to your devices with hand gestures. Practically all surfaces have become a screen, and each screen watches you back. Robots and AI took over your old job but also created a new one for you, work you could not have imagined back in 2016. In *The Inevitable*, Kevin Kelly, the visionary thinker who foresaw the scope of the internet revolution, provides a plausible, optimistic road map for the next 30 years. He shows how the coming changes can be understood as the result of a few long-term forces that are already in motion. Kelly both describes these 12 deep trends—including cognifying our surroundings, valuing access over ownership, tracking everything—and demonstrates how they are codependent on one another. These larger forces will completely revolutionize the way we work, play, learn, buy, and communicate with each other. Ultimately, predicts Kelly, all humans and machines will be linked up into a global matrix, a convergence that will be seen as the largest, most complex, and most surprising event ever up to this time. *The Inevitable* will be indispensable to anyone who seeks guidance on where to position themselves as this new world emerge.

THE INSTANT NEW YORK TIMES BESTSELLER In an era of safe spaces, trigger warnings, and an unprecedented election, the country's youth are in crisis. Senator Ben Sasse warns the nation about the existential threat to America's future. Raised by well-meaning but overprotective parents and coddled by well-meaning but misbegotten government programs, America's youth are ill-equipped to survive in our highly-competitive global economy. Many of the coming-of-age rituals that have defined the American experience since the Founding: learning the value of working with your hands, leaving home to start a family, becoming economically self-reliant—are being delayed or skipped altogether. The statistics are daunting: 30% of college students drop out after the first year, and only 4 in 10 graduate. One in three 18-to-34 year-olds live with their parents. From these disparate phenomena: Nebraska Senator Ben Sasse who as president of a Midwestern college observed the trials of this generation up close, sees an existential threat to the American way of life. In *The Vanishing American Adult*, Sasse diagnoses the causes of a generation that can't grow up and offers a path for raising children to become active and engaged citizens. He identifies core formative experiences that all young people should pursue: hard work to appreciate the benefits of labor, travel to understand deprivation and want, the power of reading, the importance of nurturing your body—and explains how parents can encourage them. Our democracy depends on responsible, contributing adults to function

properly—without them America falls prey to populist demagogues. A call to arms, *The Vanishing American Adult* will ignite a much-needed debate about the link between the way we're raising our children and the future of our country.

How maverick companies have passed up the growth treadmill — and focused on greatness instead. It's an axiom of business that great companies grow their revenues and profits year after year. Yet quietly, under the radar, a small number of companies have rejected the pressure of endless growth to focus on more satisfying business goals. Goals like being great at what they do, creating a great place to work, providing great customer service, making great contributions to their communities, and finding great ways to lead their lives. In *Small Giants*, veteran journalist Bo Burlingham takes us deep inside fourteen remarkable companies that have chosen to march to their own drummer. They include Anchor Brewing, the original microbrewer; CitiStorage Inc., the premier independent records-storage business; Clif Bar & Co., maker of organic energy bars and other nutrition foods; Righteous Babe Records, the record company founded by singer-songwriter Ani DiFranco; Union Square Hospitality Group, the company of restaurateur Danny Meyer; and Zingerman's Community of Businesses, including the world-famous Zingerman's Deli of Ann Arbor. Burlingham shows how the leaders of these small giants recognized the full range of choices they had about

the type of company they could create. And he shows how we can all benefit by questioning the usual definitions of business success. In his new afterward, Burlingham reflects on the similarities and learning lessons from the small giants he covers in the book. From the Hardcover edition.

Do You Talk Funny?

Public speaking can be terrifying. For David Nihill, the idea of standing in front of an audience was scarier than cliff jumping into a thorny pit of spiders and mothers-in-law. Without a parachute or advanced weaponry. Something had to change. In what doesn't sound like the best plan ever, David decided to overcome his fears by pretending to be an accomplished comedian called "Irish Dave" for one full year, crashing as many comedy clubs, festivals, and shows as possible. One part of the plan was at least logical: he was already Irish and already called Dave. In one year, David went from being deathly afraid of public speaking to hosting a business conference, regularly performing stand-up comedy and winning storytelling competitions in front of packed houses. And he did it by learning from some of the best public speakers in the world: stand-up comedians. *Do You Talk Funny?: 7 Comedy Habits to Become a Better (and Funnier) Public Speaker* shows how the key principles of stand-up comedy can be applied to your speaking engagements and presentations to make you funnier, more interesting, and better looking. (Or at least two of the three.) Whether you are preparing for a business presentation, giving a wedding toast, defending your thesis, raising money from investors, or

simply want to take on something you're afraid of, this book will take you from sweaty to stage-ready. You'll learn how to: - Craft a story and content that your audience will want to listen to - Find the funniest parts of your material and how to get to them faster - Deal with stage fright - Master the two most important parts of your performance: timing and delivery Ten percent of the author's proceeds from this book will go to Arash Bayatmakou via Help Hope Live until he is fully back on his feet and thereafter to one of the many facing the same challenges after suffering a severe spinal cord injury.

This volume presents a state-of-the-science review of the most promising current European research -- and its historic roots of research -- on complex problem solving (CPS) in Europe. It is an attempt to close the knowledge gap among American scholars regarding the European approach to understanding CPS. Although most of the American researchers are well aware of the fact that CPS has been a very active research area in Europe for quite some time, they do not know any specifics about even the most important research. Part of the reason for this lack of knowledge is undoubtedly the fact that European researchers -- for the most part -- have been rather reluctant to publish their work in English-language journals. The book concentrates on European research because the basic approach European scholars have taken to studying CPS is very different from one taken by North American researchers. Traditionally, American scholars have been studying CPS in "natural" domains -- physics, reading, writing, and chess playing -- concentrating primarily on exploring novice-expert differences and the acquisition of a complex skill. European scholars, in contrast, have been primarily concerned with problem solving behavior in artificially generated, mostly computerized, complex systems. While the American approach has the advantage of high external validity, the European approach has the advantage of system variables that can be systematically manipulated to reveal the effects of system parameters on CPS behavior. The two approaches are thus best viewed as complementing each other. This volume contains contributions from four European countries -- Sweden, Switzerland, Great Britain, and Germany. As such, it accurately represents

the bulk of empirical research on CPS which has been conducted in Europe. An international cooperation started two years ago with the goal of bringing the European research on complex problem solving to the awareness of American scholars. A direct result of that effort, the contributions to this book are both informative and comprehensive.

Why do we do the things we do? Over a decade in the making, this game-changing book is Robert Sapolsky's genre-shattering attempt to answer that question as fully as perhaps only he could, looking at it from every angle. Sapolsky's storytelling concept is delightful but it also has a powerful intrinsic logic: he starts by looking at the factors that bear on a person's reaction in the precise moment a behavior occurs, and then hops back in time from there, in stages, ultimately ending up at the deep history of our species and its genetic inheritance. And so the first category of explanation is the neurobiological one. What goes on in a person's brain a second before the behavior happens? Then he pulls out to a slightly larger

field of vision, a little earlier in time: What sight, sound, or smell triggers the nervous system to produce that behavior? And then, what hormones act hours to days earlier to change how responsive that individual is to the stimuli which trigger the nervous system? By now, he has increased our field of vision so that we are thinking about neurobiology and the sensory world of our environment and endocrinology in trying to explain what happened. Sapolsky keeps going--next to what features of the environment affected that person's brain, and then back to the childhood of the individual, and then to their genetic makeup. Finally, he expands the view to encompass factors larger than that one individual. How culture has shaped that individual's group, what ecological factors helped shape that culture, and on and on, back to evolutionary factors thousands and even millions of years old. The result is one of the most dazzling tours de horizon of the science of human behavior ever attempted, a majestic synthesis that harvests cutting-edge research across a range of disciplines to provide a subtle and nuanced perspective on why we ultimately do the things we do for good and for ill. Sapolsky builds on this understanding to wrestle with some of our deepest and thorniest questions relating to tribalism and xenophobia, hierarchy and competition, morality and free will, and war and peace. Wise, humane, often very funny, *Behave* is a towering achievement, powerfully humanizing, and downright heroic in its own right.

When a career-ending injury left elite athlete and professional football player Lewis Howes out of work and living on his sister's couch, he decided he needed to make a change for the better. He started by reaching out to people he admired, searching for mentors, and applying his past coaches' advice from sports to life off the field. Lewis did more than bounce back: He built a multimillion-dollar online business and is now a sought-after business coach, speaker, and podcast host. In *The School of Greatness*, Howes shares the essential tips and habits he gathered in interviewing "the greats" on his wildly popular podcast of the same name. In discussion with people like Olympic gold medalist Shawn Johnson and Pencils of Promise CEO Adam Braun, Howes figured out that greatness is unearthed and cultivated from within. A framework for personal development, *The School of Greatness* gives you the tools, knowledge,
