The main purpose of Lectures on Macroeconomics is to characterize and explain fluctuations in output, unemployment and movement in prices. Lectures on Macroeconomics provides the first comprehensive description and evaluation of macroeconomic theory in many years. While the authors' perspective is broad, they clearly state their assessment of what is important and what is not as they present the essence of macroeconomic theory today. The main purpose of Lectures on Macroeconomics is to characterize and explain fluctuations in output, unemployment and movement in prices. The most important fact of modern economic history is persistent long term growth, but as the book makes clear, this growth is far

from steady. The authors analyze and explore these fluctuations. Topics include consumption and investment; the Overlapping Generations Model; money; multiple equilibria, bubbles, and stability; the role of nominal rigidities; competitive equilibrium business cycles, nominal rigidities and economic fluctuations, goods, labor and credit markets; and monetary and fiscal policy issues. Each of chapters 2 through 9 discusses models appropriate to the topic. Chapter 10 then draws on the previous chapters, asks which models are the workhorses of macroeconomics, and sets the models out in convenient form. A concluding chapter analyzes the goals of economic policy, monetary policy, fiscal policy, and dynamic inconsistency. Written as a text for graduate students with some background in macroeconomics, statistics, and econometrics, Lectures on Macroeconomics also presents topics in a self contained way that makes it a suitable reference for professional economists.

Two for the Dough is irresistible fun and powerful suspense entertainment from an acclaimed author who is already a national star. It's Stephanie Plum, New Jersey's "fugitive apprehension" agent (a.k.a. bounty hunter), introduced to the world by Janet Evanovich in the award-winning and bestselling novel One for the Money. Now Stephanie's back, armed with attitude—not to mention stun guns, defense sprays, killer flashlights, and her trusty .38, Stephanie is after a new bail jumper, Kenny Mancuso, a boy from Trenton's burg. He's fresh out of the army, suspiciously wealthy, and he's just shot his

best friend. With her bounty hunter pal Ranger stepping in occasionally to advise her, Stephanie staggers knee-deep in corpses and caskets as she traipses through back streets, dark alleys, and funeral parlors. And nobody knows funeral parlors better than Stephanie's irrepressible Grandma Mazur, a lady whose favorite pastime is grabbing a front-row seat at a neighborhood wake. So, Stephanie uses Grandma as a cover to follow leads, but loses control when Grandma warms to the action, packing a cool pistol. Much to the family's chagrin, Stephanie and Granny may soon have the elusive Kenny in their sights. Fast-talking, slow-handed vice cop Joe Morelli joins in the case, since the prey happens to be his young cousin. And if the assignment calls for an automobile stakeout for two with the woman who puts his libido in overdrive, Morelli's not one to object. Low on expertise but learning fast, high on resilience, and despite the help she gets from friends and relatives, Stephanie eventually must face the danger alone when embalmed body parts begin to arrive on her doorstep and she's targeted for a nasty death by the most loathsome adversary she's ever encountered. Another case like this and she'll be a real pro.

Hapgood utilizes ancient maps as concrete evidence of an advanced worldwide civilization existing many thousands of years before ancient Egypt. Hapgood concluded that these ancient mapmakers were in some ways much more advanced in mapmaking than any people prior to the 18th century. Hapgood believes that they mapped all the continents. This would mean that the Americas were mapped thousands of years before Columbus. Antarctica would have been mapped when its coasts were free of ice. Hapgood supposes that there is evidence that these people must have lived when the Ice Age had not yet ended in the Northern Hemisphere and when Alaska was still connected with Siberia by the Pleistocene, Ice Age 'land bridge'.
