radiant second novel follows two families -- one English, one Bengali -- as their lives intertwine in tragic and comic ways. The narrator, Indian born and English educated, traces events back and forth in time, from the outbreak of World War II to the late twentieth century, through years of Bengali partition and violence, observing the ways in which political events invade private lives.

The Shadow Lines

A few years ago, Chimamanda Ngozi Adichie received a letter from a childhood friend, a new mother who wanted to know how to raise her baby girl to be a feminist. Dear Ijeawele is Adichie's letter of response: fifteen invaluable suggestions—direct, wryly funny, and perceptive—for how to empower a daughter to become a strong, independent woman. Filled with compassionate guidance and advice, it gets right to the heart of sexual politics in the twenty-first century, and starts a new and urgently needed conversation about what it really means to be a woman today.

stunning true story of an untouchable family who become teachers, and one, a poet and revolutionary. Like one in six people in India, Sujatha Gidla was born an untouchable. While most untouchables are illiterate, her family was educated by Canadian missionaries in the 1930s, making it possible for Gidla to attend elite schools and move to America at the age of twenty-six. It was only then that she saw how extraordinary—and yet how typical—her family history truly was. Her mother, Manjula, and uncles Satyam and Carey were born in the last days of British colonial rule. They grew up in a world marked by poverty and injustice, but also full of possibility. In the slums where they lived, everyone had a political side, and rallies, agitations, and arrests were commonplace. The Independence movement promised freedom. Yet for untouchables and other poor and working people, little changed. Satyam, the eldest, switched allegiance to the Communist Party. Gidla recounts his incredible transformation from student and labor organizer to famous poet and founder of a left-wing guerrilla movement. And Gidla charts her mother's battles with caste and women's oppression. Page by page, Gidla takes us into a complicated, close-knit family as they desperately strive for a decent life and a more just society. A moving portrait of love, hardship, and struggle, *Ants Among Elephants* is also that rare thing: a personal history of modern India told from the bottom up.

the Man Booker Prize: An “extraordinary” novel “lit by a moral intelligence at once fierce and tender” (The New York Times Book Review). In a crumbling, isolated house at the foot of Mount Kanchenjunga in the Himalayas, an embittered old judge wants only to retire in peace. But his life is upended when his sixteen-year-old orphaned granddaughter, Sai, arrives on his doorstep. The judge’s chatty cook watches over the girl, but his thoughts are mostly with his son, Biju, hopscotching from one miserable New York restaurant job to another, trying to stay a step ahead of the INS. When a Nepalese insurgency threatens Sai’s new-sprung romance with her tutor, the household descends into chaos. The cook witnesses India’s hierarchy being overturned and discarded. The judge revisits his past and his role in Sai and Biju’s intertwining lives. In a grasping world of colliding interests and conflicting desires, every moment holds out the possibility for hope or betrayal. Published to extraordinary acclaim, *The Inheritance of Loss* heralds Kiran Desai as one of our most insightful novelists. She illuminates the pain of exile and the ambiguities of postcolonialism with a tapestry of colorful characters and “uncannily beautiful” prose (O: The Oprah Magazine). “A book about tradition and modernity, the past and the future—and about the surprising ways both amusing and sorrowful, in which they all connect.” —The Independent

relatives in Dakar, the author tells of being educated in the French colonial school system, where she comes gradually to feel alienated from her family and Muslim upbringing, growing enamored with the West. Academic success gives her the opportunity to study in Belgium, which she looks upon as a "promised land." There she is objectified as an exotic creature, however, and she descends into promiscuity, alcohol and drug abuse, and, eventually, prostitution. (It was out of concern on her editor's part about her candor that the author used the pseudonym Ken Bugul, the Wolof phrase for "the person no one wants.") Her return to Senegal, which concludes the book, presents her with a past she cannot reenter, a painful but necessary realization as she begins to create a new life there.

This book explores various aspects of data engineering and information processing. In this second volume, the authors assess the challenges and opportunities involved in doing business with information. Their contributions on business information processing and management reflect diverse viewpoints – not only technological, but also business and social. As the global marketplace grows more and more complex due to the increasing availability of data, the information business is steadily gaining popularity and has a huge impact on modern society. Thus, there is a growing need for consensus on how business information can be created, accessed, used and managed.

supplementation and discussing the importance of beta-carotene. Details of the chemistry, structure and biochemistry of the compounds begins with nomenclature followed by information on encapsulation, thermal degradation and occurrence. Developments in analytical and bioanalytical techniques concerning these compounds in plant, milk and human tissue systems are covered in detail. Finally, the book covers the extensive functions and effects of Vitamin A on eg developmental growth, immune function, cancer risk, the brain and lungs as well as vision. Delivering high quality information, this book will be of benefit to anyone researching this area of health and nutritional science. It will bridge scientific disciplines so that the information is more meaningful and applicable to health in general. Part of a series of books, it is specifically designed for chemists, analytical scientists, forensic scientists, food scientists, dieticians and health care workers, nutritionists, toxicologists and research academics. Due to its interdisciplinary nature it could also be suitable for lecturers and teachers in food and nutritional sciences and as a college or university library reference guide.

The Good Terrorist

Is our imagination adequate to the realities of global warming? The novelist Amitav Ghosh argues that we need art and literature to help us imagine our future in the Anthropocene, but that they are falling short of the task. If culture cannot help us see the realities of our plight, then our era, which so congratulates itself

on its self-awareness, may come to be known as the time of the Great Derangement. A case in point is fiction, which is so committed to normalcy and the everyday that it has no space for the improbability of climate change events the persistent droughts, hundred-year storms, and freakish tornadoes. Our politics, likewise, seems unable to mobilize forcefully in response to climate change. Ghosh argues that politics, like literature, has become a matter of individual moral reckoning, a journey of the solitary conscience rather than an arena of collective action. But to limit fiction and politics to individual moral adventure comes at a great cost. The climate crisis asks us to imagine other forms of human existence a task to which fiction, Ghosh argues, is the best suited of all cultural forms. A powerful nonfiction work by one of our most gifted, historically attuned novelists, "The Great Derangement "brings a fresh urgency to thinking on climate change. "

Culture of Encounters documents the fascinating exchange between the Persian-speaking Islamic elite of the Mughal Empire and traditional Sanskrit scholars, which engendered a dynamic idea of Mughal rule essential to the empire's survival. This history begins with the invitation of Brahman and Jain intellectuals to King Akbar's court in the 1560s, then details the numerous Mughal-backed texts they and

their Mughal interlocutors produced under emperors Akbar, Jahangir (1605–1627), and Shah Jahan (1628–1658). Many works, including Sanskrit epics and historical texts, were translated into Persian, elevating the political position of Brahmans and Jains and cultivating a voracious appetite for Indian writings throughout the Mughal world. The first book to read these Sanskrit and Persian works in tandem, *Culture of Encounters* recasts the Mughal Empire as a polyglot polity that collaborated with its Indian subjects to envision its sovereignty. The work also reframes the development of Brahman and Jain communities under Mughal rule, which coalesced around carefully selected, politically salient memories of imperial interaction. Along with its groundbreaking findings, *Culture of Encounters* certifies the critical role of the sociology of empire in building the Mughal polity, which came to irrevocably shape the literary and ruling cultures of early modern India.

"This novel of modern India centers around national and personal conflicts in its story of V. S. Krishnan, a Brahmin, who, returned after ten years of schooling in England, finds that his country's strife over partition and the English evacuation is reflected in his own struggle to find a meaning and a definition of his life. His career arranged, his marriage predetermined, he escapes disgrace in a civil demonstration and settles into his government service post. Although Kamala is the perfect Hindu wife, personifying non-violence in which resignation can be translated into resistance,

when Cynthia Bainbridge turns up their friendship, begun in England, becomes a passionate affair but it is ended when Krishna realizes that his religion is no longer open to him. Joining Kamala in riot-torn Shantihpur, he is confronted by the vicious hatred of the Moulems and the threat of cholera and is the witness of Kamala's murder when she attempts to protect a Moslem girl. After the traditional rites of her burial, he returns to Delhi and Government Service knowing that Kamala's final profession of faith has effected a change in him even if it has gone for nothing in larger terms. The parallel struggles of individual and state for freedom, the symbols, fundamentals, rituals and practices of different Indian groups, are overlaid with heavy textured prose that is exhaustive in its exploration of contemporary Indian thinking."--Kirkus.

Trade Wars Are Class Wars

The Pulitzer Prize-winning epic of the Great Depression, a book that galvanized—and sometimes outraged—millions of readers. First published in 1939, Steinbeck's Pulitzer Prize-winning epic of the Great Depression chronicles the Dust Bowl migration of the 1930s and tells the story of one Oklahoma farm family, the Joads—driven from their homestead and forced to travel west to the promised land of California. Out of their trials and their repeated collisions against the hard realities of an America divided into Haves and Have-Nots evolves a drama that is intensely human yet majestic in its scale and moral vision, elemental yet plainspoken, tragic but ultimately stirring in its human dignity. A portrait of the conflict between the powerful and the powerless, of one man's fierce reaction to injustice, and of one woman's stoical strength, the novel captures the horrors of the Great Depression and probes into the very nature of equality and justice in America. At once a naturalistic epic, captivity narrative, road novel, and transcendental gospel, Steinbeck's powerful landmark novel is perhaps the most American of American Classics. This Centennial edition, specially designed to commemorate one hundred years of Steinbeck, features french flaps and deckle-edged pages. For more than sixty-five years, Penguin has been the leading publisher of classic literature in the English-speaking world. The Novels of Salman Rushdie

In October 1928 Virginia Woolf was asked to deliver speeches at Newnham and Girton Colleges on the subject of 'Women and Fiction'; she spoke about her conviction that 'a woman must have money and a room of her own if she is to write fiction'. The following year, the two speeches were published as *A Room of One's Own*, and became one of the foremost feminist texts. Knitted into a polished argument are several threads of great importance – women and learning, writing and poverty – which helped to establish much of feminist thought on the importance of education and money for women's independence. In the same breath, Woolf brushes aside critics and sends out a call for solidarity and independence – a call which sent ripples well into the next century. 'Brilliant interweaving of personal experience, imaginative musing and political clarity' — Kate Mosse, *The Guardian* 'Probably the most influential piece of non-fictional writing by a woman in this century.' — Hermione Lee, *The Financial Times*

Trade disputes are usually understood as conflicts between countries with competing national interests, but as Matthew C. Klein and Michael Pettis show, they are often the unexpected result of domestic political choices to serve the interests of the rich at the expense of workers and ordinary retirees. Klein and Pettis trace the origins of today's trade wars to decisions made by politicians and business leaders in China, Europe, and the United States over the past thirty years. Across the world, the rich have prospered while workers can no longer afford to buy what they produce, have lost their jobs, or have been forced into higher levels of debt. In this thought-provoking challenge to mainstream views, the authors provide a

cohesive narrative that shows how the class wars of rising inequality are a threat to the global economy and international peace--and what we can do about it.

Visit www.luminosoa.org to learn more. *Writing Self, Writing Empire* examines the life, career, and writings of the Mughal state secretary, or munshi, Chandar Bhan "Brahman" (d. c.1670), one of the great Indo-Persian poets and prose stylists of early modern South Asia. Chandar Bhan's life spanned the reigns of four different emperors, Akbar (1556-1605), Jahangir (1605-1627), Shah Jahan (1628-1658), and Aurangzeb 'Alamgir (1658-1707), the last of the "Great Mughals" whose courts dominated the culture and politics of the subcontinent at the height of the empire's power, territorial reach, and global influence. As a high-caste Hindu who worked for a series of Muslim monarchs and other officials, forming powerful friendships along the way, Chandar Bhan's experience bears vivid testimony to the pluralistic atmosphere of the Mughal court, particularly during the reign of Shah Jahan, the celebrated builder of the Taj Mahal. But his widely circulated and emulated works also touch on a range of topics central to our understanding of the court's literary, mystical, administrative, and ethical cultures, while his letters and autobiographical writings provide tantalizing examples of early modern Indo-Persian

However, rarely has a multidisciplinary approach been taken to examine this imagery and challenge and possibly reinterpret old women-related myths and other taken-for-granted aspects (e.g., grammatically inclusive gender). Moreover, this approach can better place the ideologies as myth creators and propagators, identify and deconstruct stereotypes and prejudices, and compare them across cultures with the view to spot universal vs. culturally specific approaches as far as women's studies and interpretations are concerned. It is important to gather these perspectives to translate and unveil new interpretations to old ideas about women and the feminine that are universally accepted as absolute, impossible to challenge, and invalidated truths. The Handbook of Research on Translating Myth and Reality in Women Imagery Across Disciplines is a comprehensive reference book that provides an interdisciplinary and multidisciplinary perspective on the perception and reception of women across time and space. It tackles various perspectives: gender studies, linguistic studies, literature and cultural studies, discourse analysis, philosophy, anthropology, sociology, etc. Its main objective is to present new approaches and propose new answers to old questions related to gender inequalities, stereotypes, and prejudices about women and their place in the world. Covering significant themes that include the ethics of embodiment, myth of motherhood at the crossroad of ideologies, translation of women's experiences and ideas across cultures, and discourses on women's rehabilitation and dignification across centuries, this book is critical for linguists, professionals, researchers, academicians, and

Perception of Beauty

The authors in this book ask us to consider whether the perception of beauty has been defined by our genetics and culture over the years - has it grown and changed? Do certain neural connections define our emotional reactions to beauty? Does beauty follow any rules or laws? Can the aspiration toward beauty be detrimental? Can we divorce ourselves from dictates and sink into a mindful connection with our internal beauty? Can we move from the superficial where "beauty is only skin deep" to an intense appreciation of beauty in all of its variations. The Perception of Beauty will lead to a deeper understanding and contemplation of nature, art, and the world around us.

Winterson went on to fulfill that promise, producing

some of the most dazzling fiction and nonfiction of the past decade, including her celebrated memoir *Why Be Happy When You Can Be Normal?*. Now required reading in contemporary literature, *Oranges Are Not the Only Fruit* is a funny, poignant exploration of a young girl's adolescence. Jeanette is a bright and rebellious orphan who is adopted into an evangelical household in the dour, industrial North of England and finds herself embroidering grim religious mottoes and shaking her little tambourine for Jesus. But as this budding missionary comes of age, and comes to terms with her unorthodox sexuality, the peculiar balance of her God-fearing household dissolves. Jeanette's insistence on listening to truths of her own heart and mind—and on reporting them with wit and passion—makes for an unforgettable chronicle of an eccentric, moving passage into adulthood. "If Flannery O'Connor and Rita Mae Brown had collaborated on the coming-out story of a young British girl in the 1960s, maybe they would have approached the quirky and subtle hilarity of Jeanette Winterson's autobiographical first novel. . . . Winterson's voice, with its idiosyncratic wit and sensitivity, is one you've never heard before." —Ms. Magazine

Sugarcane enjoys a prominent position among agro-industrial crops and is commercially grown in 115 tropical and subtropical countries around the world. However, fluctuations in sugar prices have forced the sugarcane industry worldwide to broaden its revenue base by moving from single-commodity manufacturing to a range of value-added products. Utilizing the by-products in an innovative manner to create value-added products is the new course of action for sugar-producing countries. For many years sugarcane was regarded as a single-product crop, i.e., only useful for producing sugar. Its actual potential is now increasingly being recognised by the industry and there is a growing trend toward the manufacturing of allied products from sugarcane. Therefore, the focus is now on the establishment of sugar-agro-industry complexes, processing not just sugar but a range of other products. This book provides a comprehensive overview of sugarcane not only as a source of sweetening agents but also for

many other uses, including as a source of bio-energy. It also explores the trend of sugar consumption and suggests practices to curb the consumption of sugar products in order to tackle obesity and reduce public health costs. The book underscores the need to diversify sugarcane and highlights means of doing so, while also addressing various innovations and technologies being developed in connection with sugar, sugar derivatives, and sugar industry by-products for sustainable utilization in the sugar-agro industry. Accordingly, it offers a valuable resource for professionals and R&D units in the sugar industry, and for students of agronomy and related fields.

The Memoirs of a Polar Bear stars three generations of talented writers and performers—who happen to be polar bears. The Memoirs of a Polar Bear has in spades what Rivka Galchen hailed in the New Yorker as “Yoko Tawada’s magnificent strangeness”—Tawada is an author like no other. Three generations (grandmother, mother, son) of polar bears are famous as both circus performers and writers in East Germany: they are polar bears who move in human society, stars of the ring and of the literary world. In chapter one, the grandmother matriarch in the Soviet Union accidentally writes a bestselling autobiography. In chapter two, Tosca, her daughter (born in Canada, where her mother had emigrated) moves to the DDR and takes a job in the circus. Her son—the last of their line—is Knut, born in chapter three in a Leipzig zoo but raised by a human keeper in relatively happy circumstances in the Berlin zoo, until his keeper, Matthias, is taken away. Happy or sad, each bear writes a story, enjoying both celebrity and “the intimacy of being alone with my pen.”
