Engineering Physics

This book is derived from lecture notes for a course on Fourier analysis for engineering and science students at the advanced undergraduate or beginning graduate level. Beyond teaching specific topics and techniques—all of which are important in many areas of engineering and science—the author's goal is to help engineering and science students cultivate more advanced mathematical know-how and increase confidence in learning and using mathematics, as well as appreciate the coherence of the subject. He promises the readers a little magic on every page. The section headings are all recognizable to mathematicians, but the arrangement and emphasis are directed toward students from other disciplines. The material also serves as a foundation for advanced courses in signal processing and imaging. There are over 200 problems, many of which are oriented to applications, and a number use standard software. An unusual feature for courses meant for engineers is a more detailed and accessible treatment of distributions and the generalized Fourier transform. There is also more coverage of higher-dimensional phenomena than is found in most books at this level.

The Love is a book about Soborno Isaac Bari, a four-year-old Muslim child who launched a campaign to create a world without terrorism. The book is divided into two parts: (1) Soborno's fight with Imams to change their perception on non-Muslims and (2) his fights with Muslim Americans to denounce terrorism and be patriotic. Millions of people joined his campaign across the world—especially people in Bangladesh where two young Muslim students, Sadiyan Lima (Dhaka University) and Marjia Farzana (Jahangirnagar University), led the movement on behalf of their respective universities. It inspired many people, including Zahid Hossain and Safir Biplob and his son, to stand against the terror of the Islamic State. Zahid published Soborno's biography, while Safir and his son went to 64,000 villages in Bangladesh posting 64,000 posters. Meanwhile, Uday Bengali made a documentary, I Love Christmas, which created an anti-terrorism movement around Bangladesh that is based on the philosophy of Soborno.
