out words to start writing and reading sentences quickly. This is a learn to read book for kids 3-5 and 5-7. Each age group will use the book in a slightly different way. The first group will be able to work with the help of an adult, while the older group can start the Montessori reading series mostly on their own, as they will be able to cut, paste and color most of the reading activities by themselves. We have included many Montessori reading tools in this book, which you will be able to cut out and laminate if you want to create your own Montessori reading materials on a budget. This reading workbook contains dozens of engaging black and white illustrations to color, cut and paste, and it is ideal for families who are using Montessori at home (as a reinforcement of school work or as a great homeschooling reading tool) and it can even be used as a Montessori reading instruction tool in the classroom, as it allows its use by more than one child.

Montessori Today

How to Raise an Amazing Child is a book that celebrates the incredible period of child development between birth and six years. It takes a lively, engaging approach to a tried and trusted method of child-raising and education that is built around love and respect for children and in its turn helps children to become confident, caring and independent. The book has six chapters. Why Montessori? gives a brief history of the Montessori method and explains why Montessori's discoveries are still applied and used so successfully in Montessori schools. The author begins with the basics of loving attentive care tailored to a baby's changing needs and abilities from birth onwards and shows parents how to organise their home so that it is child-friendly with everything at the right size, orderly, and within reach to maximize opportunities for independence, freedom and developmental opportunities as their child grows. A timeline highlights the best time to try particular activities and illustrates sensitive periods for particular skills.

You Are Your Child's First Teacher

Montessori: A Modern Approach has been called the single best book for anyone -- educator, childcare professional, and especially parent -- seeking answers to the questions: What is the Montessori method? Are its revolutionary ideas about early childhood education relevant to today's world? And most important, especially for today's dual-career couples. Is a Montessori education right for my child? Paula Polk Lillard writes both as a trained educator and as a concerned parent -- she has many years as a public school teacher, but it was her enthusiasm for the education her own child experienced in a Montessori school that led her to become a leading voice in the Montessori movement in this country. Her book offers the clearest and most concise statement of the Montessori method of child development and education available today.

To Educate the Human Potential

Janet Lansbury's advice on respectful parenting is quoted and shared by millions of readers worldwide. Inspired by the pioneering parenting philosophy of her friend and mentor, Magda Gerber, Janet's influential voice encourages parents and child care professionals to perceive babies as unique, capable human beings with natural abilities to learn without being taught; to develop motor and cognitive skills; communicate; face age appropriate struggles; initiate and direct independent play for extended periods; and much more. Once we are able to view our children in this light, even the most common daily parenting experiences become stimulating opportunities to learn, discover, and to connect with our child. "Elevating Child Care" is a collection of 30 popular and widely read articles from Janet's website that focus on some of the most common infant/toddler issues: eating, sleeping, diaper changes, communication, separation, focus and attention span, creativity, boundaries, and more. Eschewing the quick-fix 'tips and tricks' of popular parenting culture, Janet's insightful philosophy lays the foundation for a closer, more fulfilling parent/child relationship, and children who grow up to be authentic,

confident, successful adults.

The Tao of Montessori

Hatching the Cosmic Egg

"If, like some, you regret that Montessori too rarely in her writings appreciated the humanity of teachers-their creativity, their curiosity, their doubts-this book stands as the perfect complement."-Jola-Montessori.com Evocative and unique, The Tao of Montessori offers a quiet balance to the noisy demands of teaching and parenting through a special blend of encouraging verse. Award-winning Montessori teacher Catherine McTamaney revisits the eighty-one verses of Lao-tzu's Tao Te Ching and relates them to the life and work of teachers, parents, and children. Originally meant to remind rather than direct and to show the way toward natural harmony in the world around and within us, Lao-tzu's verses find a new meaning through McTamaney's skillful mixture of spirituality and education. Take a moment to read a single stanza, then put it aside and muse upon its meaning. By revisiting one verse each day, you can relate its images to your life as a teacher, parent, or child. Whether you are familiar with the writings of Lao-tzu or are simply ready to explore a refreshingly contemplative perspective on children and teachers, The Tao of Montessori is a profound work of intellectual stimulation.

The Montessori Way

This book is intended to follow Education for a New World and to help teachers to envisage the child's needs after the age of six. We claim that the average boy or girl of twelve years who has been educated till then at one of our schools knows at least as much as the finished High School product of several years' seniority, and the achievement has been at no cost of pain or distortion to body or mind. Rather are our pupils equipped in their whole being for the adventure of life, accustomed to the free exercise of will and judgment, illuminated by imagination and enthusiasm. Only such pupils can exercise rightly the duties of citizens in a civilised commonwealth. The first four chapters are mainly psychological, showing the changed personality with which the teacher has to deal at six years of age, and the need for a corresponding change of approach. The secret of success is found to lie in the right use of imagination in awakening interest, and the stimulation of seeds of interest already sown by attractive literary and pictorial material, but all correlated to a central idea, of greatly ennobling inspiration—the Cosmic Plan, in which all, consciously or unconsciously, serve the great Purpose of Life. It is shown how the conception of evolution has been modified of late through geological and biological discoveries, so that self-perfection now has to yield precedence to service among the primary natural urges. The next eight chapters show how the Cosmic Plan can be presented to the child, as a thrilling tale of the earth we live in, its many changes through slow ages when water was

Nature's chief toiler for accomplishment of her purposes, how land and sea fought for supremacy, and how equilibrium of elements was achieved, that Life might appear on the stage to play its part in the great drama. Illustrated as it must be by fascinating, charts and diagrams, the creation of earth as we now know it unfolds before the child's imagination, and always with emphasis on the function each agent has to perform in Nature's household, whether consciously or unconsciously, failure in this alone leading to extinction. So the talc proceeds till Palaeolithic Man appears, most significantly traced by the tools he used on his environment rather than by physical remains of so slight a creature. The new element of mind is brought to creation by man, and from that time the children are helped to see the great acceleration that has taken place in evolution. They learn to reverence the earliest pioneers, who toiled for purposes unknown to them but now to be recognised. Nomadic men and settlers alike contributed to build up early communities, and by interchanges of war and peace to share and spread social amenities. From chapter thirteen brief descriptions are given of some of the earliest civilizations, particularly with a view to their impacts on each other, showing human society as slowly organising itself towards unity, just as, in the individual human being, organs are built around separate centres of interest, to be later connected by the blood-circulatory system and the nerves, into an integrated human organism. So the child is led, by review of some of the most thrilling epochs of world-history, to see that so far humanity has been in an embryonic stage, and that it is just now emerging into true birth, able to consciously realise its true unity and function. The last chapters go back to the psychological point of view, urging on educators the supreme importance, to the nation and to the world, of the tasks imposed on them. Not in the service of any political or social creed should the teacher work, but in the service of the complete human being, able to exercise in freedom a self-disciplined will and judgment, unperverted by prejudice and undistorted by fear.

The Montessori Method: The Origins of an Educational Innovation: Including an Abridged and Annotated Edition of Maria Montessori's The Montessori Method creates the context in which Maria Montessori developed her philosophy of early childhood education. It examines how a determined young woman overcame the obstacles that blocked the educational and career opportunities in Italy during the late Victorian age. Following Montessori, who was the first woman to earn a medical degree from the University of Rome, the biographical introduction takes her story to the establishment of the first Montessori school: the Casa dei Bambini in the slums of Rome. It then analyzes the sources and influences that shaped the creation of the Montessori philosophy of education. Special attention is given to The Montessori Method as the book that introduced this educational innovation to an American audience. The book is divided into four parts: (1) a biography of Maria Montessori; (2) an introductory commentary on the Montessori Method of Education; (3) an abridged and annotated edition of Maria Montessori's The Montessori Method (1912); (4) related documents.

A Montessori Workbook

If you have a child with challenging behavior problems, this book was written for you! Many components of Dr. Bakers approach based on years of applied research were initially intended for children on the autism spectrum. However, over the years, he has discovered that they are equally applicable to all children with behavior problems. In the first two chapters you will learn what a meltdown is and why children have them. In the subsequent eight chapters, you will learn what to do about them. This book offers logical, flexible strategies for dealing with out-of-control behaviors.

"Free the child's potential, and you will transform him into the world." -Maria Montessori This beginner's guide to the Montessori Method of homeschooling for children ages 2-6 is written by parents who have embraced this method of educating their own children. It was written in hopes of simplifying the process for other parents and caregivers who are considering doing the same. The Montessori Method of education can best be described as an "Aid to Life" rather than a specific method of passing on academic objectives. This guide will help you learn how to bring the environment that your child lives and learns in down to eye-level with him or her. It will teach you how something as simple as getting rid of clutter can enhance the child's learning experience. It will help you to learn tips on integrating everyday activities and tools already in your home into your child's play time so that even during play they're learning real skills that they'll be using for a lifetime. This guide will also be helpful for setting up your child's learning space, creating a daily routine and creating activities that will promote learning and keep your child interested and excited about it. Overall, by learning and implementing the Montessori Method in your home, you are creating a world where everyone is involved and children are thriving. "We cannot create observers by saying 'observe', but by giving them the power and the means for this observation and these means are procured through education of the senses." -Maria Montessori

Child's Play

Montessori Reading Workbook

Traditional American schooling is in constant crisis because it is based on two poor models for children's learning: the school as a factory and the child as a blank slate. School reforms repeatedly fail by not penetrating these models. One hundred years ago, Maria Montessori, the first female physician in Italy, devised a very different method of educating children, based on her observations of how they naturally learn. Does Montessori education provide a viable alternative to traditional schooling? Do Dr. Montessori's theories and practices stand up to the scrutiny of modern-day developmental psychology? Can developmental psychology tell us anything about how and why Montessori methods work? In Montessori, the author shows that science has finally caught up with Maria Montessori: Current scientific research provides astounding support for her major insights. She presents the research concerning eight insights that are foundational to Montessori education and describes how each of these insights is applied in the Montessori classroom. In reading this book, parents and teachers alike will develop a clear understanding of what happens in a Montessori classroom and, more important, why it happens and why it works. Montessori however, does much more than explain the scientific basis for Montessori's system. Amid the clamor for evidence-based education, this book presents the studies that show how children learn best, makes clear why many traditional practices come up short, and describes an ingenious alternative that works. Everyone interested in education, at all levels and in all forms, will take from this book a wealth of insights on how to improve teaching effectiveness. Montessori is indispensable reading for anyone interested in what psychologists know about human learning and development.

Montessori: A Modern Approach

Paula Lillard, director of a Montessori school ranging in age from 18 months to fifteen years, provides a clear and cogent introduction to the Montessori program for the elementary and later years. In detailed accounts, Lillard shows how children acquire the skills to answer their own questions, learn to manage freedom with responsibility, and maintain a high level of intellectual stimulation by using the Montessori method. This is an essential handbook for parents and teachers who have chosen the Montessori alternative for the older child.

2019 Reprint of 1936 First Edition. Full facsimile of the original edition, not reproduced with Optical Recognition software. Few people have had as dramatic an influence on modern ideas of child education as Maria Montessori. Born in 1870, Montessori was an Italian physician and educator. Maria drew on her own experiences working with children as well as insights from her Roman Catholic faith to pioneer a new way to help children learn. Her approach, known as the Montessori Method, continues to be used with great success today. In the preface to Maria Montessori's treatise on childhood learning *The Secret of Childhood*, Maria's son Mario clearly articulates the vision that his mother shared. In the first words of this preface, he writes: "Today's problems with regard to youth and childhood are the most patent proof that teaching is not the most important part of education. Yet the delusion persists that teachers form the person through their teaching of the child." At the center of the Montessori way is an understanding of the child as a person worthy of respect. She writes, "I have come to appreciate the fact that children have a deep sense of personal dignity. Adults, as a rule, have no concept of how easily they are wounded and oppressed."
