### **Patricia Seybold's Office Computing Report**

An in-depth introduction to the capabilities of E-mail and messaging as well as the technologies that are used to implement them. This is the only book to provide thorough, practical coverage aimed at technical and business planners of E-mail systems. The book covers the selection, implementation, and impact of, the new technologies in business operations.

### **CFO.**

Written from a user friendly perspective in non-technical language and based on the successful Data-Tech Institute seminar, this is the most comprehensive, up-to-date reference on all aspects of voice and data communications available. The handbook will be of value to communications professionals who need this knowledge to meet the requirements of proliferating PC/LAN networks.

### **Signals**

### **The Business One Irwin Handbook of Telecommunications**

### **Forbes**

### **Electronics**

### **Telecommunications Systems and Services Directory**

## **Proceedings of the National Electronics Conference**
