leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

Iron Deficiency: New Insights for the Healthcare Professional: 2013 Edition

Keys to Running Successful Research Projects: All the Things They Never Teach You provides a step-by-step guide for the management of a successful research project or program. Through the use of illustrative case studies, the book covers all aspects of management that should be included during researcher training, helping researchers overcome the many challenges they face in their day-to-day management of people, time and resources. Links throughout provide more detailed information from gold standard sources on every topic. It is a must-have reference for postdocs, research managers and administrators in colleges, universities, hospitals and research institutes. In addition, it is an ideal resource for those working in grant and contract funding groups in the life sciences and medical fields. Covers the nuts and bolts of research management in the life sciences, medical and health fields Provides simple solutions to issues that come up on the job Ensures that hard-fought for money is spent wisely and well

Proceedings of IAC-ETeL 2013

The two-volume set LNCS 8218 and 8219 constitutes the refereed proceedings of the 12th International Semantic Web Conference, ISWC 2013, held in Sydney, Australia, in October 2013. The International Semantic Web Conference is the premier forum for Semantic Web research, where cutting edge scientific results and technological innovations are presented, where problems and solutions are discussed, and where the future of this vision is being developed. It brings together specialists in fields such as artificial intelligence, databases, social networks, distributed computing, Web engineering, information systems, human-computer interaction, natural language processing, and the social sciences. Part 1 (LNCS 8218) contains a total of 45 papers which were presented in the research track. They were carefully reviewed and selected from 210 submissions. Part 2 (LNCS 8219) contains 16 papers from the in-use track which were accepted from 90 submissions. In addition, it presents 10 contributions to the evaluations and experiments track and 5 papers of the doctoral consortium.

Bacillales—Advances in Research and Application: 2013 Edition

Nosocomial Infections: New Insights for the Healthcare Professional: 2013 Edition is a ScholarlyPaper™ that delivers timely, authoritative, and intensively focused information about Additional Research in a compact format. The editors have built

Computational Science and Its Applications -- ICCSA 2013

Publish or Perish. This old adage illustrates the importance of scientific communication; essential to research, it also represents a strategic sector for each country's competitiveness. An often-neglected topic, scientific communication is of vital importance, with new information technologies accelerating and profoundly changing how knowledge is disseminated. The necessity of optimally disseminating experts' findings has also become crucial to researchers, institutes and universities alike, which has prompted the recent advent of Impact Factors for the evaluation and financing of research, the goal being for scientific knowledge to be equally distributed to a very broad audience, especially to the media, entrepreneurs and sociopolitical players. This handbook presents the "golden rules" for publishing scientific articles. In order to do away with major recurring errors, the author explains how to easily structure an article and offers support for the typical mistakes made by native French speakers publishing in English, tips on how to

Download Free Scientific Journal Impact Factor 2013

make the style more academic of more general to fit your intended readership and, in the book's closing section, suggests new publishing techniques of the Internet age such as the micro-article, which allows researchers to focus their findings into a single innovative point. The major principles presented can be applied to a broad range of documents such as theses, industry reports, publicity texts, letters of intent, CVs/resumes, blogs and press releases, as all of these documents involve presenting information on advances, discoveries, innovations, or changes to our previous knowledge.

Writing Scientific Research Articles

Ecological Informatics is defined as the design and application of computational techniques for ecological analysis, synthesis, forecasting and management. The book provides an introduction to the scope, concepts and techniques of this newly emerging discipline. It illustrates numerous applications of Ecological Informatics for stream systems, river systems, freshwater lakes and marine systems as well as image recognition at micro and macro scale. Case studies focus on applications of artificial neural networks, genetic algorithms, fuzzy logic and adaptive agents to current ecological management issues such as toxic algal blooms, eutrophication, habitat degradation, conservation of biodiversity and sustainable fishery.

Issues in General Science and Scientific Theory and Method: 2013 Edition

Download Free Scientific Journal Impact Factor 2013

The five-volume set LNCS 7971-7975 constitutes the refereed proceedings of the 13th International Conference on Computational Science and Its Applications, ICCSA 2013, held in Ho Chi Minh City, Vietnam, in June 2013. Apart from the general track, ICCSA 2013 also include 33 special sessions and workshops, in various areas of computational sciences, ranging from computational science technologies, to specific areas of computational sciences, such as computer graphics and virtual reality. There are 46 papers from the general track, and 202 in special sessions and workshops.

Scientific Writing for Impact Factor Journals

With researchers around the world are under increasing pressure to publish in high-profile international journals, this book explores some of the issues affecting authors on the semiperiphery, who often find themselves torn between conflicting academic cultures and discourses.

Frontiers in Clinical Drug Research - Anti Allergy Agents

Colony-Stimulating Factors—Advances in Research and Application: 2013 Edition is a ScholarlyEditions™ book that delivers timely, authoritative, and comprehensive information about Recombinant Colony-Stimulating Factors. Annotating New Genes

Vaginal Preparations—Advances in Research and Application: 2013 Edition

This book shows scientists how to apply their analysis and synthesis skills to overcoming the challenge of how to write, as well as what to write, to maximise their chances of publishing in international scientific journals. The book uses analysis of the scientific article genre to provide clear processes for writing each section of a manuscript, starting with clear 'story' construction and packaging of results. Each learning step uses practical exercises to develop writing and data presentation skills based on reader analysis of well-written example papers. Strategies

Download Free Scientific Journal Impact Factor 2013

are presented for responding to referee comments, and for developing discipline-specific English language skills for manuscript writing and polishing. The book is designed for scientists who use English as a first or an additional language, and for individual scientists or mentors or a class setting. In response to reader requests, the new edition includes review articles and the full range of research article formats, as well as applying the book's principles to writing funding applications. Web support for this book is available at www.writeresearch.com.au

Thrombosis: New Insights for the Healthcare Professional: 2013 Edition

Thrombosis: New Insights for the Healthcare Professional: 2013 Edition is a ScholarlyEditions™ book that delivers timely, authoritative, and comprehensive information about Diagnosis and Screening. The editors have built Thrombosis: New Insights for the Healthcare Professional: 2013 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Diagnosis and Screening in this book to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Thrombosis: New Insights for the Healthcare Professional: 2013 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

Keys to Running Successful Research Projects

Research publications have always been key to building a successful career in science, yet little if any formal guidance is offered to young scientists on how to get research papers peer reviewed, accepted, and published by leading scientific journals. With *What Editors Want*, Philippa J. Benson and Susan C. Silver, two well-respected editors from the science publishing community, remedy that situation with a clear, straightforward guide that will be of use to all scientists. Benson and Silver instruct readers on how to identify the journals that are most likely to publish a given paper, how to write an effective cover letter, how to avoid common pitfalls of the submission process, and how to effectively navigate the all-important peer review process, including dealing with revisions and rejection. With supplemental advice from more than a dozen experts, this book will equip scientists with the knowledge they need to usher their papers through publication.

Writing and Publishing Science Research Papers in English

In recent years, there has been an explosion of research focused on using technology in healthcare,

including web- and mobile- health assessment and intervention tools, as well as smartphone sensors and smart environments for monitoring and promoting health behavior. This work has shown that technology-based therapeutic tools offer considerable promise for monitoring and responding to individuals' health behavior in real-time. They may also function as important "clinician-extendors" or stand-alone tools, may be cost-effective and may offer countless opportunities for tailoring behavioral monitoring and intervention delivery in a manner that is optimally responsive to each individual's profile and health behavior trajectory over time. Additionally, informational and communication technologies may be used in the context of decision support tools to help individuals better understand and access treatment. Technology may enable entirely new models of healthcare both within and outside of formal systems of care and thus offers the opportunity to revolutionize healthcare delivery. This edited book defines the state of scientific research related to the development, experimental evaluation, and effective dissemination of technology-based therapeutic tools targeting behavioral health. Behavioral Healthcare and Technology provides an overview of current evidence-based approaches to leverage technology to promote behavioral health, including management of substance use, mental health, diet/exercise, medication adherence, as well as chronic disease self-management. Additionally, the book defines the state of implementation research examining models for deploying technology-based behavioral healthcare systems and integrating them into various care settings to increase the quality and

Download Free Scientific Journal Impact Factor 2013

reach of evidence-based behavioral healthcare while reducing costs.

Developments in Management Science in Engineering 2018

This book contains all refereed papers that were accepted to the first edition of the « Digital Enterprise Design & Management » (DED&M 2013) international conference that took place in Paris (France) from February 12 to February 13, 2013. (Website: <http://www.dedm2013.dedm.fr/>) These proceedings cover the most recent trends in the emerging field of Digital Enterprise, both from an academic and a professional perspective. A special focus is put on digital uses, digital strategies, digital infrastructures and digital governance from an Enterprise Architecture point of view. The DED&M 2013 conference is organized under the guidance of the CESAMES non profit organization (<http://www.cesames.net/>).

Serum Globulins—Advances in Research and Application: 2013 Edition

Growth Differentiation Factors—Advances in Research and Application: 2013 Edition is a ScholarlyPaper™ that delivers timely, authoritative, and intensively focused information about ZZZAdditional Research in a compact format. The editors have built Growth Differentiation Factors—Advances in Research and Application: 2013 Edition on the vast information databases of ScholarlyNews.™ You can expect the

Advances in Cardiac Output Research and Application: 2013 Edition

In recent years, a number of academic and commercial software packages and databases have been developed for the analysis and screening of biological data; however, the usability of these data is compromised by so-called novel genes to which no biological function is assigned. Annotating new genes outlines an approach to the analysis of evolutionary-conserved, heart-enriched genes with unknown functions, offering a step-by-step description of the procedure from screening to validation. The book begins by offering an introduction to the databases and software available, before moving on to cover programming guidelines, including a specific case study on the use of C-It for in silico screening. The second half of the book offers a step-by-step guide to

Download Free Scientific Journal Impact Factor 2013

experimental validation concepts and procedures, as well as an overview of additional potential applications of this approach in the field of stem cells and tissue regeneration, before a concluding chapter summarises the concepts and theories presented. Focuses not only on screening but also on biological validations Provides details of databases and software (web interface) products for biologists with minimal computation skills Offers a step-by-step outline of the procedure involved

Streptococcus—Advances in Research and Treatment: 2013 Edition

Developed countries and certain regions of economically emerging nations have displaying a rapidly growing population of the oldest-oldónonagenarians, centenarians, and supercentenarians. As this trend continues, we must redirect some of our research on aging to the experience of advanced old age and discovering individual and community factors that improve the quality of life during this life stage. This state-of-the science, multidisciplinary Annual provides a comprehensive discussion of the factors promoting healthy survival and/or ensuring a good quality of life for the oldest elderly. It features an international representation that includes Denmark, Finland, France, Italy, the Netherlands, the United Kingdom, Sweden, Japan, and North America. The Annual disseminates the most current research regarding this population and notes gaps in our knowledge. The book addresses ongoing demo-epidemiological changes regarding longevity, estimates of oldest-old populations, and prevalence of chronic and degenerative diseases, frailty, and old-age dependency. The meaning of healthy longevity as a theoretical concept is explored. Grounded in the fundamental issue of whether or not the prevalence of

Download Free Scientific Journal Impact Factor 2013

poor health or poor quality of life inevitably increases with age, recent research and ongoing studies from a variety of perspectives are presented from several nations. The book clarifies the known and hypothetical factors favoring healthy longevity, from genes to social integration. Additionally, chapters explore gender differences in age trajectories and changes over time. Special attention is given to the social and cognitive dimensions of healthy longevity. Key Features: Disseminates new scholarly research about a rapidly growing segment of the population—the oldest old Offers multidisciplinary and international perspectives about the factors that promote healthy survival and improve quality of life Addresses the social and cognitive dimensions of healthy longevity Provides important information regarding health care costs for this population Includes the research of seasoned and emerging scholars

Annual Review of Gerontology and Geriatrics, Volume 33, 2013

Research in the Biomedical Sciences: Transparent and Reproducible documents the widespread concerns related to reproducibility in biomedical research and provides a best practices guide to effective and transparent hypothesis generation, experimental design, reagent standardization (including validation and authentication), statistical analysis, and data reporting. The book addresses issues in the perceived value of the existing peer review process and calls for the need for improved transparency in data reporting.

Download Free Scientific Journal Impact Factor 2013

It reflects new guidelines for publication that include manuscript checklists, replication/reproducibility initiatives, and the potential consequences for the biomedical research community and societal health and well-being if training, mentoring, and funding of new generations of researchers and incentives for publications are not improved. This book offers real world examples, insights, and solutions to provide a thought-provoking and timely resource for all those learning about, or engaged in, performing and supervising research across the biomedical sciences. Provides a "big picture" perspective that includes the scope of the replicability issue and covers initiatives that have the potential to act as effective solutions Offers real world research context for transparent, replicable experimental design and execution and reporting of biomedical research with the potential to address aspects of the translational gap in drug discovery Highlights the importance of reproducibility and the necessary changes in biomedical and pharmaceutical research training and incentives to ensure sustainability

Environmental Biotechnology and Materials Engineering (2013)

Streptococcus—Advances in Research and Treatment: 2013 Edition is a ScholarlyEditions™ book that delivers timely, authoritative, and comprehensive information about Streptococcus pneumoniae. The editors have built Streptococcus—Advances in Research and Treatment: 2013 Edition on the vast information databases of ScholarlyNews.™ You can

Ecological Informatics

This book contributes to the current discussion in society, politics and higher education on innovation capacity and the financial and non-financial incentives for researchers. The expert contributions in the book deal with implementation of incentive systems at higher education institutions in order to foster innovation. On the other hand, the book also discusses the extent to which governance structures from economy can be transferred to universities and how scientific performance can be measured and evaluated. This book is essential for decision-makers in knowledge-intensive organizations and higher-educational institutions dealing with the topic of performance management.

Springer Handbook of Science and Technology Indicators

Frontiers in Clinical Drug Research - Anti-Allergy Agents is an exciting eBook series comprising a selection of updated review articles relevant to the recent development of pharmacological agents used for the treatment of allergies. The scope of the reviews includes clinical trials of anti-inflammatory and anti-allergic drugs, drug delivery strategies used to treat specific allergies (such as inflammation,

Download Free Scientific Journal Impact Factor 2013

asthma and dermatological allergies), lifestyle dependent modes of therapies and the immunological or metabolic mechanisms that are of interest to researchers as targets for new drugs. The second volume of this series brings 7 reviews which cover neuro- and immunomodulating therapies for asthma and COPD, antioxidant therapies for allergies, allergic rhinitis medications and more. *Frontiers in Clinical Drug Research - Anti-Allergy Agents* will be of interest to immunologists and drug discovery researchers interested in anti-allergic drug therapy as the series provides relevant cutting edge reviews written by experts in this rapidly expanding field.

Nosocomial Infections: New Insights for the Healthcare Professional: 2013 Edition

This book is based on the research papers presented during The Institute of Industrial Engineers Asian Conference 2013 held at Taipei in July 2013. It presents information on the most recent and relevant research, theories and practices in industrial and systems engineering. Key topics include: Engineering and Technology Management Engineering Economy and Cost Analysis Engineering Education and Training Facilities Planning and Management Global Manufacturing and Management Human Factors Industrial & Systems Engineering Education Information Processing and Engineering Intelligent Systems Manufacturing Systems Operations Research Production Planning and Control Project Management Quality Control and Management Reliability and Maintenance Engineering Safety, Security and Risk Management Supply Chain Management Systems Modeling and Simulation Large scale complex systems

The Collected Works of L. S. Vygotsky

Proceedings of the Institute of Industrial Engineers Asian Conference 2013

Selected, peer reviewed papers from the 2013 International Conference on Environmental Biotechnology and Materials Engineering (EBME 2013), August 23-25, 2013, Tianjin, China

Introduction to Scientific Publishing

This book is a very concise introduction to the basic knowledge of scientific publishing. It starts with the basics of writing a scientific paper, and recalls the different types of scientific documents. It gives an overview on the major scientific publishing companies and different business models. The book also introduces to abstracting and indexing services and how they can be used for the evaluation of science, scientists, and institutions. Last but not least, this short book faces the problem of plagiarism and publication ethics.

Demyelinating Diseases—Advances in Research and Treatment: 2013 Edition

Management science in engineering (MSE) is playing an increasingly important role in modern society. In particular, the development of efficient and innovative managerial tools has significantly influenced the research progress of management science in engineering. This book identifies the main research categories of MSE, and evaluates and classifies each journal in this field. It has been

Download Free Scientific Journal Impact Factor 2013

developed through the joint efforts of scientific board members, many of whom are editors-in-chief of significant journals, academics, and members and fellows of various relevant societies. It will be of interest to scientists, researchers, practitioners, engineers, graduate students and upper-level undergraduates in engineering management, civil engineering, industrial engineering, environmental engineering, energy engineering, information engineering, and agricultural engineering.

The Semiperiphery of Academic Writing

Issues in General Science and Scientific Theory and Method: 2013 Edition is a ScholarlyEditions™ book that delivers timely, authoritative, and comprehensive information about Mixed Methods Research. The editors have built Issues in General Science and Scientific Theory and Method: 2013 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Mixed Methods Research in this book to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in General Science and Scientific Theory and Method: 2013 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. The Semantic Web - ISWC 2013

ECMLG2013-Proceedings For the 9th European Conference on Management Leadership and Governance

ICIEMS 2013 is to provide a platform for researchers,

engineers, academicians as well as industrial professionals from all over the world to present their research results and development activities in Industrial Engineering and Management Science. This conference provides opportunities for the delegates to exchange new ideas and experiences face to face, to establish business or research relations and to find global partners for future collaboration.

International Conference on Industrial Engineering and Management Science-2013

This handbook presents the state of the art of quantitative methods and models to understand and assess the science and technology system. Focusing on various aspects of the development and application of indicators derived from data on scholarly publications, patents and electronic communications, the individual chapters, written by leading experts, discuss theoretical and methodological issues, illustrate applications, highlight their policy context and relevance, and point to future research directions. A substantial portion of the book is dedicated to detailed descriptions and analyses of data sources, presenting both traditional and advanced approaches. It addresses the main bibliographic metrics and indexes, such as the journal impact factor and the h-index, as well as altmetric and webometric indicators and science mapping techniques on different levels of aggregation and in the context of their value for the assessment of research performance as well as their impact on

research policy and society. It also presents and critically discusses various national research evaluation systems. Complementing the sections reflecting on the science system, the technology section includes multiple chapters that explain different aspects of patent statistics, patent classification and database search methods to retrieve patent-related information. In addition, it examines the relevance of trademarks and standards as additional technological indicators. The Springer Handbook of Science and Technology Indicators is an invaluable resource for practitioners, scientists and policy makers wanting a systematic and thorough analysis of the potential and limitations of the various approaches to assess research and research performance.

Growth Differentiation Factors—Advances in Research and Application: 2013 Edition

Demyelinating Diseases—Advances in Research and Treatment: 2013 Edition is a ScholarlyBrief™ that delivers timely, authoritative, comprehensive, and specialized information about ZZZAdditional Research in a concise format. The editors have built Demyelinating Diseases—Advances in Research and Treatment: 2013 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about ZZZAdditional Research in this book to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of

Demyelinating Diseases—Advances in Research and Treatment: 2013 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

Digital Enterprise Design and Management 2013

This book provides a comprehensive review of the current knowledge on writing and publishing scientific research papers and the social contexts. It deals with both English and non-Anglophone science writers, and presents a global perspective and an international focus. The book collects and synthesizes research from a range of disciplines, including applied linguistics, the sociology of science, sociolinguistics, bibliometrics, composition studies, and science education. This multidisciplinary approach helps the reader gain a solid understanding of the subject. Divided into three parts, the book considers the context of scientific papers, the text itself, and the people involved. It explains how the typical sections of scientific papers are structured. Standard English scientific writing style is also compared with science papers written in other languages. The book discusses the strengths and challenges faced by people with different degrees of science writing expertise and the
