A predictable pattern of success Entrepreneurs who have read early drafts of The Start-Up J Curve responded, "I wish I had this book years ago." A start-up unfolds in a predictable pattern; the more aware entrepreneurs are of this pattern, the better able they will be to capitalize on it. Author Howard Love calls this pattern the start-up J Curve: The toughest part of the endeavor is the time between the actual start of a new business and when the product and model are firmly established. The Start-Up J Curve gives entrepreneurs the tools they need to get through the early challenges so they can reach the primary value creation that lies beyond. Love brings thirty-five years of start-up experience to this comprehensive guide to starting a business. He outlines the six predictable stages of start-up growth and details the activities that should be undertaken at each stage to ensure success and to avoid common pitfalls. Instead of feeling lost and confused after a setback, start-up founders and investors can anticipate the challenges, overcome the obstacles, and ride the curve to the top.

Today's Web 2.0 applications (think Facebook and Twitter) go far beyond the confines of the desktop and are widely used on mobile devices. The mobile Web has become incredibly popular given the success of the iPhone and BlackBerry, the importance of Windows Mobile, and the emergence of Palm Pre (and its webOS platform). At Apress, we are fortunate to

have Gail Frederick of the well-known training site Learn the Mobile Web offer her expert advice in Beginning Smartphone Web Development. In this book, Gail teaches the web standards and fundamentals specific to smartphones and other feature-driven mobile phones and devices. Shows you how to build interactive mobile web sites using web technologies optimized for browsers in smartphones Details markup fundamentals, design principles, content adaptation, usability, and interoperability Explores cross-platform standards and best practices for the mobile Web authored by the W3C, dotMobi, and similar organizations Dives deeps into the feature sets of the most popular mobile browsers, including WebKit, Chrome, Palm Pre webOS, Pocket IE, Opera Mobile, and Skyfire By the end of this book, you'll have the training, tools, and techniques for creating robust mobile web experiences on any of these platforms for your favorite smartphone or other mobile device.

The lovers in the age of indifference are tough romantics from every corner of the planet: a marriage splinters during a game of mah jong; a depressed fiancée is lifted by a mid-air encounter with a Hollywood legend; a mountain keeper watches over a lonely temple but is perturbed when, finally, a visitor dares to arrive. In this engagingly maverick collection of stories, writer and filmmaker Guo zooms into tender and surreal moments in the lives of lost souls and lovers, adrift between West and East. Her personal, provocative and charming fables capture the sense of alienation thrown up by life in the modern world, and we join her characters in their search for human contact - and love - in rapidly-changing landscapes

all around the globe.

A guide to the British Royal Navy in the Napoleonic Age for fans of the Aubrey-Maturin series: "A gem of a book" (Minneapolis Star Tribune). What is a sand-grouse, and where does it live? What are the medical properties of lignum vitae, and how did Stephen Maturin use it to repair his viola? Who is Admiral Lord Keith, and why is his wife so friendly with Captain Jack Aubrey? More than any other contemporary author, Patrick O'Brian knew the past. His twenty Aubrey-Maturin

novels, beginning with 1969's *Master and Commander*, are distinguished by deep characterization, heart-stopping naval combat, and an attention to detail that enriches and enlivens his stories. In this revised edition of *A Sea of Words*, Dean King and his collaborators dive into Jack Aubrey's world. In addition to their invaluable glossary, the authors provide essays on the age's politics, naval medicine, and the many ships that Jack Aubrey sailed, sighted, and fought against. For both the curious fan and the O'Brian aficionado, *A Sea of Words* is an invaluable tome on the British Royal Navy.

Alle zwei Jahre ein neues Smartphone und zusätzlich warten, bis der Hersteller die neueste Android-Version ausliefert. Ja, so sieht der Lebenszyklus vieler Smartphones aus. Außerdem werden die Funktionen des Smartphones häufig beschnitten. Das müssen Sie nicht mitmachen. Lösen Sie sich von gegebenen Fesseln und hacken Sie sich frei. Android ganz nach Ihrem Geschmack: Mit alternativen Launchern können Sie schnell das Aussehen der Oberfläche ändern. Android Emulator auf dem PC: Apps vor der Installation in einer gesicherten Umgebung testen. Rooten Sie Ihr Android-Smartphone frei Beim Kauf eines neuen Android-Smartphones ist das Betriebssystem installiert und konfiguriert. Um an die versteckten Funktionen zu gelangen, müssen Sie das System rooten. Als sogenannter Superuser haben Sie dann Zugriff auf das ganze System und können alles damit anstellen. Erst nach dem Rooten wissen Sie, wie mächtig Android eigentlich ist. Alternative Launcher und Custom-ROMs Sollten Sie der Standardoberfläche überdrüssig geworden sein, so können Sie mit einem anderen Launcher die Oberfläche ganz einfach ändern. Hierfür müssen Sie Ihr System noch nicht einmal rooten. Wenn Sie aber noch mehr aus dem System herausholen wollen, steht Ihnen neben dem Rooten noch die Möglichkeit zur Installation von Custom-ROMs offen. Auch auf alten Smartphones kommen Sie damit in den Genuss der neuesten Android-Versionen.

This text motivates students by striking a balance in orientation between a strong physics and a strong applications approach. The author also has a unique chapter on fabrication absent in other major books, and puts less of an emphasis on lasers and microwaves. The book de-emphasizes some difficult concepts in Quantum Mechanics as well as the complex mathematics that is used in applying these concepts. Readers are introduced to the steps in the fabrication of devices to make the operation and construction of each device more real.

EcoDesign 2011 - the 7th International Symposium on Environmentally Conscious Design and Inverse Manufacturing - was successfully held in the Japanese old capital city of Kyoto, on November 30th - December 2nd, 2011. The subtitle of EcoDesign 2011 is to "design for value innovation towards sustainable society." During this event, presenters discussed the way to achieve both drastic environmental consciousness and value innovation in order to realise a sustainable society.

The international conference on Automation and Robotics-ICAR2011 is held during December 12-13, 2011 in Dubai, UAE. The proceedings of ICAR2011 have been published by Springer Lecture Notes in Electrical Engineering, which include 163 excellent papers selected from more than 400 submitted papers. The conference is intended to bring together the researchers and engineers/technologists working in different aspects of intelligent control systems and optimization, robotics and automation, signal processing, sensors, systems modeling and control, industrial engineering, production and management. This part of proceedings includes 81 papers contributed by many researchers in relevant topic areas covered at ICAR2011 from various countries such as France, Japan, USA, Korea and China etc. Many papers introduced their advanced research work recently; some of them gave a new solution to problems in the field, with powerful evidence and detail demonstration. Others stated the application of their designed and realized systems. The session topic of this proceeding is intelligent control and robotics and automation, which includes papers about Distributed Control Systems, Intelligent Fault Detection and Identification, Machine Learning in Control, Neural Networks based Control Systems, Fuzzy Control, Genetic Algorithms, Robot Design, Human-robots Interfaces, Network Robotics, and Autonomous Systems, Industrial Networks and Automation, Modeling, Simulation and Architectures, Vision, Recognition and Reconstruction, Virtual Reality, Image Processing, and so on. All of papers here involved the authors' numerous time and energy, will be proved valuable in their research field. Sincere thanks to the committee and all the authors, moreover anonymous reviewers from many fields and organizations. That is a power for all of us to go on research work for the world.

Design for Innovative Value Towards a Sustainable Society

When Helen Fielding first wrote Bridget Jones's Diary, charting the life of a 30-something singleton in London in the 1990s, she introduced readers to one of the most beloved characters in modern literature. The book was published in 40 countries, sold more than 15 million copies worldwide, and spawned a best-selling sequel, Bridget Jones: The Edge of Reason. The two

books were turned into major blockbuster films starring Renée Zellweger, Hugh Grant and Colin Firth. With her hotly anticipated third instalment, *Bridget Jones: Mad About the Boy*, Fielding introduces us to a whole new enticing phase of Bridget's life set in contemporary London, including the challenges of maintaining sex appeal as the years roll by and the nightmare of drunken texting, the skinny jean, the disastrous email cc, total lack of twitter followers, and TVs that need 90 buttons and three remotes to simply turn on. An uproariously funny novel of modern life, *Bridget Jones: Mad About the Boy* is a triumphant return of our favourite Everywoman.

Thom Magister's first adult paper doll book offers four hot paper dudes who enjoy wearing leather, denim, uniforms, and fetish gear. Each dude has seven different outfits, including cop, cowboy, and military styles, plus bondage accessories and more to convey a particular look. That adds up to almost 50 different fantasies you can explore with their help!

Power, Politics, and Organizational Change

This book provides one of the first systematic in-depth studies on regional catastrophe risk pools. It explores the various goals of these new financial instruments, illustrating how they function on a conceptual, technical and practical level, and reconstructs their political genesis. With climate-related disasters increasing in frequency and severity, *Insuring Against Climate Change* explores how affected countries, especially those in the Global South, have increasingly turned to innovative index insurance instruments, as demonstrated by the creation of the Caribbean Catastrophic Risk Insurance Facility (CCRIF), the African Risk Capacity (ARC) and the Pacific Catastrophe Risk Assessment and Financing Initiative Facility (PCRAFI Facility). Scherer scrutinizes the formation of this trend, exploring comparatively the goals, characteristics and histories of these tools, and argues that their attractiveness rests more on political than economic benefits and is, in fact, more supply than demand-driven. Making a significant contribution to current debates on the opportunities and limitations of what are sometimes described as indirect 'climate risk insurance', this book will be of great interest to political scientists with an interest in insurance instruments and climate-related disaster management politics as well as to practitioners working in the insurance, finance and the development sectors.

Designing with Photovoltaics

This book highlights new advances in biometrics using deep learning toward deeper and wider background, deeming it "Deep Biometrics". The book aims to highlight recent developments in biometrics using semi-supervised and unsupervised methods such as Deep Neural Networks, Deep Stacked Autoencoder, Convolutional Neural Networks, Generative Adversary

Networks, and so on. The contributors demonstrate the power of deep learning techniques in the emerging new areas such as privacy and security issues, cancellable biometrics, soft biometrics, smart cities, big biometric data, biometric banking, medical biometrics, healthcare biometrics, and biometric genetics, etc. The goal of this volume is to summarize the recent advances in using Deep Learning in the area of biometric security and privacy toward deeper and wider applications. Highlights the impact of deep learning over the field of biometrics in a wide area; Exploits the deeper and wider background of biometrics, such as privacy versus security, biometric big data, biometric genetics, and biometric diagnosis, etc.; Introduces new biometric applications such as biometric banking, internet of things, cloud computing, and medical biometrics.

`Many books on management are sanitized, cleanly technical accounts of the unreality of managerial life and work. Politics hardly feature. This book tells it like it is: it dishes the dirt, gets low-down, into the funky and fascinating politics of organizational life' - Stewart Clegg, Aston Business School and University of Technology, Sydney Combining a practical and theoretical guide to the politics of organizational change, this book provides an exceptional resource to students of change management, and organizational behaviour. Buchanan and Badham show how the change agent who is not politically skilled will fail, and that it is necessary to be able and willing to intervene in the political processes of the organization. This revised edition includes a range of excellent new material and features, including: - a new chapter on gender in approaches to organization politics - a full range of teaching materials including case studies, incident reports, self-assessments, and more - Each chapter recommends a feature film (or DVD) to illustrate aspects of organization politics - fresh research evidence - recent literature on the nature of entrepreneurial politics; - a model of political expertise, and how that can be developed This lively and engaging book is key to MBA and other Masters degree candidates taking courses in change management, and organizational behaviour. It will also be valuable for practising managers on tailored executive programmes in organization politics.

Introduction to Design and Analysis

Prices and quantities of both stock and flow variables in an economic system are decisively influenced by their spatial coordinates. Any equilibrium state also mirrors the underlying spatial structure and a tatonnement process also incorporates the spatial ramifications of consumer and producer behaviour. The recognition of the spatial element in the formation of a general equilibrium in a complex space-economy already dates back to early work of Losch, Isard and Samuelson, but it reached a stage of maturity thanks to the new inroads made by T. Takayama. This book is devoted to spatial economic equilibrium (SPE) analysis and is meant to pay homage to the founding father of modern spatial economic

thinking, Professor Takayama. This book witnesses his great talents in clear and rigorous economic thinking regarding an area where for decades many economists have been groping in the dark. Everybody who wants to study the phenomenon of spatial economic equilibrium will necessarily come across Takayama's work, but this necessity is at the same time a great pleasure. Studying his work means a personal scientific enrichment in a field which is still not completely explored. The present volume brings together recent contributions to spatial equilibrium analysis, written by friends and colleagues of Takayama. The structure of the book is based on four main uses of spatial equilibrium models: (i) the imbedding of spatial flows in the economic environment, related to e.g.

"Designing with Photovoltaics" cover a broad range of topics related to the design of products, buildings and vehicles with integrated photovoltaic (PV) technologies including storage aspect. It enables the reader to easily design new products, buildings and vehicles through use of innovative PV products. Diverse categories of product integrated PVs are discussed including applications of solar power for mobility and building integrated systems along with design- and manufacturing-related information about solar cells. Illustrating design cases of various PV-powered products, special attention is paid to end-users and environmental aspects of PV applications. Aimed at senior undergraduates, graduates and professionals in electrical engineering, architecture, design, physics, mechanical engineering and those specifically studying photovoltaics, it Covers the different product integrated photovoltaics (PIPV) with a focus on design and manufacturing Presents comprehensive overview of all aspects of designing with photovoltaics Includes product integrated PV, building integrated PV and solar powered mobility concepts Contains real design cases showing how to design with photovoltaics Discusses context of environmental issues and user aspects

This book is open access under a CC BY 4.0 license. This book is intended primarily for practitioners who are facing the

“softwareisation” of their business. It presents the Scaling Management Framework, a model based on collected experiences from companies that have already made the journey to give software a central role within the organization. The model is unique because it suggests a holistic method to analyze and plan your journey. It simply means that you can’t just focus solely on your products or services. You also have to look closely at your processes and your organization, the way you make decisions and get things done. Inevitably, these will have to change. Software has changed the rules of the game. The world talks about the digitalization in industry and society – how the focus has shifted from producing tangible things towards software and services. This trend started many years ago, but is now affecting every company, whether it’s a software company or not. There are many companies that have already made a digitalization journey – and many are about to embark on this journey – like you. How do you transform your organization when software is becoming a critical part of your business? This book comes with a map, a compass, and suggested journeys along with selected travel stories comprising best practices and lessons learned from past digitalization journeys. Use the map to find your way in the digitalization landscape, and use the compass to find the direction of your journey.

Sugli effetti che le microonde hanno sulla salute si discute da anni e gli studi indipendenti non sono per nulla rassicuranti: sono sempre più numerosi i ricercatori che sottolineano il loro impatto negativo a livello cellulare e che invitano a usare con maggior criterio le tecnologie wireless. Difendersi dall'elettrosmog Dai luoghi di lavoro alle abitazioni private, dalle zone di svago agli ospedali, la tecnologia ci circonda con una silenziosa emissione di onde a bassa e alta frequenza. I disturbi provocati dalle onde elettromagnetiche Aumento della produzione di radicali liberi, stress delle cellule e invecchiamento precoce, modifiche nelle funzioni cerebrali, rallentata funzione motoria e altri danni nei bambini, mal di testa e affaticamento, disturbi del sonno, condizioni neurodegenerative, riduzione della secrezione di melatonina, cancro. Wifi a scuola? E' opportuno permettere che anche a scuola, per ore e ore, i bambini siano esposti a campi elettromagnetici che rischiano di provocare danni alla salute? Come difendersi dall'elettrosmog? Tanti consigli utili e azioni pratiche per ridurre l'impatto sulla nostra salute delle onde elettromagnetiche. La collana "I SEMI DI TERRA NUOVA è un progetto editoriale in digitale nato per approfondire con sguardo critico i temi centrali del mensile Terra Nuova, che dal 1977 si occupa di ecologia, sostenibilità e alimentazione naturale. Ebook a prezzi contenuti nei quali vengono affrontate varie tematiche legate alla nostra salute: l'infertilità e i rimedi naturali, l'abuso di antibiotici e le cure alternative, la scelta vegan, i cibi irradiati, i vaccini, la pillola e il rischio cancro, gli Ogm e le ragioni del no. Tanti titoli per "seminare" saperi ed esperienze innovative e controcorrente, essere più consapevoli dei propri consumi e ridurre la nostra impronta ecologica.
