Schaum's Quick Guide to Writing Great Research Papers

This is the first book-length examination of Spartan women, covering over a thousand years in the history of women from both the elite and lower classes. Classicist Sarah B. Pomeroy comprehensively analyzes ancient texts and archaeological evidence to construct the world of these elusive though much noticed females. Sparta has always posed a challenge to ancient historians because information about the society is relatively scarce. Most existing scholarship on Sparta concerns the military history of the city and its heavily male-dominated social structure--almost as if there were no women in Sparta. Yet perhaps the most famous of mythic Greek women, Menelaus' wife Helen, the cause of the Trojan War, was herself a Spartan. Written by one of the leading authorities on women in antiquity, Spartan Women reconstructs the lives and the world of Sparta's women, including how their status changed over time and how they held on to their surprising autonomy. Proceeding through the archaic, classical, Hellenistic, and Roman periods, Spartan Women includes discussions of education, family life, reproduction, religion, and athletics.

Key features include: A consideration of the value of numerous therapeutic strategies to diminish distress and stress-related pathologies. An exploration of many new conceptual perspectives relevant to stress processes and pathology. The Gift of the Magi is a treasured short story written by O. Henry. A young and very much in love couple can barely afford their one-room apartment, let alone the extra expense of getting Christmas presents for one another. But each is determined to show their love for the other in this traditional time of giving; each sells a thing they hold most dear in order to afford a present, with poignant and touching results that capture their love for one another.

Values and Ethics in Social Work Practice

The author of the world wide best-seller, Small Is Beautiful, now tackles the subject of Man, the World, and the Meaning of Living. Schumacher writes about man's relation to the world. man has obligations -- to other men, to the earth, to progress and technology, but most importantly himself. If man can fulfill these obligations, then and only then can he enjoy a real relationship with the world, then and only then can he know the meaning of living. Schumacher says we need maps: a "map of knowledge" and a "map of living." The concern of the mapmaker--in this instance, Schumacher--is to find for everything it's proper place. Things out of place tend to get lost; they become invisible and there proper places end to be filled by other things that ought not be there at all and therefore serve to mislead. A Guide for the Perplexed teaches us to be our own map makers. This constantly surprising, always stimulating book will be welcomed by a large audience, including the many new fans who believe strongly in what Schumacher has to say.

Reporting Quantitative Research in Psychology

With the rise of science, we moderns believe, the world changed irrevocably, separating us forever from our primitive, premodern ancestors. But if we were to let go of this fond conviction, Bruno Latour asks, what would the world look like? His book, an anthropology of science, shows us how much of modernity is actually a matter of faith. What does it mean to be modern? What difference does the scientific method make? The difference, Latour explains, is in our careful distinctions between nature and society, between human and thing, distinctions that our benighted ancestors, in their world of alchemy, astrology, and phrenology, never made. But alongside this purifying practice that defines modernity, there exists another seemingly contrary one: the construction of systems that mix politics, science, technology, and nature. The ozone debate is such a hybrid, in Latour's analysis, as are global warming, deforestation, even the idea of black holes. As these hybrids proliferate, the prospect of keeping nature and culture in their separate mental chambers becomes overwhelming—and rather than try, Latour suggests, we should rethink our distinctions, rethink the definition and constitution of modernity itself. His book offers a new explanation of science that finally recognizes the connections between nature and culture—and so, between our culture and others, past and present. Nothing short of a reworking of our mental landscape. We Have Never Been Modern blurs the boundaries among science, the humanities, and the social sciences to enhance understanding on all sides. A summation of the work of one of the most influential and provocative interpreters of science, it aims at saving what is good and valuable in modernity and replacing the rest with a broader, fairer, and finer sense of possibility.

"This book offers practical guidance for understanding and implementing the American Psychological Association's Journal Article Reporting Standards for Quantitative Research (JARS-Quant) and Meta-Analysis Reporting Standards (MARS). Housed on the campus of the University of Michigan in Ann Arbor, the University Musical Society is one of the oldest performing arts presenters in the country. A past recipient of the National Medal of Arts, the nation's highest public artistic honor, UMS connects audiences with wide-ranging performances in music, dance, and theater each season. Between 1987 and 2017, UMS was led by Ken Fischer, who over three decades pursued an ambitious campaign to expand and diversify the organization's programming and audiences—initiatives inspired by Fischer's overarching philosophy toward promoting

the arts, “Everybody In, Nobody Out.” The approach not only deepened UMS’s engagement with the university and southeast Michigan communities, it led to exemplary partnerships with distinguished artists across the world. Under Fischer’s leadership, UMS hosted numerous breakthrough performances, including the Vienna Philharmonic’s final tour with Leonard Bernstein, appearances by then relatively unknown opera singer Cecilia Bartoli, a multiyear partnership with the Royal Shakespeare Company, and artists as diverse as Yo-Yo Ma, Jawole Willa Jo Zollar, Elizabeth Streb, and Nusrat Fateh Ali Khan. Though peppered with colorful anecdotes of how these successes came to be, this book is neither a history of UMS nor a memoir of Fischer’s significant accomplishments with the organization. Rather it is a reflection on the power of the performing arts to engage and enrich communities—not by handing down cultural enrichment from on high, but by meeting communities where they live and helping them preserve cultural heritage, incubate talent, and find ways to make community voices heard.

Handbook of Social Psychology

"Reporting standards are guidelines that describe how to communicate findings clearly in journal articles so that readers can access and understand the story of the research endeavor. Recognizing that reporting standards can aid authors in the process of writing and evaluating manuscripts and editors and reviewers in the process of evaluating those manuscripts, the Publications and Communications (P&C) Board of the American Psychological Association (APA) invited two task forces of researchers to develop standards for reporting quantitative and qualitative research in journal articles. The Quantitative Journal Article Reporting Standards Working Group developed standards for quantitative research, and a separate book details those standards. This book discusses the reporting standards. It permits the space to expand on the ideas in those standards and to articulate the rationale behind each. It articulates decisions one may need to make as an author as one decides how to present their work. It also provides examples to illustrate a strong presentation style, and these can serve as helpful models. It provides the conceptual undergirding for the reporting decisions that authors make during the writing process. The book considers the typical sections of a qualitative research paper--the introductory sections, Method, Results, and Discussion. Guidance is provided for how to best present qualitative research, with rationales and illustrations. The book presents reporting standards for qualitative meta-analyses, which are integrative analyses of findings from across primary qualitative research. The book includes a discussion of objectivist and constructivist rhetorical styles in research reporting."--Preface. (PsycINFO Database Record (c) 2020 APA, all rights reserved).
