Country Wisdom & Know-How

Gene Control offers a current description of how gene expression is controlled in eukaryotes, reviewing and summarizing the extensive primary literature into an easily accessible format. Gene Control is a comprehensively restructured and expanded edition of Latchman's Gene Regulation: A Eukaryotic Perspective, Fifth Edition. The first part of the book deals with the fundamental processes of gene control at the levels of chromatin structure, transcription, and post-transcriptional processes. Three pairs of chapters deal with each of these aspects, first describing the basic process itself, followed by the manner in which it is involved in controlling gene expression. The second part of the book deals with the role of gene control in specific biological processes. Certain chapters deal with the importance of gene control in cellular signaling processes and for normal development of the embryo. Another chapter discusses the key roles played by gene-regulatory processes in the specification of differentiated cell types such as muscle cells and neurons. The final chapters discuss the consequences of errors in gene control; the relationship between gene misregulation and human diseases, especially cancer; and potential therapies designed specifically to target particular levels of gene control. Gene Control will be of value to students in biological sciences, as well as to scientists and clinicians interested in how genes are regulated in health and disease.

""[A] vivid portrait of a world gone insane,"* S. M. Stirling's New York Times bestselling Novels of the Change have depicted a vivid, utterly persuasive, and absorbingly unpredictable postapocalyptic wasteland in which all modern technology has been left in ashes, forcing humankind to rebuild an unknowable new world in the wake of unimaginable--and deliberate--chaos. Now, in this startling new anthology, S. M. Stirling invites the most fertile minds in science

fiction to join him in expanding his rich Emberverse canvas. Here are inventive new perspectives on the cultures, the survivors, and the battles arising across the years and across the globe following the Change. In his all-new story "Hot Night at the Hopping Toad," Stirling returns to his own continuing saga of the High Kingdom of Montival. In the accompanying stories are fortune seekers, voyagers, and dangers--from the ruins of Sydney to the Republic of Fargo and Northern Alberta to Venetian and Greek galleys clashing in the Mediterranean. These new adventures revisit beloved people and places from Stirling's fantastic universe, introduce us to new ones, and deliver endlessly fascinating challenges to conquer, all while unfolding in a "postapocalyptic landscape that illuminates both the best and the worst of which our species is capable,"** "a world you can see, feel, and touch."

CLASSIC DATA STRUCTURES, 2nd ed.

Born and raised in the Carpathian Mountains Cami had the privilege of the teachings of historical lessons of the elders and the privilege to understand and learn about the Power and Healing Properties of Plants and Herbs since childhood. Growing up, there was never a memory of ever getting a cold or having any allergies, there was always many kinds of homemade syrups and teas. Every time our feet got wet or we came in the house frozen from walking a mile back from school in the snow, there was always a natural organic elixir or tea to boost our immune system. At the age of ten she contracted a form of hepatitis, that year was one of the worst years of her life. She was in and out of the hospital getting sicker with other illnesses, more than any child should bear. But it was not until she left the hospital with her Grandmother's care and the homeopathic remedies finally cured her. This was the year when Cami really gained a serious interest in the herbal remedies. Over the next decade she often gave herbal remedies to friend's to cure different ailments. There was always great praise for helping and the request to please write down all the herbal knowledge but school and life kept it in her head. At the age of 25 while overexerting herself between medical studies and

work, Cami collapsed. This time a more powerful hepatitis. Laying in the hospital in a coma for 46 days, when she finally opened her eyes they told her that the hepatitis case was very dire and her liver was in the last stage. The Doctors gave her few days to live. She left the hospital to go home and live out her final days. On her death bed but under the care of an Guardian Angel, who rushed around to gather natural plants known for helping liver disease and hepatitis, shortly after Cami arrived home she was cured through homeopathic remedies. Today, Cami is living proof that herbal remedies are the Miracle Herbs of Nature and God. All you need is to believe and have patience. Most of the herbal medicine takes a little time to work but there are little to no side effects.

Pathobiology of Marine and Estuarine Organisms is a comprehensive, up-to-date review of aquatic animal pathobiology covering infectious and non-infectious diseases of vertebrates such as marine mammals and fishes, in addition to diseases of invertebrates such as crustacea, mollusks, and lower phyla. The book provides critical information on viral, fungal, bacterial, parasitic, and neoplastic diseases of fish and invertebrates. Written by top-notch experts in the field, Pathobiology of Marine and Estuarine Organisms emphasizes pollution-associated diseases and includes an important review on the effects of pollution on marine mammals. The book will be a welcome addition to the libraries of aquatic and marine biologists, aquatic toxicologists, fisheries biologists, aquaculturalists, fish and invertebrate pathologists, and aquatic animal parasitologists.

Letters of the Scattered Brotherhood

What is politics? Is it a universal feature of all human societies, past and present? Is it tied to specific institutional arenas? Or is it found in all groups and organizations, large or small, formal or informal? This new textbook seeks to provide answers to these important questions. Starting with what it means to 'think politically', the book goes on to explore a wide range of meanings attributed to the concept of politics from a variety of perspectives and theoretical traditions. It offers succinct and coherent overviews by some of the foremost scholars in the field, and each invites the reader to see the activity of politics in a distinctive way. Topics covered include politics as a form of rule, feminist approaches to politics, Marxism and politics, the politics of human behaviour, environmental politics, politics as collective choice, and Islam and politics. Written with the new student in mind, this concise introduction to the study and activity of politics is essential reading for all those coming to the discipline for the first time.

What is Politics?

Sex wasn't supposed to be part of the deal Three years into a marriage of convenience, Molly's high-powered CEO husband wants to add a new term to their marriage agreement. Sex--without any messy emotional entanglements. But weekly sex with Luke, despite their carefully negotiated terms, is likely to get messy eventually. Content in a mutually beneficial arrangement, Molly isn't going to fall for Luke the way she fell for an old lover, only to be crushed in the end. She vows to stay strong, no matter how much intimacy develops between them in bed. When her old lover returns, finally wanting a real relationship, Molly has the chance to give her heart to a man who will accept it. It's too bad she now wants to give it to her husband, who has never admitted her heart is what he wants.

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Laura Berk's *Development Through the Lifespan* is relied upon in classrooms worldwide for its clear, engaging writing style, exceptional multicultural and cross-cultural focus, cutting-edge consideration of the interrelationships between heredity and environment, rich examples, and long-standing commitment to presenting the most up-to-date scholarship. This new edition continues to offer students research-based practical applications that they can relate to their personal and professional lives. Laura Berk, renowned professor and researcher, has revised the text with new pedagogy, a heightened emphasis on the interplay between heredity and environment, and an enhanced focus on many social policy issues, while emphasizing the lifespan perspective throughout. The latest theories and findings in the field are made accessible to students in a manageable and relevant way. Berk's signature storytelling style invites students to actively learn beside the text's "characters." Students are provided with an especially clear and coherent understanding of the sequence and underlying processes of human development, emphasizing the interrelatedness of all domains—physical, cognitive, emotional, social—throughout the text narrative and in special features. Berk also helps students connect their learning to their personal and professional areas of interest. Her voice comes through when speaking directly about issues students will face in their future pursuits as parents, educators, health care providers, social workers, and researchers. As members of a global and diverse human community, students are called to intelligently approach the responsibility of understanding and responding to the needs and concerns of both young and old. While carefully considering the complexities of human development, Berk presents classic and emerging theories in an especially clear, engaging writing style, with a multitude of research-based, real-world, cross-cultural, and multicultural examples. Strengthening the connections among developmental domains and of theory and research with applications, this edition's extensive revision brings forth the most recent scholarship, representing the changing field of human development. Mind-opening writing on what kids need from school, from one of education's most outspoken voices Almost no writer on schools asks us to question our fundamental assumptions about education and motivation as boldly as Alfie Kohn. The Washington Post says that "teachers and parents who encounter Kohn and his thoughts come away transfixed, ready to change their schools." And Time magazine has called him "perhaps the country's most outspoken critic of education's fixation on grades [and] test scores." Here is challenging and entertaining writing on where we should go in American education, in Alfie Kohn's unmistakable voice. He argues in the title essay with those who think that high standards mean joylessness in the classroom. He reflects thoughtfully on the question "Why Self-Discipline Is Overrated." And in an essay for the New York Times, which generated enormous response, he warns against the dangers of both

punishing and praising children for what they do instead of parenting “unconditionally.” Whether he’s talking about school policy or the psychology of motivation, Kohn gives us wonderfully provocative—and utterly serious—food for thought. This new book will be greeted with enthusiasm by his many readers, and by teachers and parents seeking a refreshing perspective on today’s debates about kids and schools.

From the #1 New York Times bestselling author of the Ella and Micha series comes a gripping story of passion, pain, and the courage to love . . . THE TEMPTATION OF LILA AND ETHAN On the surface, Lila Summers is flawless: good looks, expensive clothes, and a big, beautiful smile. But a dark past and even darker secrets are threatening to bubble over her perfect façade. She'll do anything to keep the emptiness inside hidden—which leads her into situations that always end badly. Whenever she hits bottom, there's only one person who's there to pull her out: Ethan Gregory. Ethan set the rules a long time ago: he and Lila are just friends. He doesn't do relationships. Although his tattooed, bad boy exterior is a far cry from Lila's pretty princess image, Ethan can't deny they have a deeper connection than he's used to. If he's not careful, he could be in serious danger of becoming attached—and he's learned the hard way that attachment only leads to heartbreak. When Lila falls farther than she ever has before, can Ethan continue to help as a friend? Or is he also getting close to falling . . . for her?

APA's popular primer for citizens is all new! For decades, planning officials and engaged citizens have relied on this book for a better understanding of the basics of planning. Now the authors have revised this perennial bestseller into a 21st-century guide for anyone who wants to make his or her community a better place. This book describes the land-use planning process, the key players in that process, and the legal framework in which decisions are made. The authors advocate principles and disciplines that will help those involved in the process make good decisions. In easy-to-understand language, they offer nuts-and-bolts information about different types of plans and how they are implemented. Chapters cover the goals and values of planning, the history of planning, the different people and organizations involved, the creation and implementation of a comprehensive plan, sustainability, the application review process, and legal and ethical questions.

Thielicke here studies the themes of doubt and appropriation in modern Protestant thought. A leading advocate of dialectical theology, Thielicke examines the work of the great German Protestant religious philosophers from Lessing and Schliermacher through Barth and Tillich, probing these theologians' understanding of their context and how this tradition can impact our own engagement with our times. Clear, finely nuanced, historically and philosophically mature, this is a vital reflection on the history of theology and in systematic theology.

When originally published in 1994 this volume was the first international review of accounting theory to focus on the contributions of its leading thinkers. Very few attempts had been made, in the accounting literature, to assess the contribution of the theorists who have had such an important influence on the direction of research and practice. Written by experts the studies in this volume provide a unique guide to the development of accounting theory and practice in regions as diverse as the USA, Japan and Europe.

Without the close, there is no sale. Pretty obvious, right? Yet, for many salespeople, closing is the most baffling and elusive part of the selling process. All too often, salespeople meet qualified clients and charm them with an eloquent presentation, only to see the sale mysteriously slip from between their fingers in the end. Which is sad when you consider all the hard work – the prospecting, preparation, planning, and practice – done for the sake of a moment of truth that never arrives. Fortunately, closing is an art that can be mastered, and now Sales Closing For Dummies shows you how. Packed with powerful principles that can help you become a top-producing salesperson, Sales Closing For Dummies is the ultimate guide to mastering that most mysterious part of the selling equation. Tom Hopkins, the legendary sales genius who, by age 30 was the nation's leading real-estate trainer, demystifies closing and shows what it takes to be a champion closer, including how to: Lead a sale without being pushy Read the signs of an interested potential buyer Use questioning methods that close sales, time and again Help clients feel good about their buying decisions Keep your clients' business and build their loyalty Build long-term relationships and watch your sales grow With the help of dozens of real-life examples from a wide cross section of industries, Tom shows why professional selling is about communication, not coercion. And he shares his considerable insight and experience on: Verbal and visual buying cues and how to recognize them Choosing the best location for

closing Addressing concerns and creating a sense of urgency Time-tested tactics and strategies for ending customer procrastination, overcoming their fear, closing from a distance, and more The ten biggest closing mistakes and how to avoid them Add-on selling and other ways of getting your clients to help you to build your business Featuring Tom's Hopkins' trademark "Red Flag" key points and situation scripts, this fun, easy-to-understand guide arms you with the hands-on tools and techniques you'll need to become a world-class closer.

This unique handbook compiles and details cutting-edge research in nanomagnetism and its applications in spintronics, magnetoplasmonics, and nonlinear magneto-optics. Fundamental aspects of magnetism relevant to nanodevices and new spin-transfer torque random-access memory (STT-RAM), current-induced domain wall motion memory, and spin torque oscillators, as well as highly anisotropic materials and topics on magnetization damping are developed in detail in the book. New paradigms such as molecule-based magnets (MBMs), which are a promisingly adaptive class of solids poised to open new frontiers of exploration, are also covered. The relationship between magnetism and nonlinear optics and the new field of magnetoplasmonics is also developed in detail. The book also includes a thorough chapter on spin-polarized scanning tunneling microscopy (SP-STM), which enables studying magnetic phenomena on surfaces with real-space imaging and spectroscopy techniques down to the atomic level. All these topics are developed by an interdisciplinary team of leading experts in their pertinent fields. The book will certainly appeal to anyone involved in nanomagnetism and its application in spintronic nanodevices and nonlinear magneto-optics.

In his typical jaw-dropping fashion, Carl Weber returns with part two of his New York Times bestselling Family Business series. He's brought along a friend in bestselling author Treasure Hernandez, and together they've added more drama and new family members to the mix. Welcome to the world of Duncans. By day they are upstanding citizens running one of New York's most respected car dealerships; but by night, they're criminals who control most of the East Coast drug traffic. No matter whether they're on their day or night jobs, one thing is true about the Duncans: there is never a dull moment to be found. Baby momma drama takes over the Duncan clan, as there is still uncertainty about who has fathered the Duncan sisters' new babies. Meanwhile, Orlando Duncan, the family's new CEO and a man with his own baby momma problems, has just developed a new product that may make the millionaire Duncans into billionaires. Orlando only has one obstacle in front of him, and it's not law enforcement or one of his family's many rivals. It's his mother, and she may be his most formidable opponent to date, because she's making the family take sides. Can a civil war within the Duncan family be averted before it tears them apart?

CHILI HOT GMAT MATH REVIEW will help readers develop the skills and mindset needed to score high on the quantitative section of the GMAT exam. Each hand-selected problem comes with a Classification, Snapshot, and Chili Rating. Classification serves to identify each problem according to category or sub-category. Snapshot highlights why that particular problem was chosen, including the underlying problem-solving principle or strategic approach. Chili Rating helps candidates gauge the estimated difficulty level of a given problem. A single chili indicates that the estimated difficulty level of a given problem is "mild" (500 to 590 difficulty level), two chilies spell "hot" (600 to 690 difficulty level), and three chilies signal "very hot" (700 or above difficulty level). By studying problems of varying difficulty, candidates will learn to maintain discipline on easy but tricky math problems and also to exercise flexibility when deciding on multiple approaches and time-saving shortcuts for use in tackling harder, more involved problems. Note to readers: This book contains the excerpted math sections from the parent title "Chili Hot GMAT: 200 All-Star Problems to Get You a High Score on Your GMAT Exam."
