What are Journalists For?

Colonel G.W.L. Nicholson's Canadian Expeditionary Force, 1914-1919 was first published by the Department of National Defence in 1962 as the official history of the Canadian Army's involvement in the First World War. Immediately after the war ended Colonel A. Fortescue Duguid made a first attempt to

write an official history of the war, but the ill-fated project produced only the first of an anticipated eight volumes. Decades later, G.W.L. Nicholson - already the author of an official history of the Second World War - was commissioned to write a new official history of the First. Illustrated with numerous photographs and full-colour maps, Nicholson's text offers an authoritative account of the war effort, while also discussing politics on the home front, including debates around conscription in 1917. With a new critical introduction by Mark Osborne Humphries that traces the development of Nicholson's text and analyzes its legacy, *Canadian Expeditionary Force, 1914-1919* is an essential resource for both professional historians and military history enthusiasts.

The Savage War

Diagrams, formulas, and text provide guidelines in problems involving the basic types of gears

Global Change Research

A middle grade novel about a 12-year-old girl dealing with loss, who uncovers a rather grisly scam involving a crematorium. After her brother, sister, and father die in a plane crash, Daralynn Oakland receives 237 dolls from well-wishers, resulting in her nickname: Dolly. But dolls are little comfort to a twelve-year-old girl whose world is rocked by the dramatic changes in her life, including her angry, grieving mother's new job as a hairstylist at the local funeral home. Dolly

gets a job, too, where she accidentally invents a fashionable new haircut. But in *Grounded* by Kate Klise, her real work begins when a crematorium comes to town, and someone has to save a dying business, solve a burning mystery, and resuscitate the broken hearts in Digginsville, Missouri, population 402.

Elly: My True Story of the Holocaust

"This compact narrative history of government institutions and their dialectical relation to society makes a perfect introduction to traditional China for political science, modern history, and comparative politics classes. The thesis, upheld by both specifics in lively prose and thought-provoking cross-period comparisons, is that unity, however valorized, always required hard work: military, political, and cultural creativity amidst ever-changing ethnic, class, and religious formations. Dardess also washes out old libels on non-Han, female, and eunuch power holders simply by recounting the facts." --S. Schneewind, University of California, San Diego

Lions' Commentary on UNIX 6th Edition with Source Code

In *Waging Modern War*, General Wesley K. Clark recounts his experience leading NATO's forces to a hard-fought and ultimately successful victory in Kosovo in 1999. As the American military machine has swung into action in the months following the attacks on the World Trade Center and the Pentagon, it has become clear that the lessons of Kosovo are directly applicable to the war against terrorism and the nations that sponsor it. The problems posed, and overcome, in the war in Kosovo-how to fight an air war against unconventional forces in rough terrain and how to coordinate U.S. objectives with those of other nations-are the problems that America increasingly faces in the today's world. As the Los Angeles Times noted in late September of 2001, this book's "lessons are highly relevant now.... We need to think about exactly what steps will lessen, rather than increase, the terrorist threat. And we also need innovative commanders willing to improvise to meet a new kind of threat, more determined political

leadership, a more flexible outlook in the Pentagon.... Gen. Clark has performed another service by highlighting these problems at a crucial moment in American history." *Waging Modern War* is history, memoir, guidebook, and forecast, essential reading for those who want to know how modern war is fought, and won.

Slander

Covering training, manning, equipment, and combat efforts, this is first full non-offical history of the Canadian Army's operations from the summer of 1950 to the ceasefire of 1953.

A History of Journalism in Canada

American politics and political economy series.

The Unexpected War

For the past 20 years, UNIX insiders have cherished and zealously guarded pirated photocopies of this manuscript, a "hacker trophy" of sorts. Now legal (and legible) copies are available. An international "who's who" of UNIX wizards, including Dennis Ritchie, have contributed essays extolling the merits and importance of this underground classic.

Grounded

China's Arctic Aspirations is the first book to address China's ever increasing interest in the Arctic, and in

Canada's Far North in particular. It offers a holistic approach to the subject - covering resource development, shipping, scientific research, governance, and military strategy - to better understand both Chinese motivations and the potential impacts of a greater Chinese presence in the circumpolar region. The book draws on extensive research into published Chinese government documentation, secondary source analysis, business and media reports, and the existing academic literature.

A Military History of Canada

The controversial weekly columnist presents an assessment of liberalism in relation to mob behavior, detailing how the Democratic Party relies on mobs and mob thinking in the promotion of its agenda.

How To Talk To A Liberal (If You Must)

Long Night of the Tankers is the story of the German effort to cut the Caribbean off from Britain, the United States and Canada and the desperate defence mounted by the Allies, along with a half dozen other Caribbean and South American nations. The loss of the oil threatened Britain's ability to wage war; the loss of the tankers almost strangled the oil supply to America's industrial north east. When even Churchill and Roosevelt began to worry about the vulnerable Caribbean, the US and its allies poured thousands of men, hundreds of aircraft and dozens of ships into the Caribbean region, organized an effective convoy

system and rallied the Central and South American nations against the Germans. By mid 1944, the Caribbean had become an Allied lake and the submarine threat was defeated. But to this day, the old timers of the islands still remember the oil-soaked beaches, the explosions in the night and the bodies of dead sailors washed ashore that marked this dramatic chapter in the Second World War.

In These Words

Canada's role as world power and its sense of itself in the global landscape has been largely shaped and defined over the past 100 years by the changing policies and personalities in the Department of Foreign Affairs and International Trade (DFAIT). This engaging and provocative book brings together fifteen of the country's leading historians and political scientists to discuss a century of Canada's national interests and DFAIT's role in defining and pursuing them. Accomplished and influential analysts such as Jack Granatstein, Norman Hillmer, and Nelson Michaud, are joined by rising stars like Whitney Lackenbauer, Adam Chapnick, and Tammy Nemeth in commenting on the history and future implications of Canada's foreign policy. In the *National Interest* gives fresh insight into the Canada First concept in the 1920s, the North American security issues in the 1930s, Canada's vision for the United Nations, early security warnings in the Arctic, the rise of the international francophone community, conflicting continental visions over energy, and Canada/U.S. policy discussions. The impact of politicians and

senior bureaucrats such as O D Skelton, Lester B Pearson, Marcel Cadieux, Jules Leger, Pierre Trudeau and Brian Mulroney are set against issues such as national defence, popular opinion, human rights, and energy production. In the National Interest also provides a platform for discussion about Canada's future role on the international stage. With its unique combination of administrative and policy history, In the National Interest is in a field of its own.

The Frontier of Patriotism

"Canada's Army traces the full three-hundred year history of the Canadian military from its origins in New France to the Conquest, the Revolutionary War and the War of 1812; from South Africa and the two World Wars to the Korean War and contemporary peacekeeping efforts, and the War in Afghanistan. Granatstein points to the inevitable continuation of armed conflict around the world and makes a compelling case for Canada to maintain properly equipped and professional armed forces."--pub. desc.

The Spectacle of Accumulation

Noncircular Gears: Design and Generation represents the extension of the modern theory of gearing applied to the design and manufacture of the main types of noncircular gears: conventional and modified elliptical gears, eccentric gears, oval gears, gears with lobes, and twisted gears. This book is enhanced by updated theoretical description of the methods of generation of noncircular gears by enveloping methods similar to

those applied to the generation of circular gears. *Noncircular Gears: Design and Generation* also offers new developments directed to extend the application of noncircular gears for output speed variation and generation of functions. Numerous numerical examples show the application of the developed theory. This book aims to extend the application of noncircular gear drives in mechanisms and industry.

Maple Leaf Against the Axis

An incisive account of the Persian Gulf War, *Storm Over Iraq* shows how the success of Operation Desert Storm was the product of two decades of profound changes in the American approach to defense, military doctrine, and combat operations. The first detailed analysis of why the Gulf War could be fought the way it was, the book examines the planning and preparation for war. Richard P. Hallion argues that the ascendancy of precision air power in warfare—which fulfilled the promise that air power had held for more than seventy-five years—reflects the revolutionary adaptation of a war strategy that targets things rather than people, allowing one to control an opposing nation without destroying it.

Demonic

Told in short, gripping chapters, this is an unforgettable true story of survival. The author was featured in Steven Spielberg's *Survivors of the Shoah Visual History Foundation*. At just 15, her mother, and brother were taken from their Romanian town to the

Auschwitz-II/Birkenau concentration camp. When they arrived at Auschwitz, a soldier waved Elly to the right; her mother and brother to the left. She never saw her family alive again. Thanks to a series of miracles, Elly survived the Holocaust. Today she is dedicated to keeping alive the stories of those who did not. Elly appeared on CBS's 60 Minutes for her involvement in bringing an important lawsuit against Volkswagen, whose German factory used her and other Jews as slave laborers.

Fifteen Days

Through a series of interviews with top Canadian investigative journalists, Investigative Reporting in Canada engages students as they evaluate key investigative reporting techniques and challenges, while at the same time inspiring them to employ these techniques in their own work. Each chapter focuses on an award-winning article or series, and includes a discussion of what prompted the journalist to cover the story, how they conducted their investigation, what obstacles were encountered, what techniques were employed, and what lessons were learned. This is an essential text for any college or university course on investigative reporting.

Long Night of the Tankers

The conservative columnist shares her thoughts on topics from political correctness and foreign policy to the media, in a collection of her commentaries accompanied by responses from readers on both

sides of the political spectrum.

Financial management workbook

He traces the intellectual roots of the movement and shows how journalism can be made vital again by rethinking exactly what journalists are for."--Jacket.

Blood on the Hills

On the tenth anniversary of Canada's involvement, a leading journalist offers a fascinating assessment of Canada's past and present role in the Afghan war. Of the 33,000 troops under NATO command in Afghanistan in October 2006, 12,000 were Americans and 2,500 were Canadians. Deployed to southern Afghanistan, the Canadian forces were charged with ending the violent insurgency in Kandahar Province. *The Savage War* offers a compelling look at how the war has been conducted by Canada and its allies on the ground and at the highest echelons. With unprecedented access to classified documents and the exceptional storytelling skills that have made him an award-winning reporter, Murray Brewster offers a powerful new perspective on the war.

Neuro-dynamic Programming

Spherical Nanoindentation Stress-Strain Curves: Applications, Protocols and Data Analysis brings to light the recent advancements in data analysis protocols that have transformed indentation from being used merely as a qualitative tool for comparing

materials to its more rigorous application for analyzing the stress-strain characteristics of materials. This book collects and presents all of the important details of the key protocols, many of them recently developed, for the convenience of engineers and scientists in the materials manufacturing industry, OEMs, research laboratories, and academic institutions. Authors Kalidindi and Pathak explain the protocols used in generating indentation stress-strain curves and extracting meaningful properties from measured load-displacement data in spherical nanoindentation, also demystifying the use of nanoindentation as a material characterization tool that provides robust quantitative assessment of a material's mechanical properties. Materials covered ranges from metals to biomaterials, and includes the use of new data analysis protocols to establish estimates of mechanical properties from the initial loading segment in the indentation experiments, the potential of characterizing the samples with indentation in conjunction with other structure quantification, techniques used to establish novel protocols for extracting new information needed to formulate material, constitutive laws at the lower length scales, the combined use of orientation imaging microscopy (OIM) and nanoindentation, the combined use of Raman spectroscopy and nanoindentation on bio-samples, and new insights into the buckling response in dense carbon nanotube (CNT) brushes. Provides datasets for a broad range of materials systems, ranging from metals to biological materials) Fully analyzes examples included, with details of the analysis steps Contains methods and protocols that are provided with enough detail for

replication in the lab Includes important tips and guidance on how best to prepare samples for successful measurements

The Generals

Textbook

Governing China

This is a close and revealing account of the last great European war of the twentieth century. Written by a journalist who witnessed the Balkan conflagration and its aftermath, it presents a gripping analysis of the origins of the Serb-Albanian conflict, the course of the battle, the involvement of the Western powers, the issues and the personalities, and the options for the future. Tim Judah sets the conflict in its full historical context. He explains how Kosovo became the crucible of a poisonous ethnic struggle between Serbs and Albanians that led to the destruction of the old Yugoslavia. He analyzes the character and career of Slobodan Milosevic and tells how Kosovo provided the springboard for him to mobilize the Serbs and seize supreme power. He reveals details of the lost opportunity of the February 1999 Rambouillet conference for peace and compromise in the southern Balkans. He describes how exiled Kosovar militants could take their war from Swiss cafés to the mountains of northern Albania. And he examines how and why NATO launched its first-ever war - a 78-day campaign of high-tech air strikes against Serbia - believing the onslaught would be over in days.

China's Arctic Ambitions and What They Mean for Canada

Long before she made her first trip to Afghanistan as an embedded reporter for The Globe and Mail, Christie Blatchford was already one of Canada's most respected and eagerly read journalists. Her vivid prose, her unmistakable voice, her ability to connect emotionally with her subjects and readers, her hard-won and hard-nosed skills as a reporter—these had already established her as a household name. But with her many reports from Afghanistan, and in dozens of interviews with the returned members of the 1st Battalion, Princess Patricia's Canadian Light Infantry and others back at home, she found the subject she was born to tackle. Her reporting of the conflict and her deeply empathetic observations of the men and women who wear the maple leaf are words for the ages, fit to stand alongside the nation's best writing on war. It is a testament to Christie Blatchford's skills and integrity that along with the admiration of her readers, she won the respect and trust of the soldiers. They share breathtakingly honest accounts of their desire to serve, their willingness to confront fear and danger in the battlefield, their loyalty towards each other and the heartbreak occasioned by the loss of one of their own. Grounded in insights gained over the course of three trips to Afghanistan in 2006, and drawing on hundreds of hours of interviews not only with the servicemen and -women with whom she shared so much, but with their commanders and family members as well, Christie Blatchford creates a detailed, complex and

deeply affecting picture of military life in the twenty-first century. From the Hardcover edition.

In the National Interest

Politics as Symbolic Action: Mass Arousal and Quiescence deals with the dynamics of development of political threats related to political behavior. The book discusses the conditions under which the dynamics related to political behavior are the prior causes of political arousal, violence, and quiescence. The text examines the influence of governmental activity on people's beliefs and perceptions—how non-empirical cognitions become the resistant basis of change. The text also examines how the individual phenomenon and the group phenomenon become linked through symbol formation and myths. The book discusses emotion as a catalyst of political ritual and political violence as inferred from Theodore Sarbin's role theory. The use of metaphors, language forms, and mass tensions can all be social-psychological and political processes that can lead to political arousal or quiescence. The book also explains major violent disturbances as having patterns reflective of organization, disorganization, or by leadership example; the book notes the popular notion that the organization or the leader's direction starts or worsens the violence as very simplistic. The book then proposes that political perceptions and beliefs are changeable and that phenomenological perceptions of specific groups of people can identify which political behavior are systematic. The text is suitable for political analysts, political scientists,

sociologists, and educators involved in group psychology and analyses.

Kosovo

A compilation of hundreds of quotations by the controversial conservative spokesperson offers observations on Democrats, dating, environmentalism, religion, evolution, Reagan, terrorism, television, and hundreds of other topics.

Noncircular Gears

Is Canada really "a peaceable kingdom" with "an unmilitary people"? Desmond Morton says no. This is a country that has been shaped, divided, and transformed by war - there is no greater influence in Canadian history, recent or remote. Through the Cold War, the Gulf War, and after, Canadians had to make difficult decisions about defence and foreign policy, and these events have shaped the country,

developing our industries, changing the role of women, realigning our political factions, and changing Canada's status in the world.

Storm Over Iraq

With our troops now committed until 2011, "The Unexpected War" exposes the poverty of Canadian foreign policy, arguing that Canada's various military missions in Afghanistan have been "ad hoc" in nature and made on the basis of political calculations--often flawed--about Canadian-American relations. Drawing upon interviews with key decision-makers and advisors, and a first-hand account by a former Defense Ministry insider, the book offers a gripping account of how Canada became embroiled in a new kind of war--fighting insurgency in a failed state.

Gear Design Simplified

Waging Modern War

Neuro-dynamic programming, also known as reinforcement learning, is a recent methodology that can be used to solve very large and complex stochastic decision and control problems. It combines simulation, learning, neural networks or other approximation architectures, and the central ideas in dynamic programming. This book provides the first systematic presentation of the science and the art behind this promising methodology. It presents and unifies a large number of NDP methods, including

several that are new; provides a rigorous development of the mathematical principles behind NDP; illustrates through case studies the practical application of NDP to complex problems and includes extensive background on dynamic programming and neural network training.

Investigative Reporting in Canada

Politics as Symbolic Action

The hottest and most controversial book of the year! Find out who really controls the media in America. “[Ann Coulter] is never in doubt. And that, along with her bright writing, sense of irony and outrage, and her relish at finally hitting back at political opponents (especially in the media) is what makes Slander such refreshing and provocative reading.” —Los Angeles Times “[Ann Coulter] is a fluent polemicist with a gift for Menckenesque invective . . . and she can harness such language to subtle, syllogistic argument.” —Washington Post Book World “The most popular nonfiction book in America.”—New York Times “The real value of Slander . . . is not in the jokes or devastating exposés of liberal politicians and their allies, but the serious and scholarly study of just how entrenched the media prejudice is against anyone whose politics are even faintly conservative.” —New York Sun “Written with a great deal of passion . . . the real source of its strength—and its usefulness—was its painstaking marshalling of evidence . . . More important than [High Crimes and Misdemeanors]

because it addresses a much broader issue, and one of lasting significance.”—National Review From the Trade Paperback edition.

From Kinshasa to Kandahar

Maple Leaf Against the Axis is a compelling recounting of the Second World War and the Canadians who fought it. Here, in all its passion and drama, is the story of how the Canadian army, navy and air force fought in battles ranging from Hong Kong to the Rhine River crossing. David Bercuson, one of Canada's preeminent military historians, covers the war on the ground, the naval war in the North Atlantic and elsewhere, and the air war—both the bomber offensive and the story of those Canadians who flew everything from Canso reconnaissance aircraft in the Indian Ocean to Typhoon fighter bombers with the Second Tactical Air Force in Europe. And he does it through recounting the stories of the men and women who were there and played a significant role in the Allied victory.
