In the spring of 1888, George Washington Vanderbilt returned to New York after spending weeks exploring the countryside near Asheville, North Carolina. Thinking it was the perfect place to build his home, Vanderbilt promptly sent his agent to begin quietly buying contiguous tracts of land until he had several thousand acres. Soon, he began constructing what would become America's largest private residence. He commissioned two of America's preeminent designers, architect Richard Morris Hunt and landscape architect Frederick Law Olmsted, to collaborate with him in planning his estate, which he named Biltmore. To complement the 250-room French Renaissance-style chateau, Olmsted worked closely with Hunt to create a vast landscape of pleasure gardens and grounds with miles of scenic drives through parklands, productive farms, and the country's first scientifically managed forest. Today, Biltmore is a National Historic Landmark privately owned by Vanderbilt's descendants.

like to underscore that of the 19 chapters, 14 are by Mexican researchers, which demonstrates the commitment of Mexican institutions to academic life and to the prevention and treatment of chronic degenerative diseases.

### **A Knight's Vow**

Adobe Photoshop Lightroom is truly an awesome program, and the primary editing tool for so many photographers today. But, at some point, you realize that there are things you need to do to your images that Lightroom just can't do. It could be anything from pro-level portrait retouching, to blending two or more images together, to incredible special effects, to removing distracting things in your image, to adding beautiful type to your images, and, well...there are just lots of incredible things you could do...if you just knew Photoshop. Adobe Photoshop is...well...it's Photoshop—this huge, amazing, Swiss Army knife of a program with 70+ tools, and more than a hundred filters. So, compared to Lightroom it seems really complicated, and it could be, but you've got a secret weapon: Scott Kelby. He's the same guy who wrote the world's #1 best-selling book on Lightroom, he's Editor and Publisher of Photoshop User magazine and Lightroom Magazine, and he's here to teach you just the most important, most useful parts of Photoshop—just the stuff that Lightroom can't already do. Once you learn these techniques (all covered in this short, quick, easy-to-use, plain-English guide), it opens a whole new world of productivity and creativity. Here's what you'll learn: Scott tells you flat-out which tools to use, which techniques work best, which ones to avoid, and why. You only really need about 20% of what Photoshop can do, and that 20% is all covered right in this book. The most important layer techniques, and learning layers is like being handed the keys to the candy store—this is where the fun begins, and you'll be amazed at what you'll be able to do, so quickly and easily. Scott's favorite (and most useful) portrait retouching techniques; his favorite special effects for landscape, travel, and people photos; plus which filters are awesome (and which ones waste your time). Also, you'll learn how to mask hair and create super-realistic composites (you'll be amazed when you learn how easy this is), plus how to take advantage of all the latest Photoshop technology, how to leverage the latest features (so you're doing things the easy way), and a bunch of today's most popular techniques (the same commercial looks you're seeing in hot demand), so you'll be using Photoshop like a shark in no time. If you've been saying to yourself, "Ya know, I really should learn Photoshop," you're holding the absolute best book to get you there, coming from the guy who literally wrote the book on Lightroom. He knows how to help you make the most of using these two powerful tools together to take your images (and your fun) to the next level. You are going to love being a Photoshop shark!

Religious pluralism is the greatest challenge facing Christianity in today's Western culture. The belief that Christ is the only way to God is being challenged, and increasingly Christianity is seen as just one among many valid paths to God. In *Four Views on Salvation in a Pluralistic World*, four perspectives are presented by their major proponents: Normative Pluralism: All ethical religions lead to God (John Hick) Inclusivism: Salvation is universally available, but is established by and leads to Christ (Clark Pinnock) Salvation in Christ: Agnosticism regarding those who haven't heard the gospel (Alister McGrath) Salvation in Christ Alone: Salvation depends on explicit personal faith in Jesus Christ alone (R. Douglas Geivett and W. Gary Phillips) This book allows each contributor to not only present the case for his view, but also to critique and respond to the critiques of the other contributors. The Counterpoints series provides a forum for comparison and critique of different views—both Christian and non-Christian—on important theological issues.

A predictable pattern of success Entrepreneurs who have read early drafts of The Start-Up J Curve responded, "I wish I had this book years ago." A start-up unfolds in a predictable pattern; the more aware entrepreneurs are of this pattern, the better able they will be to capitalize on it. Author Howard Love calls this pattern the start-up J Curve: The toughest part of the endeavor is the time between the actual start of a new business and when the product and model are firmly established. The Start-Up J Curve gives entrepreneurs the tools they need to get through the early challenges so they can reach the primary value creation that lies beyond. Love brings thirty-five years of start-up experience to this comprehensive guide to starting a business. He outlines the six predictable stages of start-up growth and details the activities that should be undertaken at each stage to ensure success and to avoid common pitfalls. Instead of feeling lost and confused after a setback, start-up founders and investors can anticipate the challenges, overcome the obstacles, and ride the curve to the top.

In 1971, after buying their acreage in a very remote area of the Colorado Mountains, the Wood family began to develop their dream ranch. The history and wild life of the area provides a fascinating backdrop for their story of adventure and discovery in the wilderness. From the first Americans to the mining era and the building of the railroads, Colorado is steeped in the glorious history of the Wild West. The property was located in the middle of a cow pasture with only marginal access and the closest electrical lines were over twelve miles away. With no means of communication and the closest town twenty-two miles away, the family had their work cut out for them. After surviving a devastating blizzard with thirty people in their home, they understood the importance of understanding survival techniques. Their crazy but true experiences are recounted with frankness and humor. By sharing his experiences and newly-gained knowledge, Wood has saved many of his friends hundreds of dollars, offering his advice on energy systems and the challenges of building in a remote area. Through perseverance and good old-fashioned hard work, he and his family built their dream ranch in the beautiful mountains of Colorado.

### **Chronology of Namibian History**

It is an age of hurry and worry. Fortunes are quickly made and freely spent. Nearly all busy, hard-worked Americans have an intuitive sense of the need that exists for at least one period of rest and relaxation during each year, and all—or nearly all—are willing to pay liberally, too liberally in fact, for anything that conduces to rest, recreation and sport. I am sorry to say that we mostly get swindled. To the man of millions it makes little difference. I do not write for him, and can do him little good. But there are hundreds of thousands of practical, useful men, many of them far from being rich; mechanics, artists, writers, merchants, clerks, business men—workers, so to speak—who sorely need and well deserve a season of rest and relaxation at least once a year. To these, and for these, I write. (George Washington Sears, Chapter I)
