Double Down

When snow shuts down Greg Heffley's middle school, his neighborhood transforms into a wintry battlefield. Rival groups fight over territory, build massive snow forts, and stage epic snowball fights. And in the crosshairs are Greg and his trusty best friend, Rowley Jefferson. It's a fight for survival as Greg and Rowley navigate alliances, betrayals, and warring gangs in a neighborhood meltdown. When the snow clears, will Greg and Rowley emerge as heroes? Or will they even survive to see another day?

Plotinus Or the Simplicity of Vision

This statistics textbook, with particular emphasis on radiation protection and dosimetry, deals with statistical solutions to problems inherent in health physics measurements and decision making. The authors begin with a description of our current understanding of the statistical nature of physical processes at the atomic level, including radioactive decay and interactions of radiation with matter. Examples are taken from problems encountered in health physics, and the material is

presented such that health physicists and most other nuclear professionals will more readily understand the application of statistical principles in the familiar context of the examples. Problems are presented at the end of each chapter, with solutions to selected problems provided online. In addition, numerous worked examples are included throughout the text.

Cities of Power

What is it in the operatic Italian psyche that allows-indeed, forgives, even applauds-Italy's premier for conducting a lifestyle as decadent as a Fellini extravaganza, while organizing an ongoing string of questionable behaviors and politically incorrect gaffes not seen since the days of Nero? All this, and yet Mr. Berlusconi remains completely "understood" by so many of his countrymen-some of whom keep coming back for more! Best-selling writer Beppe Severgnini, who by explaining America to Italians humorously immortalized American behavior in his book *Ciao, America!*, now turns his sights on his own countrymen. Through witty yet substantive anecdotes touching on Italy's current political and economic climate, Severgnini decodes the Italian premier's style and appeal, exploring his rise to power and creating a compulsively readable portrait of Italy today.

The Paris Review Interviews (Boxed Set) I-IV

Before there was real estate tycoon cum President-Elect Donald J. Trump, there was Silvio Berlusconi, the billionaire media mogul turned prime minister who dominated Italian life for the past twenty years. In a candid, warts-and-all portrait of the leader who played hard in office and in private life. From the bunga-bunga parties to his most secret moments with world leaders, this biography is rich in anecdotes and revelations involving Barack Obama, Hillary Clinton, George W. Bush, Vladimir Putin, Mikhail Gorbachev, Tony Blair, Nicolas Sarkozy, Angela Merkel, and many others. Berlusconi's incredible rise to power started from nothing. A self-created man, he was a cruise ship crooner as a young man, became a real estate tycoon in the '70s, started the first commercial television network in history, and turned AC Milan into a world-class soccer club. And that was all before he survived the squalid swampland of Italian politics to become prime minister who has not only served the longest in Italian history, but also has generated the most controversy of arguably any world leader today.

If Venice Dies

This book focuses on parenthood and generativity, considered not only a set of biological functions, but as human and socio-cultural capabilities above and beyond gender differences. The authors reconsider in particular the institution of motherhood, emphasizing the historical and social function of women. Alongside a reflection on the gender role of women as mothers and wives, this volume explores male identities and fatherhood. While claiming that parenthood and care are human characteristics – and not just gendered or female attributes – the authors suggest the adoption of a gynanic perspective on inter-gender relationships.

Rousseau-Kant-Goethe

Focusing on the recent Italian "videocracy," this book documents the emergence of the first Italian media mogul, Silvio Berlusconi, and his rise to and recent fall from political power. It also explores Italian media activism through three case studies: a discussion of the first autonomous free radio station, Radio Alice (which broadcasted in Bologna between 1977 and 1979); a review of Italian Internet activism focusing on a political site, Rekombinant.org(created in 2000); and finally a chronicle of the emergence in 2002 of OrfeoTV, the first Italian example of an illegal micro-TV station.

Vulnerability as generativity

At first glance, there may appear to be more to separate Michelangelo (1475-1564) and Bill Viola (b. 1951) than to unite them: one, the great master of the Italian Renaissance; the other, the creator of state-of-the-art immersive sound and video installations. And yet, when Martin Clayton showed Viola Her Majesty The Queen's unsurpassed collection of Michelangelo drawings at Windsor in 2006, the two men began to discover parallels. This book presents a new perspective on both artists' works. Stills and sequences from twelve key video pieces by Viola are reproduced alongside seventeen of

Michelangelo's presentation drawings, as well as the Taddei Tondo, the only Michelangelo marble sculpture in the UK and a treasure of the Royal Academy's collection. Texts by Martin Clayton examine how existential concerns - the preoccupation of many Renaissance artists, not least Michelangelo - are explored in Viola's often profoundly moving video installations, while Kira Perov provides insight into Viola's working processes. AUTHORS: Martin Clayton is Head of Prints and Drawings at Royal Collection Trust. Kira Perov is Bill Viola's partner and executive director of Bill Viola Studio. She manages, creatively guides and assists with the production of all his videotapes and installations, and curates exhibitions of his works worldwide. SELLING POINTS: * A selection of key works by the American video artist Bill Viola are presented alongside Michelangelo's drawings - revealing surprising parallels * Accompanies an exhibition presenting both artists' works at the Royal Academy of Arts, London, from 26 January to 31 March 2019 140 colour images

Evicted from Eternity

In this new collection of essays on memory and amnesia in the postmodern world, cultural critic Andreas Huyssen considers how nationalism, literature, art, politics, and the media are obsessed with the past. The great paradox of our fin-de-siecle culture is that novelty is even more associated with memory than with future expectation. Drawing heavily on the dilemmas of contemporary Germany, Huyssen's discussion of cultural memory illustrates the nature of contemporary nationalism, the work of such artists and thinkers as Anselm Kiefer, Alexander Kluge, and Jean Baudrillard, and many others. The book includes illustrations from contemporary Germany.

Ravello. Grand Tour. Ediz. Inglese

Following the collapse of communism and the decline of Marxism, some commentators have claimed that we have reached the 'end of history' and that the distinction between Left and Right can be forgotten. In this book - which was a tremendous success in Italy - Norberto Bobbio challenges these views, arguing that the fundamental political distinction between Left and Right, which has shaped the two centuries since the French Revolution, has continuing relevance today. Bobbio explores the grounds of this elusive distinction and argues that Left and Right are ultimately divided by different attitudes to equality. He carefully defines the nature of equality and inequality in relative rather than absolute terms. Left and Right is a timely and persuasively argued account of the basic parameters of political action and debate in the modern world - parameters which have remained constant despite the pace of social change. The book will be widely read and, as in Italy, it will have an impact far beyond the academic domain.

Since its original publication in France in 1963, Pierre Hadot's lively philosophical portrait of Plotinus remains the preeminent introduction to the man and his thought. Michael Chase's lucid translation—complete with a useful chronology and analytical bibliography—at last makes this book available to the English-speaking world. Hadot carefully examines Plotinus's views on the self, existence, love, virtue, gentleness, and solitude. He shows that Plotinus, like other philosophers of his day, believed that Plato and Aristotle had already articulated the essential truths; for him, the purpose of practicing philosophy was not to profess new truths but to engage in spiritual exercises so as to live philosophically. Seen in this light, Plotinus's counsel against fixation on the body and all earthly matters stemmed not from disgust or fear, but rather from his awareness of the negative effect that bodily preoccupation and material concern could have on spiritual exercises.

The Ashgate Research Companion to Memory Studies

At age thirty in 1919, Adolf Hitler had no accomplishments. He was a rootless loner, a corporal in a shattered army, without money or prospects. A little more than twenty years later, in autumn 1941, he directed his dynamic forces against the Soviet Union, and in December, the Germans were at the gates of Moscow and Leningrad. At that moment, Hitler appeared--however briefly--to be the most powerful ruler on the planet. Given this dramatic turn of events, it is little wonder that since 1945 generations of historians keep trying to explain how it all happened. This richly illustrated history provides a readable and fresh approach to the complex history of the Third Reich, from the coming to power of the Nazis in 1933 to the final collapse in 1945. Using photographs, paintings, propaganda images, and a host of other such materials from a wide range of sources, including official documents, cinema, and the photography of contemporary amateurs, foreigners, and the Allied armies, it distills our ideas about the period and provides a balanced and accessible account of the whole era.

Bill Viola / Michelangelo

What is Venice worth? To whom does this urban treasure belong? This eloquent book by the internationally renowned art historian Salvatore Settis urgently poses these questions, igniting a new debate about the Pearl of the Adriatic and cultural patrimony at large. Venetians are increasingly abandoning their hometown — there's now only one resident for every 140 visitors — and Venice's fragile fate has become emblematic of the future of historic cities everywhere as it capitulates to tourists and those who profit from them. In *If Venice Dies*, a fiery blend of history and cultural analysis, Settis argues that "hit-and-run" visitors are turning landmark urban settings into shopping malls and theme parks. He warns that Western civilization's prime achievements face impending ruin from mass tourism and global cultural homogenization. This is a passionate plea to secure Venice's future, written with consummate authority, wide-ranging erudition and élan.

The Meltdown (Diary of a Wimpy Kid Book 13)

Populism is a central concept in the current media debates about politics and elections. However, like most political buzzwords, the term often floats from one meaning to another, and both social scientists and journalists use it to denote diverse phenomena. What is populism really? Who are the populist leaders? And what is the relationship between populism

and democracy? This book answers these questions in a simple and persuasive way, offering a swift guide to populism in theory and practice. Cas Mudde and Cristóbal Rovira Kaltwasser present populism as an ideology that divides society into two antagonistic camps, the "pure people" versus the "corrupt elite," and that privileges the general will of the people above all else. They illustrate the practical power of this ideology through a survey of representative populist movements of the modern era: European right-wing parties, left-wing presidents in Latin America, and the Tea Party movement in the United States. The authors delve into the ambivalent personalities of charismatic populist leaders such as Juan Domingo Péron, H. Ross Perot, Jean-Marie le Pen, Silvio Berlusconi, and Hugo Chávez. If the strong male leader embodies the mainstream form of populism, many resolute women, such as Eva Péron, Pauline Hanson, and Sarah Palin, have also succeeded in building a populist status, often by exploiting gendered notions of society. Although populism is ultimately part of democracy, populist movements constitute an increasing challenge to democratic politics. Comparing political trends across different countries, this compelling book debates what the long-term consequences of this challenge could be, as it turns the spotlight on the bewildering effect of populism on today's political and social life.

The Oxford Illustrated History of the Third Reich

Modern Rome is a city rife with contradictions. Once the seat of ancient glory, it is now often the object of national contempt. It plays a significant part on the world stage, but the concerns of its residents are often deeply parochial. And while they live in the seat of a world religion, Romans can be vehemently anticlerical. These tensions between the past and the present, the global and the local, make Rome fertile ground to study urban social life, the construction of the past, the role of religion in daily life, and how a capital city relates to the rest of the nation. Michael Herzfeld focuses on Rome's historic Monti district and the wrenching dislocation caused by rapid economical, political, and social change. Evicted from Eternity tells the story of the gentrification of Monti—once the architecturally stunning home of a community of artisans and shopkeepers now displaced by an invasion of rapacious real estate speculators, corrupt officials, dithering politicians, deceptive clerics, and shady thugs. As Herzfeld picks apart the messy story of Monti's transformation, he ranges widely over many aspects of life there and in the rest of the city, richly depicting the uniquely local landscape of globalization in Rome.

Pope Francis examines the role of millennials in the future of the Catholic Church in this urgent call to believers of all generations to work together to build a better world. Since his election in 2013, Pope Francis has reinvigorated the Catholic Church and become one of the most popular global leaders. Now, in this extraordinary interview with journalist Thomas Leoncini, His Holiness reminds Catholics of all ages that "God is young; He is always new." God has energy, spontaneity, and the desire for change—youthful qualities that can be rallied to fight the many problems facing the Catholic Church and the world at large. In this inspiring volume, published in English for the first time, Pope Francis's solution to these challenges is simple: a "revolution of tenderness" that unites believers of all ages in a mission to remake the world. "God is young! God is the Eternal One who has no time, but is able to renew and rejuvenate Himself and all things continually. The most distinctive attributes of the young are also His. He is young because He makes all things new and loves innovation; because He astonishes and loves astonishment; because He dreams and wants us to dream."—Pope Francis

While many scholars around the world study and further pursue the discovery of so-called lost gospels, New Testament professor Darrell L. Bock believes the real lost gospel is the one already found in the Bible. "Recovering the Real Lost Gospel is written with the conviction that the church has become cloudy on the purpose of the gospel," he explains. "It is in many ways a biblical theology of the gospel." Bock traces key themes and texts from Scripture to answer the central question: What does the Bible say about the gospel? His response throughout clearly emphasizes that the gospel is good news and based on a restored relationship with God. Readers are invited on this mission of rediscovery to reclaim a message that has much to offer all people in a needy world.

After the publication of Nietzsche's Untimely Meditations (Unzeitgemäße Betrachtungen) the term 'Untimely' was introduced widely in philosophical studies, not merely in Nietzschean contexts. Although this concept has become very popular, it is surprising that it has been neglected by critical studies. Indeed, there are only a few publications that fully present the issue of 'Untimely' on the international scene. In this volume the reader will find different reflections moving from the Nietzschean texts, rethinking the question of the 'Untimely' beyond the 'master', and exploring wider horizons of research. Rethinking the Nietzschean Concept of Untimely

A crisp and trenchant dissection of populism today The word 'populism' has come to cover all manner of sins. Yet despite the prevalence of its use, it is often difficult to understand what connects its various supposed expressions. From Syriza to Trump and from Podemos to Brexit, the electoral earthquakes of recent years have often been grouped under this term. But what actually defines 'populism'? Is it an ideology, a form of organisation, or a mentality? Marco Revelli seeks to answer this question by getting to grips with the historical dynamics of so-called 'populist' movements. While in the early days of democracy, populism sought to represent classes and social layers who asserted their political role for the first time, in today's post-democratic climate, it instead expresses the grievances of those who had until recently felt that they were included. Having lost their power, the disinherited embrace not a political alternative to -isms like liberalism or socialism, but a populist mood of discontent. The new populism is the 'formless form' that protest and grievance assume in the era of financialisation, in the era where the atomised masses lack voice or organisation. For Revelli, this new populism the child of an age in which the Left has been hollowed out and lost its capacity to offer an alternative.

Left and Right

Warren Buffet, propietario del fondo de inversión Hathaway Berkshire admitió claramente: «Estamos en una guerra de clases, pero es mi clase, la clase rica, la que está haciendo la guerra y la estamos ganando». Los grupos financieros salvados durante la Gran Recesión por los Estados mediante billones de dólares y centenares de millones de euros se han duplicado, en términos de activos, respecto a la cifra anterior a 2008. Los primeros veinte grupos del mundo poseen cada uno un balance entre 1 y 2 billones de euros; cifras que equivalen, más o menos, al 70 % del PIB italiano. En Italia, los gobiernos de Berlusconi, Monti, Letta y Renzi serán recordados como aquellos que han demostrado la mayor incapacidad y torpeza en gestionar la economía durante la Gran Recesión. De 2009 a la actualidad, el PIB ha bajado 10 puntos, el equivalente a 80.000 millones de euros de merma del crecimiento económico. En octubre de 2017, un artículo de El País contaba como en España casi trece millones de personas se encuentran en riesgo de pobreza o de exclusión social. Las grandes empresas y corporaciones pagaron de media, en 2015, un 7,3 % de impuestos de sociedades, la mitad de lo que pagaron los trabajadores por IRPF (14,9 %). En Grecia, los daños inferidos a la población por las medidas de austeridad impuestas por la troika han sido terribles. Actualmente, el número de niños en riesgo de pobreza supera el 40 % y los suicidios se han incrementado en un 45 % respecto a 2008. En el último año y medio parece haber un cambio de paradigma en países como Italia, España y Portugal. La ciudadanía ha rechazado los recortes salvajes a la educación, a la seguridad y a la sanidad y ha defendido enérgicamente el sistema público universal del Estado del bienestar. Este libro

quiere alertar del peligro del dominio oligárquico del 1 %, por el 1 % y, para el 1 % para que, como auguró el presidente Lincoln, el gobierno del pueblo, por el pueblo y para el pueblo no desaparezca de la tierra.

Ethereal Shadows

Why are cities centers of power? A sociological analysis of urban politics In this brilliant, very original survey of the politics and meanings of urban landscapes, leading sociologist Göran Therborn offers a tour of the world's major capital cities, showing how they have been shaped by national, popular, and global forces. Their stories begin with the emergence of various kinds of nation-state, each with its own special capital city problematic. In turn, radical shifts of power have impacted on these cities' development, in popular urban reforms or movements of protest and resistance; in the rise and fall of fascism and military dictatorships; and the coming and going of Communism. Therborn also analyzes global moments of urban formation, of historical globalized nationalism, as well as the cities of current global image capitalism and their variations of skyscraping, gating, and displays of novelty. Through a global, historical lens, and with a thematic range extending from the mutations of modernist architecture to the contemporary return of urban revolutions, Therborn questions received assumptions about the source, manifestations, and reach of urban power, combining perspectives on politics, sociology, urban planning, architecture, and urban iconography. He argues that, at a time when they seem to be moving apart, there is a strong link between the city and the nation-state, and that the current globalization of cities is largely driven by the global aspirations of politicians as well as those of national and local capital. With its unique systematic overview, from Washington, D.C. and revolutionary Paris to the flamboyant twenty- first-century capital Astana in Kazakhstan, its wealth of urban observations from all the populated continents, and its sharp and multi-faceted analyses, *Cities of Power* forces us to rethink our urban future, as well as our historically shaped present.
