-Why all meetings are a waste of time -The theft of the Queen's cows -One Norwegian man's unique approach to showing his gratitude -Fitting a burglar alarm to a tortoise -Or how Lou Reed was completely wrong about what makes a perfect day Pithy and provocative, this is Clarkson at his best, taking issue with whatever nonsense gets in the way of his search for all that's worth celebrating. 'The Hungover Games deftly explores expectations of modern womanhood through a beautiful, wild, painfully honest, hilarious and sometimes heartbreaking story. Full of adventure and awe, Sophie Heawood has written a soulful, truthful homage to a life lived with appetite, intensity and wonder.' Dolly Alderton I had no idea how to commit to another human being. I could barely commit to reading a magazine, and I wrote for magazines for a living. My specialist subject was celebrities, and my own relationships made their marriages look eternal. I'd never paid a household bill that didn't mention bailiffs, and my idea of exercise was to go and stand outside a famous person's house and stare until I'd convinced myself that I lived in it. But my life in LA was happy; free of care and consequence. That was, until I came down to earth - with a bump. So this is the story of how I staggered from partying in Hollywood to bringing up a baby in Piss Alley, Dalston; how I never did find a copy of What To Expect When You Weren't Even Fucking Expecting To Be Expecting, and why paternity testing is not a good topic for a first-date conversation. People always said I'd find love where I least expected it. I always said they were idiots. \*\*AN EVENING STANDARD AND COSMOPOLITAN BEST BOOK OF 2020\*\* \*\*AN OBSERVER NON-FICTION BOOK TO LOOK OUT FOR IN 2020\*\*

This book takes a pragmatic and hype-free approach to explaining artificial intelligence and how it can be utilised by businesses today. At the core of the book is a framework, developed by the author, which describes in non-technical language the eight core capabilities of Artificial Intelligence (AI). Each of these capabilities, ranging from image recognition, through natural language processing, to prediction, is explained using real-life examples and how they can be applied in a business environment. It will include interviews with executives who have successfully implemented AI as well as CEOs from AI vendors and consultancies. AI is one of the most talked about technologies in business today. It has the ability to deliver step-change benefits to organisations and enables forward-thinking CEOs to rethink their business models or create completely new businesses. But most of the real value of AI is hidden behind marketing hyperbole, confusing terminology, inflated expectations and dire warnings of 'robot overlords'. Any business executive that wants to know how to exploit AI in their business today is left

confused and frustrated. As an advisor in Artificial Intelligence, Andrew Burgess regularly comes face-to-face with business executives who are struggling to cut through the hype that surrounds AI. The knowledge and experience he has gained in advising them, as well as working as a strategic advisor to AI vendors and consultancies, has provided him with the skills to help business executives understand what AI is and how they can exploit its many benefits. Through the distilled knowledge included in this book business leaders will be able to take full advantage of this most disruptive of technologies and create substantial competitive advantage for their companies.

How to implement effective, magnetic leadership by applying asset-based thinking and shifting your mindset from the negative to the positive Lead Positive takes the fundamentals of Asset-Based Thinking (ABT) and turns them into a playbook for successful leadership. ABT is a simple mindset management process that shows people how to make small shifts in perception and thinking to achieve great results. Cramer shows leaders how to apply ABT to shift their attention away from what is negative and learn to intentionally shine the spotlight on the positive, beneficial facts of a situation. As they make this mental shift from negative to positive aspects, they improve their optimism, empathy, and confidence. When their mindset zooms in on what is strong, valuable, and possible, what they say and do

Jeremy Clarkson, shares his opinions on just about everything in *The World According to Clarkson*. Jeremy Clarkson has seen rather more of the world than most. He has, as they say, been around a bit. And as a result, he's got one or two things to tell us about how it all works - and being Jeremy Clarkson he's not about to voice them quietly, humbly and without great dollops of humour. In *The World According to Clarkson*, he reveals why it is that:

- Too much science is bad for our health
- '70s rock music is nothing to be ashamed of
- Hunting foxes while drunk and wearing night-sights is neither big nor clever
- We must work harder to get rid of cricket
- He liked the Germans (well, sometimes)

With a strong dose of common sense that is rarely, if ever, found inside the M25, Clarkson hilariously attacks the pompous, the ridiculous, the absurd and the downright idiotic, whilst also celebrating the eccentric, the clever and the sheer bloody brilliant. Less a manifesto for living and more a road map to modern life, *The World According to Clarkson* is the funniest book you'll read this year. Don't leave home without it. *The World According to Clarkson* is a hilarious collection of Jeremy's Sunday Times columns and the first in his *The World According to Clarkson*

"Spurious Correlations is the most fun you'll ever have with graphs."--Bustle Military intelligence analyst and Harvard Law student Tyler Vigen illustrates the golden rule that "correlation does not equal causation" through hilarious graphs inspired by his viral website. But that hasn't stopped millions of people from going to tylervigen.com and asking, "Wait, what?" Vigen has designed software that scours enormous data sets to find unlikely statistical correlations. He began pulling the funniest ones for his website and has since gained millions of views, hundreds of thousands of likes, and tons of media coverage. As I Was Saying is the seventh book in Jeremy Clarkson's best-selling The World According to Clarkson series. \*\*\* Crikey, the world according to Clarkson's been a funny old place of late . . . For a while, Jeremy could be found in his normal position as the tallest man on British television but, more recently, he appears to have been usurped by a pretend elephant. But on paper the real Jeremy remains at the helm. That's as it should be. For nearly thirty years he has been fearlessly leading the charge as one the best comic writers in the country. And in 2015, he shows no sign of slowing down. So, whether it's pondering If Jesus might have been better off being born in New Zealand Why reflexive pronoun abuse is the worst thing in the world How Pam Ayres's head trumps Gordon Gecko's underpants Or what a television presenter with time on his hands gets up to Jeremy is still trying to make sense of all the big stuff. Circumstances change. Nothing's forever. But As I Was Saying provides glorious proof that Jeremy remains as funny, puzzled, excitable, outspoken, insightful and thought-provoking as ever. ### **What Could Possibly Go Wrong?**

What if you could change history to eliminate slavery, both World Wars, global warming, and an egomaniacal president who thought he was smart enough to drop nuclear bombs without negative consequences? What if that change also made 5 billion people poof from existence? Would you do it? Time Is Irreverent explores those questions, as benevolent aliens send Marty Mann to AD 31 to correct an error in history. This thought-provoking satire features unforgettable characters and unpredictable twists.

Having spent twenty-nine years in operational roles ranging from diving (military and commercial) to professional firefighting (urban, maritime and mountain), marine rescue (surface and subsurface), aviation rescue (rotary and fixed wing), plus another twelve years teaching emergency response and emergency management in a range of disciplines, I have both seen and been directly involved in some monumental stuff ups! With retirement on the horizon I have looked back at some of the more memorable of these experiences; drawing on reports, logbooks and personal records to put my recollections to paper. The initial intent of this work was to produce a document for my family, but ultimately it has resulted in analysis of some terrifying, and at times hilarious, events from my past for my peers to evaluate. Although not intended as an academic examination, I have utilised skills acquired later in life from a Master of Emergency Management degree to assess my performance and those I worked with. Don't expect graphs, formulas, in-text citations and references, this is a story intended to make you laugh and on occasion perhaps utter the challenge, 'bullshit, that would never happen!' But I assure you it did. Occasionally, lack of understanding from those reporting the events I describe merely made us look good. Typically though, the types of stuff ups I've documented didn't always make the evening news or were just buried deep inside a newspaper. Either way, the level of error was regularly diluted (or concealed) with PR spin. For example, how often have you heard news stories with this type of language? "The extreme nature of the task meant that the search had to be

suspended until first light" or "Weather conditions made the job of responders challenging" Although impossible situations occasionally confront responders, these are rare. Therefore, regardless of PR spin, one fact of response will always remain true: as long as humans of any age, race, gender or education level are involved, things will and do go wrong, irrespective of how sophisticated or state-of-the-art equipment may be. Simply put, we are the weak link that causes stuff ups. Real professionals are acutely aware of such human weakness, and because of this, they develop a 'healthy paranoia' that pushes them to train regularly, and realistically, to maintain appropriate preparedness. Healthy paranoia is a term an old colleague of mine first coined when briefing a Search and Rescue (SAR) task containing significant challenge. I now use it to describe how a good operator's subconscious regularly challenges the norm. For example, regular evaluation of role responsibilities and procedures, robust debriefs, asking hard questions of your team members, or leaders (early), all help to keep a team sharp - and ultimately this will mitigate the amount of PR spin required. Such healthy paranoia often manifests in daily routine as a simple question. "What can possibly go wrong?" The answer is always the same. "lots!"

Jeremy Clarkson gets under the bonnet in Clarkson on Cars - a collection of his motoring journalism. Jeremy Clarkson has been driving cars, writing about them and occasionally voicing his opinions on the BBC's Top Gear for twenty years. No one in the business is taller. In this collection of classic Clarkson, stretching back to the mid-1980s, he's pulled together the car columns and stories with which he made his name. As coal mines closed and house prices exploded to a soundtrack of men in make-up playing synthesizers, Jeremy was already waxing lyrical on topics as useful and diverse as: \* The perils of bicycle ownership \* Why Australians - not Brits - need bull bars \* Why soon only geriatrics will be driving BMWs \* The difficulty of deciding on the best car for your wedding \* Why Jesus's dad would have owned a Nissan Bluebird \* And why it is that bus lanes cause traffic jams Irreverent, damn funny and offensive to almost everyone, this is writing with its foot to the floor, the brake lines cut and the speed limit smashed to smithereens. Sit back and enjoy the ride. Praise for

"Brilliantly written, insightful, brutally honest and laugh-out-loud funny." "A great read I would recommend to anyone with even the remotest sense of humour." "Five days on the Pennine Way with my youngest son: the challenges we faced and the experiences we shared. What we learned about ourselves and about each other. And the sorry tale of how I came to walk a mile in my underpants In February 2016 I asked Alex, my youngest son, if he wanted to come for a walk with me. Why? Because I wanted a physical challenge before I was too old for a physical challenge - and I wanted some father/son time before Alex went to university and things were never quite the same again. But I wasn't a walker: I was a writer: someone who spent his days slumped over a desk. The furthest I'd walked was four miles with the dog on a sunny day. So I had to get fit, I had to find out if I could walk 90 miles in 5 days - and I had to come face to face with the ghosts that had haunted me for ten years. "I absolutely love it. Such

an easy read and very humorous." 'Father, Son and the Pennine Way' takes you from the February afternoon when I asked Alex to come for a walk with me, to the day we sent off from Malham in North Yorkshire, to the moment we strode up the final hill into Dufton, just outside Carlisle. But it's not a book about walking. This is a book about a father/son relationship told through a walk. If you want a traditional guidebook, don't buy the book. But if you want to be entertained, inspired, amused and taken on a wonderful journey through the Yorkshire Dales, then you'll love this book. "A brilliant story. Really well put together and very funny."
